INDUSTRIAL CORE RANGE GUIDE

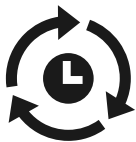

HAND HYGIENE | CLEANING | SAFETY
WASTE MANAGEMENT | MATERIAL HANDLING

MAKING A DIFFERENCE AT INDUSTRIAL FACILITIES

The management of an industrial facility is a matrix of legislative requirements and operational considerations such as hygiene, waste management and cleaning.

Each area of a facility must adhere to the prevailing legislation and have cleaning procedures that support staff health and safety. Managing this from a high-level requires oversight of internal teams, external contractors and budgetary constraints.

Facilities need access to time and cost-effective solutions, that work throughout a facility, in order to balance the demands they face.

EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

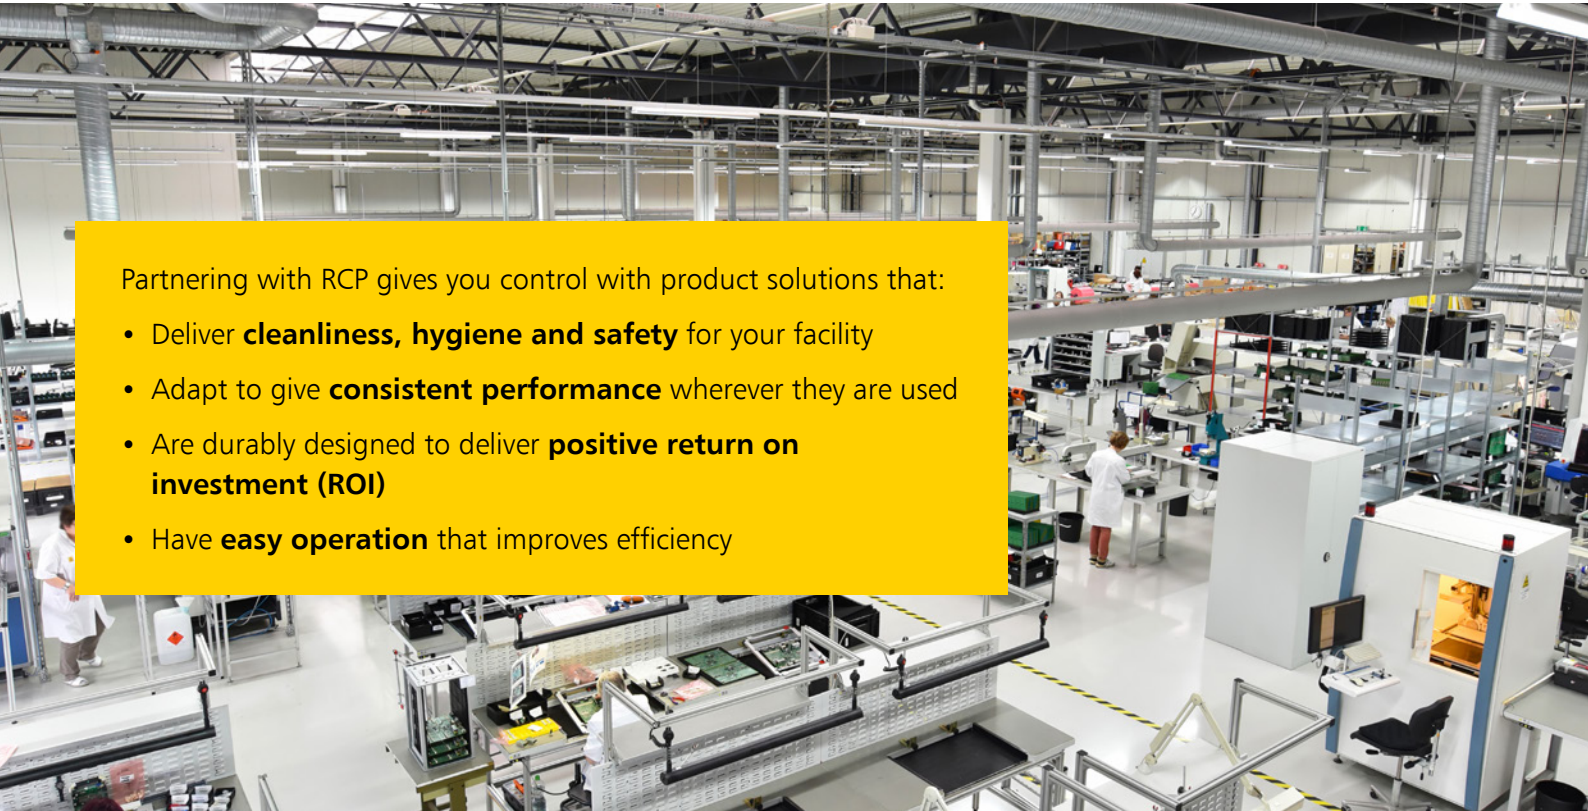

CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

TAILORED SOLUTIONS

RCP have created a core product range that addresses the challenges faced by facilities like yours.

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** for your facility
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

VARIABILITY WITHIN INDUSTRIAL FACILITIES

Industrial facilities incorporate multiple different areas such as warehousing, office space, refuse areas, workshops, assembly lines, loading bays and food service facilities.

When it comes to cleanliness, each area is overseen by different legislative requirements and the company's practical operational needs. The best way to deal with variability throughout an industrial facility is with individual solutions that overcome multiple challenges.

It's better for the company's teams and budget to have cleaning carts stocked with durable products that are as adept at cleaning kitchens as they are machinery, desks, waste containers or washrooms, so that wherever that cart goes within a facility, it can do its job.

Our Core Range gives control of the cleaning, waste and hygiene needs of any facility.

WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that out last and outperform the competition, that save you money, protect your facility's users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S
OPERATIONS, ENSURING HIGHER STANDARDS OF
