

EDUCATION CORE RANGE GUIDE

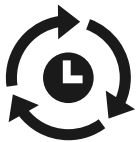

HAND HYGIENE | CLEANING | SAFETY
WASTE MANAGEMENT | MATERIAL HANDLING

COMPLEX PROBLEM SOLVING FOR EDUCATIONAL FACILITIES

The myriad of departments and venues within an educational facility present a complex set of challenges to keep them clean, safe, hygienic and free of waste.

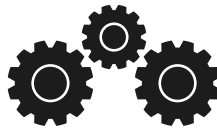

The complexity of sports venues, science labs, kitchens, changing rooms, art studios, etc. all nestling together but with their own cleaning and hygiene needs often leads to many different products being used within a facility.

To maximise the effectiveness of cleaning and hygiene processes, educational facilities should implement a focused range of solutions from a trusted partner that address these challenges.

EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

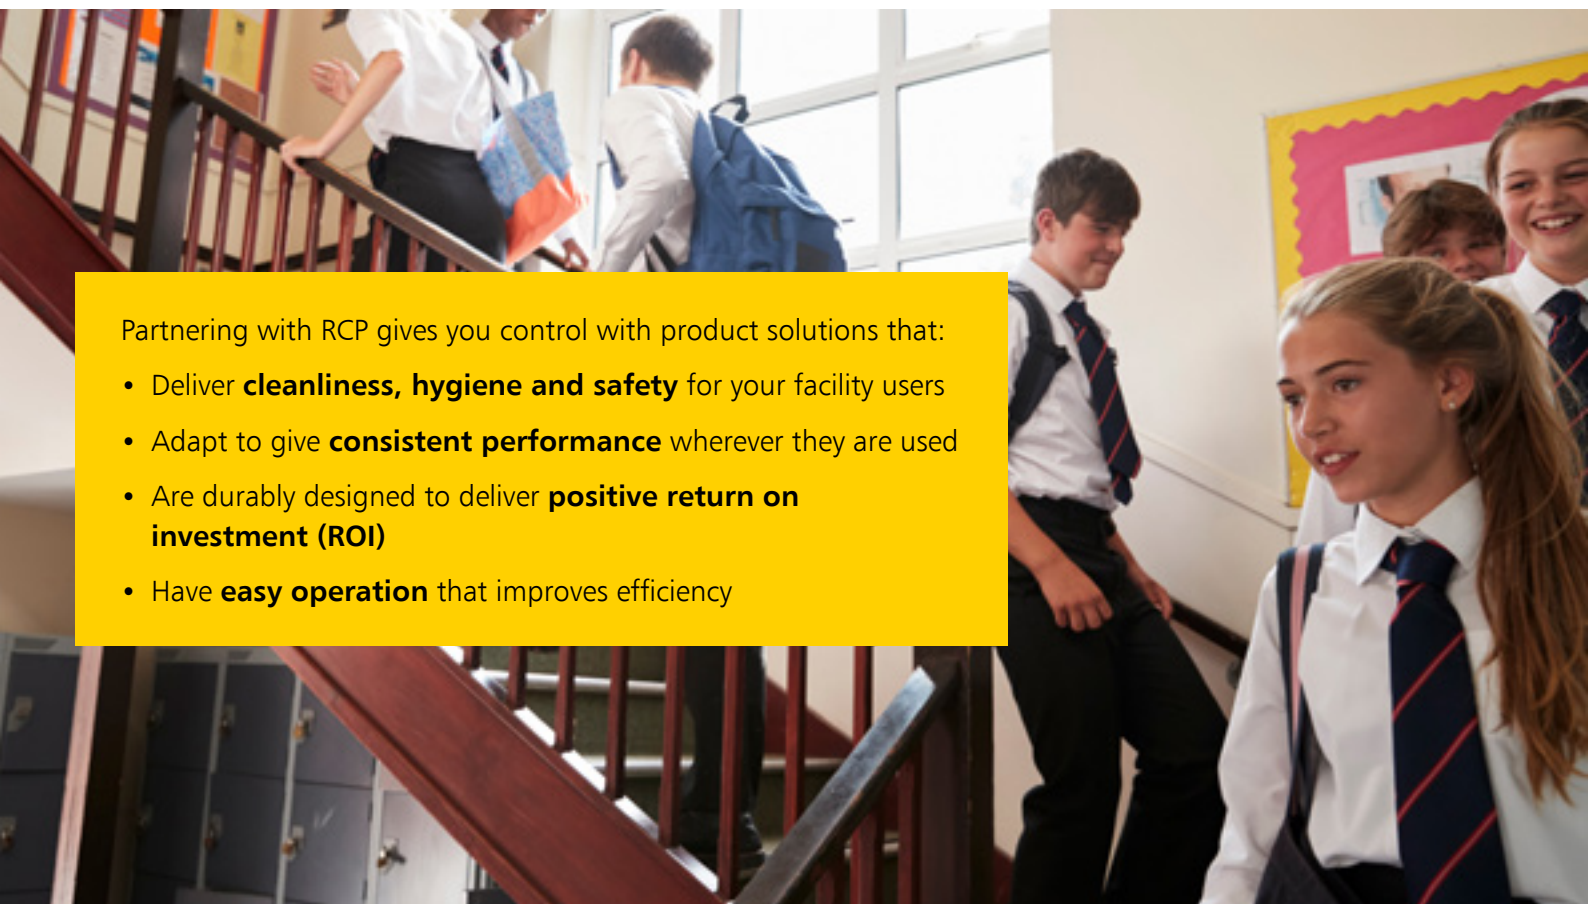

TAILORED SOLUTIONS

Rubbermaid Commercial Products (RCP) have created a core product range that addresses the challenges faced by facilities like yours.

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** for your facility users
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

BEST PRACTICE GUIDANCE

HAND HYGIENE, CLEANING, WASTE MANAGEMENT AND SAFETY IN EDUCATIONAL FACILITIES

Educational facilities that implement cleaning, hygiene, safety and waste disposal best practices need to find solutions that work for children and adults alike.

In terms of high-traffic areas, the corridors of schools and education facilities are some of the most active. Within educational facilities, post-pandemic fallout will be reflected in a continual need to maximise space and maintain high levels of cleanliness and hygiene.

TIPS

HAND HYGIENE – Frequent effective handwashing and the use of hand sanitisers helps prevent the spread of germs and infections.

CLEANING – Regularly cleaning surfaces keeps them free of microbes and prevents the spread of germs.

WASTE MANAGEMENT – Isolating contaminated waste limits the cross-contamination potential.

SAFETY – Keeping a safe distance from one another keeps staff and students safe.

BEST PRACTICE GUIDANCE

IMPLEMENTING EFFECTIVE PROCEDURES IN ANY EDUCATIONAL FACILITY