CLEANING AND SAFER WAYS OF WORKING**

Partner with RCP and you gain access to a range of product solutions that solve multiple problems across your facility. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

CORE RANGE PRODUCT CATEGORIES

Our core range is split into six distinct categories. Each contains products that have been developed with the challenges faced by industrial facilities in mind.

As you continually try to improve how you meet challenges within your facility, you want to be able to find your way to a solution quickly. Our categorisations help you to do that. By focusing in on function, they provide a quick navigation route to an appropriate solution that works.

HAND HYGIENE

Industrial facility washrooms need visible cleaning and hand hygiene solutions that eliminate the risks for users and provide management staff with piece of mind.

CLEANING

Every facility faces a different set of cleaning challenges. Cost effective efficiency is possible with the use of cleaning products that deliver under all circumstances.

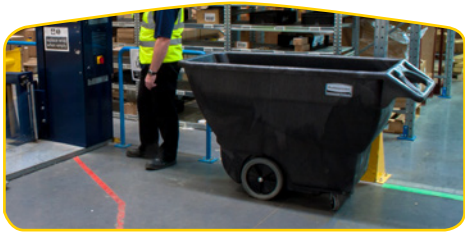

SAFETY

Within Industrial facilities, safety is paramount. Where hazards occur, or risk is increased, staff must use clear signage and durable barriers to warn and protect facility users.

WASTE MANAGEMENT

Facility management should deploy waste products, such as closed-lid bins, that keep users safe and provide enhanced control over disposal and recycling.

MATERIAL HANDLING

Transporting materials through an industrial facility requires equipment that ensure staff safety, while protecting contents from damage.

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every facility. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up the management of a modern facility.

IDENTIFYING CHALLENGES

WAREHOUSE AND MANUFACTURING

Warehouse and industrial spaces are already areas of potential personal risk and these risks should not be further increased by substandard safety and cleaning equipment. Materials must be moved safely, waste collected efficiently, surfaces cleaned thoroughly and hazards dealt with quickly. Keep operations running smoothly and safely in and around your facility with durable products that deliver.

WASTE MANAGEMENT

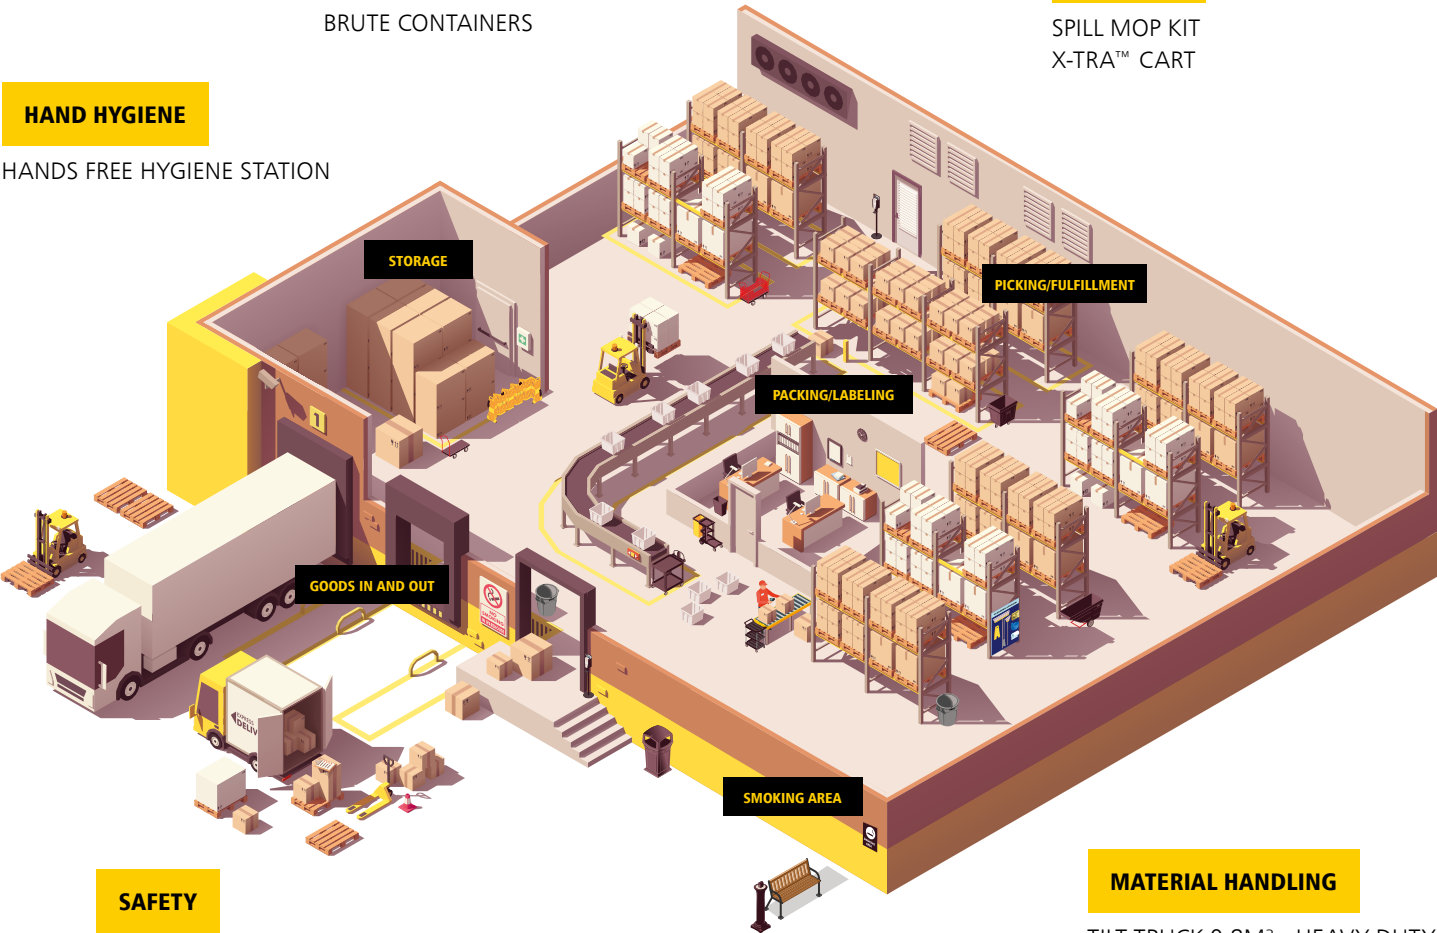

- SLIM JIM RECYCLING STATION
- SMOKERS' STATION WALL-MOUNT URN
- GROUNDKEEPER TUSCAN RECEPTACLE
- LANDMARK CONTAINER
- BRUTE CONTAINERS