Institutions such as the European Centre for Disease Control (ECDC) and The World Health Organisation (WHO) provide guidelines to help facilities equip and prepare for a return to full operations. They cover four key areas:

HAND HYGIENE

Educational facilities, by their nature, require interaction between people, but must prevent infection spreading between them. Facilities should:

- Perform staff and student bathroom audits, updating signage and guidance accordingly. ¹
- Plan assemblies or Q&A sessions to address concerns. ²
- Prepare and maintain hand washing stations with soap and water where available. ²
- Offer hand sanitiser as an option when soap and water aren't available ²

CLEANING

Updated cleaning practices will be required to address on-going viral threats. Educational facilities will need to consider:

- Perform walkthroughs of staff and student environments to assess risk prior to reopening. ²
- Ensure classroom materials and equipment are cleaned after use ²
- Include cleaning practices within lessons to support education around COVID-19. ²
- Create enhanced cleaning policies for contamination touchpoints. ³

WASTE MANAGEMENT

Waste must be collected more frequently, but not allowed to become a source of infection. To mitigate risk, educational facilities must:

- Remove all open topped waste containers throughout the facility. ²
- Deploy closed-lid bins that isolate potentially infectious waste. ²
- Bins must be cleaned when emptied to remove any lingering viral threats. ²
- Treat all waste collected in the facility as if it is infectious. ²

SAFETY

Maintaining social distance is vital. Anyone could be carrying COVID-19 without symptoms, so educational facilities must ensure personal distancing occurs by:

- Staggering the start and end of the school day. ²
- Deploying barriers in high-traffic areas to keep the flow of staff and students to a minimum. ²
- Rearranging seating and desk layouts in classrooms and halls to ensure social distancing is enforced. ²

TIP |

Clear communication of your procedures for hand hygiene, cleaning, safety and waste management to staff and students drives compliance and supports lasting behaviour change, and as a result, keeps everyone safe.