CLEANING

- X-TRA™ CART

HAND HYGIENE

- HANDS FREE HYGIENE STATION

SAFETY

- POP-UP CONE AND SLEEVE. LARGE
- MOBILE BARRIER

MATERIAL HANDLING

- TILT TRUCK 0.8M³ - HEAVY DUTY
- HEAVY DUTY PLATFORM TRUCK

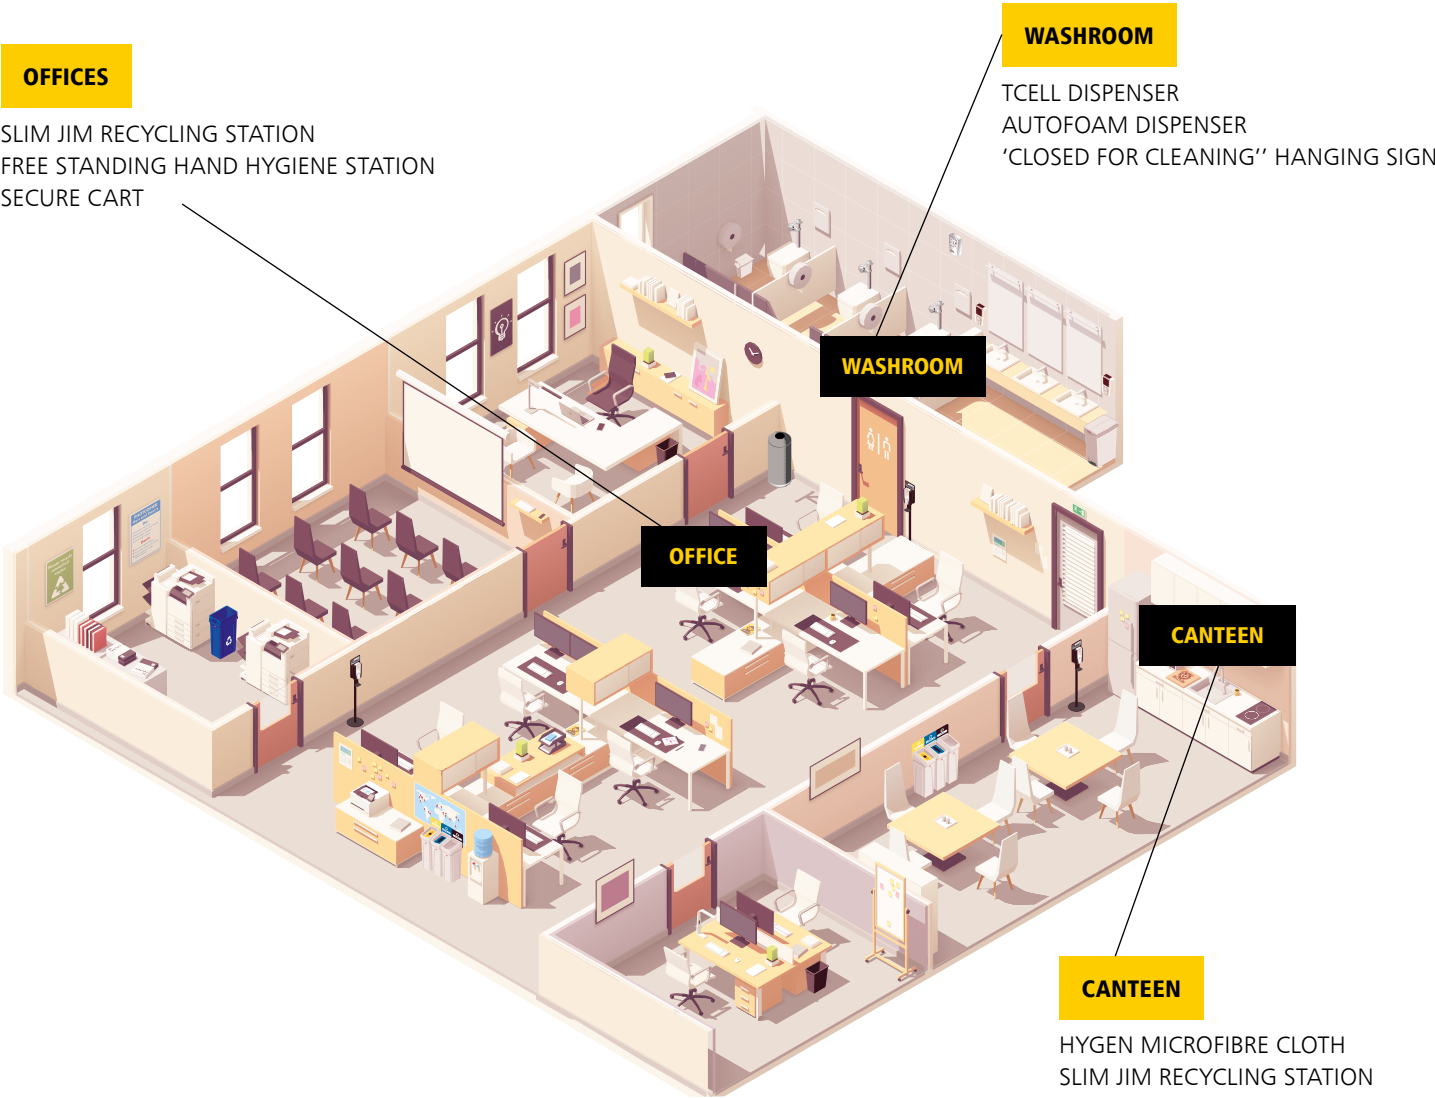

INSIGHT

Whether you're transporting stock, materials or waste, using a series of products designed to interact prevents damage to goods and the occurrence of hazards. Consider your facility's end-to-end transportation needs.

IDENTIFYING CHALLENGES

OFFICE AREAS

Office environments house teams of people in close proximity while also creating multiple streams of waste. To keep staff safe and healthy, alongside ensuring sustainability goals are achieved, facilities need products that satisfy these needs and fit the working environment. The below illustration explores where products can be placed to ensure control of health risks and maximise sustainability.

INSIGHT

The key to maximising recycling is segregating waste streams as early as possible in the waste cycle. Waste kept separate stands a better chance of remaining uncontaminated and being recycled at a processing facility.

HAND HYGIENE

Good hygiene begins with washroom provisions and continues into all areas of a facility

The RCP Hand Hygiene System

A range of dispensers and refills that ensure clean hands. Dispensers can be securely wall mounted or free standing, making them suitable for all locations. Hygienic dispensing solutions, sealed refills of lotion and foam soaps and hand sanitiser mean wherever a dispenser is placed, there is an appropriate refill.

DURABLE

Lifetime warranty gives ongoing protection for your users

CAPABLE

Touch-free operation reduces contamination risk from germs and bacteria

SUSTAINABLE

Refill indicators eliminate wastage and maximise ROI

HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411

HANDS FREE HYGIENE STATION SKU: FG750824

A dependable, durable solution that users will interact with every day:

- ✓ High volume system with a wide range of soap or hand sanitiser refill options
- ✓ Up to 3-year battery life, or around 120,000 doses
- ✓ Easy-to-clean surfaces and efficient refill replacement

INSIGHT

Bulk refill soap dispensers are more prone to bacterial contamination and can be transmission points for illness within your facility. Those risks can be mitigated with sealed refill systems that do not expose their contents to cross-contamination risks during refill.

FLEX ALCOHOL-FREE HAND RUB

SKU: 3486613

An EnrichedFoam alcohol-free hand rub that is safe for everyone

- ✓ Ideal for maintaining a high level of hand hygiene in any facility
- ✓ Capacity options can deliver up to 2,500 doses per refill
- ✓ Sealed soap systems eliminate potential contamination points

RUBBERMAID FLEX DISPENSER

SKU: 3486591

Deliver hygiene into the hands of bathroom users with Flex dispensers:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1 ml) adapt to the needs of children and adults
- ✓ Lifetime warranty means reassurance for you and your users

FLEX ENRICHEDFOAM ANTIBACTERIAL SOAP

SKU: 3486617

EnrichedFoam refills keep hands safe and doesn't aggravate the skin:

- ✓ Capacity options can deliver up to 3,250 doses per refill
- ✓ Easily installed in dispensers, increasing efficiency
- ✓ Box-free refills reduce the amount of waste a facility creates

INSIGHT

Throughout your facility, in high-traffic areas or at welcome desks, where hand hygiene provisions are needed, but soap, water and paper towels cannot practically be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

WASTE MANAGEMENT

Managing multiple streams of waste drives the sustainability success of a facility

Waste Containment

No matter what a facility does operationally, it creates waste. The ability to split, contain and transport created waste is a core component of the waste workflow within a facility. Solid containment and transport of waste keeps staff safe and prevents hazards from arising.

DURABLE

Designed for endurance, even under high-use conditions

SUSTAINABLE

Long-lasting product life reduces replacement frequency

CAPABLE

A variety of sizes to suit the needs of any facility

VENTED BRUTE CONTAINER

SKU: FG263200GRAY

A durable, multipurpose unit that meets any facility's needs:

- ✓ Integrated cinches and vents make changing bags ergonomic and easy
- ✓ Rounded handles increase the ease of lifting and transport
- ✓ Integrated rib structure adds strength and resists crushing

INSIGHT

Along the waste workflow, waste accumulates as it nears the point it is removed from a site. Points where waste is transferred from one receptacle to another are potentially hazardous. Using products designed to interoperate at these points, reduce these risks.

BRUTE DOLLY

SKU: FG264000BLA

A simple transportation device that works with a range of Brute containers:

- ✓ Durably designed device created with structural foam
- ✓ Securely transports containers with loads up to 112KG
- ✓ Casters allow for responsive manoeuvrability without marking floors

SMOKERS' STATION WALL-MOUNT URN

SKU: FGR1012SS

Keep the grounds of your facility safe and litter free:

- ✓ Stainless steel snuff plate robustly extinguishes burning tobacco products
- ✓ Hygienic, easy-to-clean cannister maintains tidy facility aesthetics
- ✓ Inner compartment maximises tobacco waste collection over minimal floor space

GROUNDSKEEPER TUSCAN RECEPTACLE

SKU: FGW3000BLA

An all-weather solution that collects and securely contains waste:

- ✓ Multiple styling options to suit a facility's aesthetic needs
- ✓ Easily serviced internal cannister prevents spills and leaks
- ✓ Anchor holes allow the unit to be solidly secured

INSIGHT

Cigarette butts are the single greatest source of ocean pollution. Globally, over 3 trillion are irresponsibly disposed of every year¹. Units that isolate this waste give facilities control over how it can be disposed of, protecting our environment.

¹ <https://globalnews.ca/news/4418956/cigarette-butts-ocean-pollution-bar/>

CLEANING

Keeping surfaces and kitchens clean reduces the risk for staff and diners

Microfibre Cleaning

Constructed from a blend of nylon and polyester microfibres, the technology in these products is proven to remove 99.9% of microbes with or without the use of bleach. No matter where or what you use them for, they provide unrivalled performance.

 **DURABLE**
Longer lasting microfibre products that deliver better ROI

 **DEPENDABLE**
Consistent performance across situations and cleaning processes

 **SUSTAINABLE**
Reusable construction lasts longer reducing waste sent to landfills

PROFESSIONAL MICROFIBRE CLOTHS

- RED SKU: 1865827
- GREEN SKU: 1865828
- BLUE SKU: 1865829
- YELLOW SKU: 1865830

Split microfibre with extended durability keeps your cleaning operations cost-effective:

- ✓ Remove 99% of microbes, whether used with chlorine or water
- ✓ Variety of colours prevents the risk of cross contamination
- ✓ Robust stitching maintains shape throughout a lifetime of use
- ✓ Endures 250 standard washes, 100 with chlorine

INSIGHT

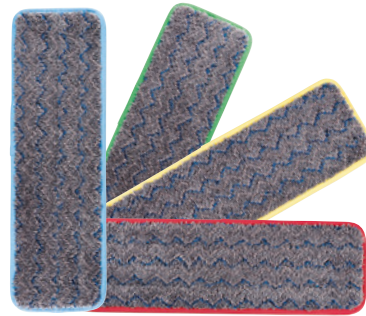

Microbes on equipment and surfaces are the food stuff of germs and pathogens. Keeping surfaces as clean as possible requires the removal not just of hazardous organic material, but of the conditions that support their growth as well.