THE CLEANING COMPLEXITIES

Educational facilities contain a multitude of areas that can have a wide variety of differing needs when it comes to cleaning, hygiene and waste management.

When you manage an educational facility, it isn't just space you oversee. It's the staff working there, the students learning, the suppliers bringing resources, the services removing waste and the contractors maintaining equipment. They all require attention and direction and they have to operate within the facility's budgetary constraints.

The RCP core range eases the complexities you face cleaning your facility and delivering a safe environment for staff and students. Products designed to be adaptable to the differing needs of your facility with durability that doesn't deplete your budget. The next few pages highlight some of these solutions and how they support your facility.

WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that out last and outperform the competition, that save you money, protect your facility's users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S
OPERATIONS, ENSURING HIGHER STANDARDS OF
CLEANING AND SAFER WAYS OF WORKING**

Partner with RCP and you gain access to a range of product solutions that solve multiple problems across your facility. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

CORE RANGE PRODUCT CATEGORIES

Our core range is split into six distinct categories. Each contains products that have been developed with the challenges faced by educational facilities in mind.

As you continually try to improve how you meet challenges within your facility, you want to be able to find your way to a solution quickly. Our categorisations help you to do that. By focusing in on function, they provide a quick navigation route to an appropriate solution that works.

HAND HYGIENE

Educational facility washrooms need visible cleaning and hand hygiene solutions that eliminate the risks for users and provide management staff with piece of mind.

WASHROOM

Visibly tackling surface germs and grime, collecting waste and eliminating odours within washrooms is key for the safety and comfort of users.

CLEANING

Every facility faces a different set of cleaning challenges. Cost effective efficiency is possible with the use of cleaning products that deliver under all circumstances.

SAFETY

Within an educational facility, safety is paramount. Where hazards occur, or risk is increased, staff must use clear signage and durable barriers to warn and protect facility users.

WASTE MANAGEMENT

Facility management should deploy waste products, such as closed-lid bins, that keep users safe and provide enhanced control over disposal and recycling.

MATERIAL HANDLING

Transporting materials through an educational facility requires equipment that ensure staff and student safety, while protecting contents from damage.

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every facility. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up the management of a modern facility.

IDENTIFYING CHALLENGES

IN SMALL AND MEDIUM SPACES

The areas within an educational facility vary greatly and their cleaning requirements along with them. The equipment requirements for cleaning offices differ in selection and volume to those needed for washrooms or classrooms. The below illustration explores some of the areas where a facility faces challenges and how to tackle them directly and effectively.