HYGEN™ MICROFIBRE MOPS

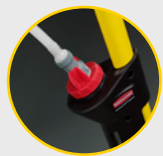

See product listing pages for SKUs

Industry-best premium microfibres mopping performance:

- ✓ Greater surface contact cleans more of the floor first time
- ✓ Colour coded edging helps to reduce the risk of cross contamination
- ✓ Zig-zag technology removes more microbes than conventional products
- ✓ Reusable for a minimum of 500 launders (250 with chlorine)

WORKPLACE ESSENTIALS

PULSE™ MOP WITH SINGLE SIDED FRAME

SKU: FGQ96958YL00

High efficiency cleaning that is time and cost effective:

- ✓ Refillable onboard reservoir for direct cleaning with your preferred solution
- ✓ Clean more square metres in less time
- ✓ Trigger dispenses required amount of cleaning solution with each press

SLIM JIM® CLEANING TROLLEY WITH PULSE MOP CLIP

SKU: 2110167

A functional system that combines waste collection and cleaning:

- ✓ A configurable system of hooks and grippers holds cleaning tools and signs
- ✓ Slim profile improves manoeuvring in confined spaces
- ✓ Compatible with all HYGEN tools and PULSE mops

INSIGHT

Now, more than ever, the users of a facility are looking for the visible signs of cleanliness and hygiene. Well stocked cleaning carts provide reassurance and indicate to users what cleaning processes are in place, without having to see them performed.

SAFETY

The safety and protection of staff must be the top priority for all facility managers.

Safety Signage

The shortest route to safety is permanent signage around ever-present risks and easily deployed barriers and signs wherever hazards may arise. Our safety products use clear, simple language and imagery to indicate the nature of a hazard and enforce safe distances.

VISIBLE

Iconography that illustrates the risk for facility users

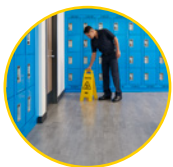

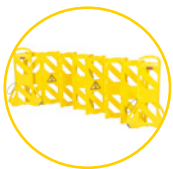

DEPENDABLE

Multilingual wording gets the message across to more users

DURABLE

Designed to be long lasting solutions for facilities

MOBILE BARRIER

SKU: FG9S1100YEL

Easy to deploy, store, move, see and use, the mobile barrier is ideal for every situation:

- ✓ Articulating panels extend to a maximum length of 13-feet/4 meters
- ✓ Situation appropriate deployment: straight, curved or circular
- ✓ Ships fully assembled, ready for use on arrival

INSIGHT

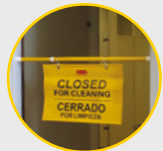

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

A-FRAME SAFETY SIGN

SKU: FG611200YEL

A lightweight, quick-to-deploy caution sign for spills, trips or hazards:

- ✓ Double sided, it warns users approaching from multiple directions
- ✓ Easy to carry, store and transport on cleaning carts
- ✓ ANSI/OSHA colour compliant resin construction for long lasting safety

'CLOSED FOR CLEANING' HANGING SIGN

SKU: FG9S1600YEL

Extendable hanging sign that adapts to different doorway widths (max extension 112cm):

- ✓ Multilingual messaging communicates clearly to facility users
- ✓ Rolls up for compact storage and transportation
- ✓ Creates a physical barrier to prevent doorway access during cleaning

POP-UP CONE AND SLEEVE

SKU: FG9S0000YEL

Multilingual, multi-directional signage for effective communication:

- ✓ Durable resin construction endures the most rugged usage
- ✓ Slimline storage appropriate for cleaning stores or facility walls
- ✓ Pop-out deployment removes fiddly operation, allowing immediate use

INSIGHT

When you have multiple areas within your facility that require different cleaning methodologies, you need to balance needs with budgetary constraint. The best route to cost effectiveness is to deploy products that perform in any environment.