WASHROOM

TILT TRUCK
AUTOFOAM HAND HYGIENE REFILLS

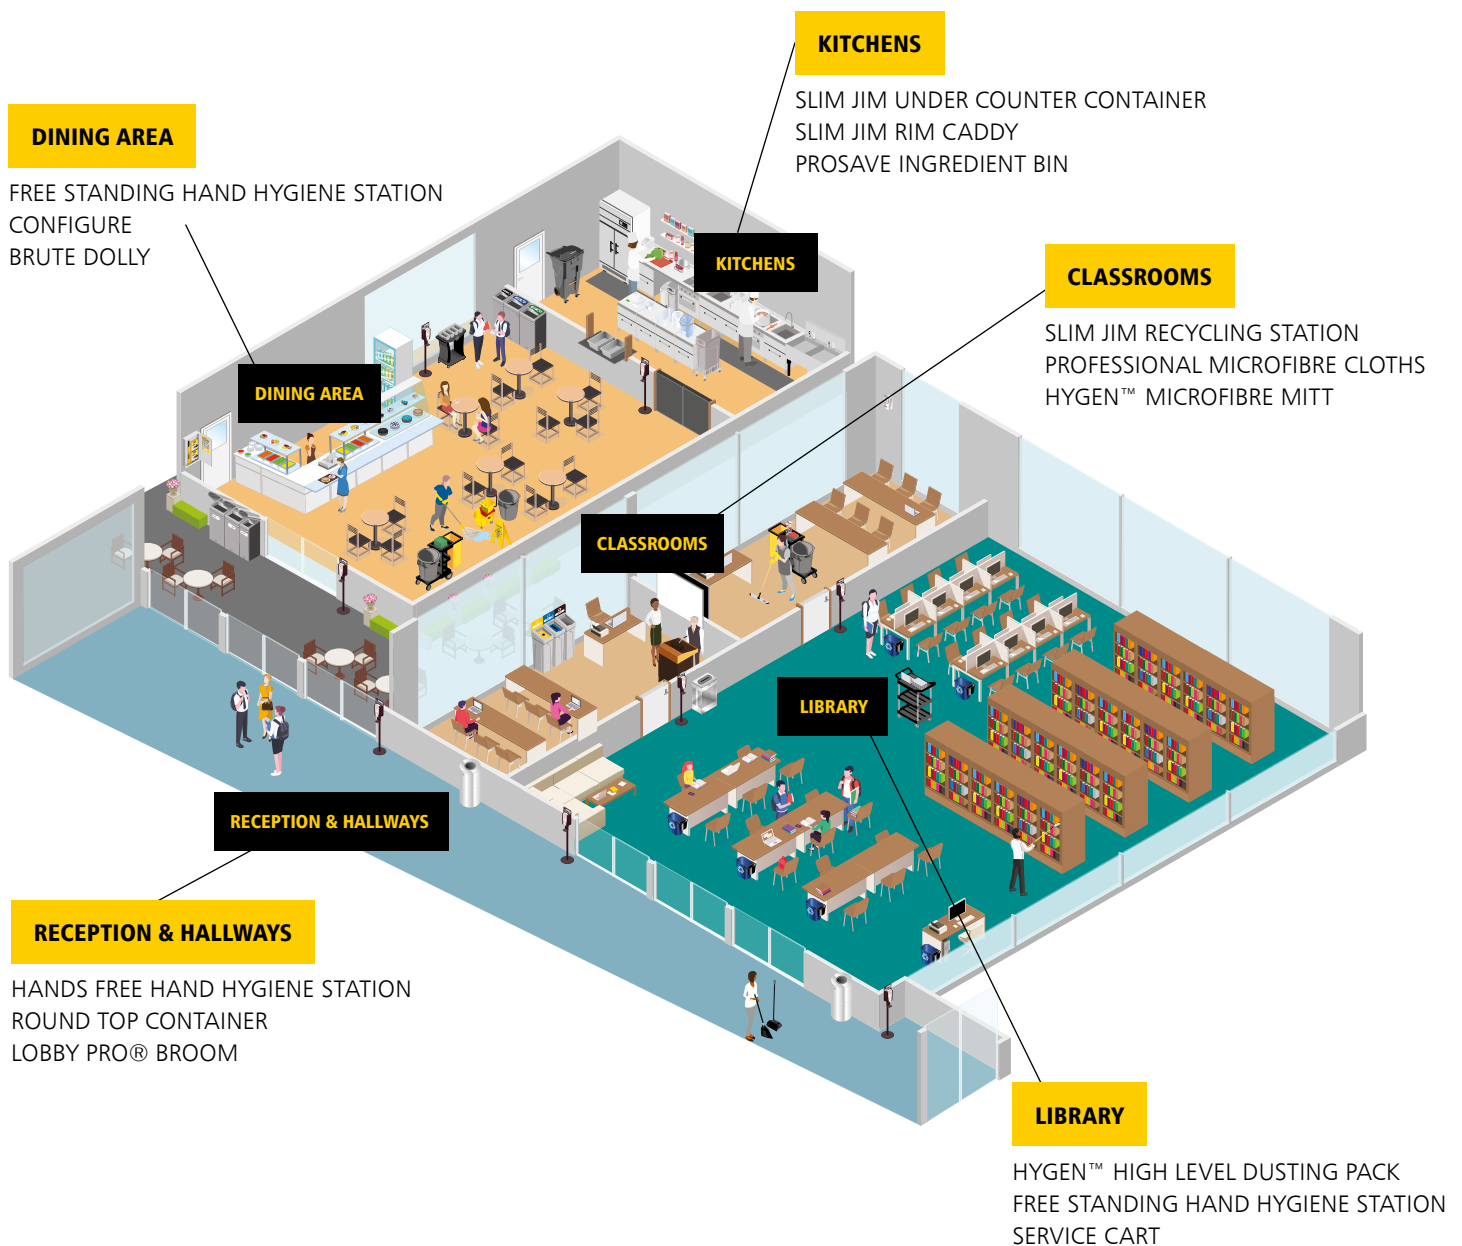

INSIGHT

There is a base level of cleaning activity that takes place in front-of-house areas. You can maximise budget and cleaning efficacy by utilising products that perform equally well under different circumstances.

IDENTIFYING CHALLENGES

OPEN AREAS

Educational facilities have an interesting set of challenges to deal with. While many facilities aggregate waste, few face the challenge of combining waste from food areas, science labs, washrooms with the cleaning waste generated in those areas. Many areas, and the corridors connecting them, are high-traffic areas meaning cleaning solutions in these areas must be effective, efficient and easy to deploy.

INSIGHT 

Waste workflow tends towards greater accumulation. From individual bins to collection carts to back-of-house containers to the collection point where waste is removed from site. Products designed to interact, improve efficiency within this workflow.

HAND HYGIENE

Eliminate the hygiene risks from your bathrooms and ensure the comfort and safety of staff and students

The RCP Hand Hygiene System

A range of dispensers and refills that ensure clean hands. Dispensers can be securely wall mounted or free standing, making them suitable for all locations. Hygienic dispensing solutions and sealed refills of lotion and foam soaps and hand sanitisers mean wherever a dispenser is placed, there is an appropriate refill.

FLEXIBLE

Wall-mounted and free-standing dispensers are an adaptable solution

DEPENDABLE

Safe system of sealed refills prevents bacterial contamination of soap

DURABLE

Lifetime warranty gives you confidence in performance

HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411

HANDS FREE HYGIENE STATION SKU: FG750824

Sustainability, safety and hand hygiene delivered in a single high-capacity unit:

- ✓ Industry-leading battery life of up to 3 years or 120,000 hand washes
- ✓ Touch-free operation removes cross-contamination risks
- ✓ Hands Free Hygiene Station can be used anywhere, any time by anyone

INSIGHT

Bulk refill soap dispensers are prone to bacterial contamination and in some cases can be transmission points for illness in a busy facility. These risks are mitigated with sealed soap systems that don't expose their contents to bacterial infection.

FLEX ALCOHOL-FREE HAND RUB

SKU: 3486613

An EnrichedFoam alcohol-free hand rub that is safe for everyone

- ✓ Ideal for maintaining a high level of hand hygiene in any facility
- ✓ Capacity options can deliver up to 2,500 doses per refill
- ✓ Sealed soap systems eliminate potential contamination points

RUBBERMAID FLEX DISPENSER

SKU: 3486591

Deliver hygiene into the hands of bathroom users with Flex dispensers:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1 ml) adapt to the needs of children and adults
- ✓ Lifetime warranty means reassurance for you and your users

FLEX ENRICHEDFOAM ANTIBACTERIAL SOAP

SKU: 3486617

EnrichedFoam refills keep hands safe and doesn't aggravate the skin:

- ✓ Capacity options can deliver up to 3,250 doses per refill
- ✓ Easily installed in dispensers, increasing efficiency
- ✓ Box-free refills reduce the amount of waste a facility creates

INSIGHT

Throughout your facility, in high-traffic areas or at welcome desks, where hand hygiene provisions are needed, but soap, water and paper towels cannot practically be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

WASTE MANAGEMENT

Take control of the waste workflow and create a safe and hygienic environment for all facility users

Slim Jim Range

Our waste containers are a discrete solution for collecting multiple types of user waste in your facility. Closed-lid, foot-operated bins isolate germs and odours while reducing user contact. Smooth surfaces of durable resin are easy to clean between uses.

 **SUSTAINABLE**
Either resin or metal construction that outlasts other products

 **DURABLE**
Longer product life reduces replacement expenditure and improves ROI

 **DEPENDABLE**
Touch-free operation means reduced spread of germs and bacteria

WORKPLACE ESSENTIALS

SLIM JIM STEP-ON CONTAINERS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Hands-free operation of closed-lid waste containers isolates germs, mitigating their spread:

- ✓ Multiple configurations for a wide range of workplace needs
- ✓ Quiet closing action minimises noise
- ✓ A range of colours to integrate with workplace aesthetics

INSIGHT

Bins accumulate unhygienic materials and accordingly are perceived as being unclean. So those bins that isolate waste, minimise contact and don't draw attention to themselves are the ones that unconsciously reassure facility users the most.