MATERIAL HANDLING

The bulk transportation of waste, supplies or materials, must be undertaken safely.

Material Handling Trucks

When anything needs to be moved in bulk, such as materials, supplies or waste, the associated risks for operators and other facility users begin to increase. Our material handling trucks are designed to surmount these challenges and keep all facility users safe.

CAPABLE

Multiple volume options for use across facilities

DURABLE

Steel and resin constructions that can endure constant use

SUSTAINABLE

Ultra durability means less replacements and less waste sent to a landfill

STRUCTURAL FOAM TILT TRUCK

400LTR CAPACITY: FG9T1400BLA

600LTR CAPACITY: FG101300BLA

800LTR CAPACITY: FG9T1500BLA

The Tilt Truck that combines performance and strength:

- ✓ A steering wheel handle design that provides ergonomic manoeuvrability
- ✓ Constant force design means dumping can be safely controlled by a single operative
- ✓ Smooth surfaces and resin construction for an easy-to-clean unit that endures high-use

INSIGHT

Whether transporting waste or materials, transportation equipment needs to be bigger than what it is transporting. Equipment overladen with waste or materials, hanging over the edge, present a serious crash or spill hazard to operators and others.

TRIPLE TROLLEY

SKU: FG440100BLA

The triple trolley that carries waste within a facility and folds away when finished:

- ✔ Up to 500lb capacity possible with precision-engineered structure
- ✔ Adjustable three-position handle allows ergonomic push and pull operation
- ✔ Multi-directional caster system leaves floors and surfaces unmarked

CONVERTIBLE UTILITY CART AND PLATFORM TRUCK

SKU: FG430000BLA

An adaptable, durable cart that's suitable for multiple tasks within a facility:

- ✔ Easily switch between cart and platform operation at the touch of a button
- ✔ Rear locking casters provide additional safety during loading and unloading
- ✔ Narrow profile and ease of operation transports loads of up to 400lbs

CUBE TRUCK 0.6M³

SKU: FG461900BLA

A range of Cube Trucks in varying sizes with load capacities from 136-272kg:

- ✔ Suitable for waste collection or material transport through any facility
- ✔ Durable resin construction is easy to wipe clean between uses
- ✔ Diamond shape caster arrangement allows for better manoeuvrability

INSIGHT

Just as the strength of a building is in its foundations, the same is true of material transport trucks. Casters may seem to be a secondary factor when reviewing carts, but the stability and manoeuvrability, and therefore the safety, of a truck is embedded in its casters.

SLIM JIM RECYCLING

TIP

Studying disposable coffee cups, University of Alberta researchers found customers significantly more likely to recycle cups when their names were correctly spelt. A strong component in recycling uptake amongst facility users is connecting identity with responsibility.

TIP

Hand hygiene extends beyond bathroom behaviour. The waste workflow often runs throughout the entirety of a facility and it should be paired with hand hygiene provisions at crucial points. Where soap and water aren't viable, consider hand rubs instead.

TCELL REFILLS

TIP

In high-traffic areas such as entryways, receptions, halls and canteens where hand hygiene provisions are needed, but soap, water and paper towels are impractical, use solutions that dry quickly to keep hands clean and germ free.

TIP

Create cleaning processes that end with a step focusing on the restocking of carts to maximise efficiency the next time the process restarts. Starting a cleaning process with a full cart, means nothing should be missed as the work is undertaken.

TIP

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

**'ENABLING CONTROL IN YOUR
WASTE MANAGEMENT, CLEANING
AND HYGIENE ENVIRONMENTS'**

The RCP Core Range of products are designed to serve the needs of those that manage industrial facilities. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.

The RCP Core Range is available globally, so wherever your facility is located, you can derive the benefits of a product range that has been designed with facilities like yours in mind. Partner with RCP and give your staff the very best waste management, safety, cleaning and hygiene experience available.