SLIM JIM CONFIDENTIAL WASTE CONTAINER

SKU: FG9W2500L

Dispose of sensitive documents with confidence in this secure Slim Jim unit:

- ✓ Locking lid that restricts access to contents
- ✓ Narrow, easy to use paper slot prevents unauthorised entry
- ✓ Moulded handles making emptying simple and efficient

SLIM JIM UNDER COUNTER CONTAINER

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Dispose of work area waste under counters to improve safety and efficiency:

- ✓ Angled opening allows better under counter access than comparable products
- ✓ Multiple moulded grips and handles on the unit make it easily manoeuvrable
- ✓ 49l model compatible with dollies for easy, secure transport

SLIM JIM RECYCLING STATION BUNDLE

SKU: 2057607

Splitting front-of-house waste at the point of disposal, makes it easier to recycle:

- ✓ Colour coding system provides consistent visual cues for staff and students
- ✓ Bag cinches ensure a tighter fit limiting spillages
- ✓ Lids that ensure the right waste in the right receptacle

Visit [loverecycling.com](https://www.loverecycling.com) to find out how you can improve your recycling performance today

INSIGHT

A 2020 commercial recycling study discovered that only a third of schools, colleges or universities in Europe have a formal recycling policy in place, however, 20% are considering implementing one, showing a clear recycling focus for the future. ¹

CLEANING

Whether it's proactive or responsive cleaning, your tools and products must be ready to perform

Microfibre Cleaning

Constructed from a blend of nylon and polyester microfibres, the technology in these products is proven to remove 99.9% of microbes with or without the use of bleach. No matter where or what you use them for, they provide unrivalled performance.

DURABLE

Longer lasting microfibre products that deliver better ROI

DEPENDABLE

Consistent performance across situations and cleaning processes

SUSTAINABLE

Reusable construction lasts longer reducing waste sent to landfills

PROFESSIONAL MICROFIBRE CLOTHS

- RED SKU: 1865827
- GREEN SKU: 1865828
- BLUE SKU: 1865829
- YELLOW SKU: 1865830

Split microfibre with extended durability, these cloths will keep your cleaning operations cost effective.

- ✓ Remove 99% of microbes, whether used with chlorine or water
- ✓ Variety of colours prevents the risk of cross contamination
- ✓ Robust stitching maintains shape throughout a lifetime of use
- ✓ Capable of 250 launders, 100 with chlorine

INSIGHT

Microbes on equipment and surfaces are the food stuff of germs and pathogens. Keeping surfaces as clean as possible requires the removal not just of hazardous organic material, but of the conditions that support their growth as well.

SAFETY

The safety and protection of staff and students should be the top priority for all facility managers

Safety Signage and Barriers

The shortest route to safety is permanent signage around ever-present risks and easily deployed barriers and signs whenever hazards arise. Our safety products use clear, simple language and imagery to indicate the nature of a hazard and the safe distance staff and students should maintain.

VISIBLE

Iconography that illustrates the risk for facility users

DEPENDABLE

Multilingual wording gets the message across to more users

DURABLE

Designed to be long lasting solutions for facilities

MOBILE BARRIER

SKU: FG9S1100YEL

Easy to deploy, store, move, see and use, the mobile barrier is ideal for every situation:

- ✓ Articulating panel extend to a maximum length of 4 meters
- ✓ Situation appropriate deployment: straight, curved or circular
- ✓ Ships fully constructed, ready for use on arrival

INSIGHT

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

TIP

Hand hygiene extends beyond bathroom behaviour. The waste workflow often runs throughout the entirety of a facility and it should be paired with hand hygiene provisions at crucial points. Where soap and water aren't viable, consider hand rubs instead.

TIP

Safety is not just signs and barriers, it's cleaning and waste management too. The U.S. Department of Labour estimates that slips, trips and falls account for 25% of injury claims. Keeping floors clean, dry and free from debris minimises the occurrence of such injuries.

TIP

Create cleaning processes that end with a step focusing on the restocking of carts to maximise efficiency the next time the process restarts. Starting a cleaning process with a full cart, means nothing should be missed as the work is undertaken.

TIP

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

TIP

Whether transporting waste or materials, transportation equipment needs to be bigger than what it is transporting. Equipment overladen with waste or materials, hanging over the edge, present a serious crash or spill hazard to operators and others.

**'ENABLING CONTROL IN YOUR
WASTE MANAGEMENT, CLEANING
AND HYGIENE ENVIRONMENTS'**

The RCP Core Range of products are designed to serve the needs of those that manage educational facilities. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.

The RCP Core Range is available globally, so wherever your facility is located, you can derive the benefits of a product range that has been designed with facilities like yours in mind. Partner with RCP and give your staff and students the very best waste management, safety, cleaning and hygiene experience available.
