

HOSPITALITY CORE RANGE GUIDE

HAND HYGIENE | CLEANING | SAFETY
WASTE MANAGEMENT | MATERIAL HANDLING

OVERCOMING END-TO-END

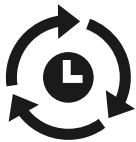

FACILITY CHALLENGES

Hospitality facilities contain a spectrum of environments each with their own cleaning, hygiene and waste management requirements.

Front of house, there are restaurants and bars, gyms and swimming pools, conference rooms and business centres, reception areas and lounges as well as private rooms and other public spaces that bring their own inbuilt challenges.

Back of house, there are kitchens to keep clean and safe, cleaning equipment and product storage areas to maintain efficiently and designated areas for waste to aggregate that must be safely and hygienically managed.

Taking control of this multitude of challenges need not mean buying many different products.

EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

TAILORED SOLUTIONS

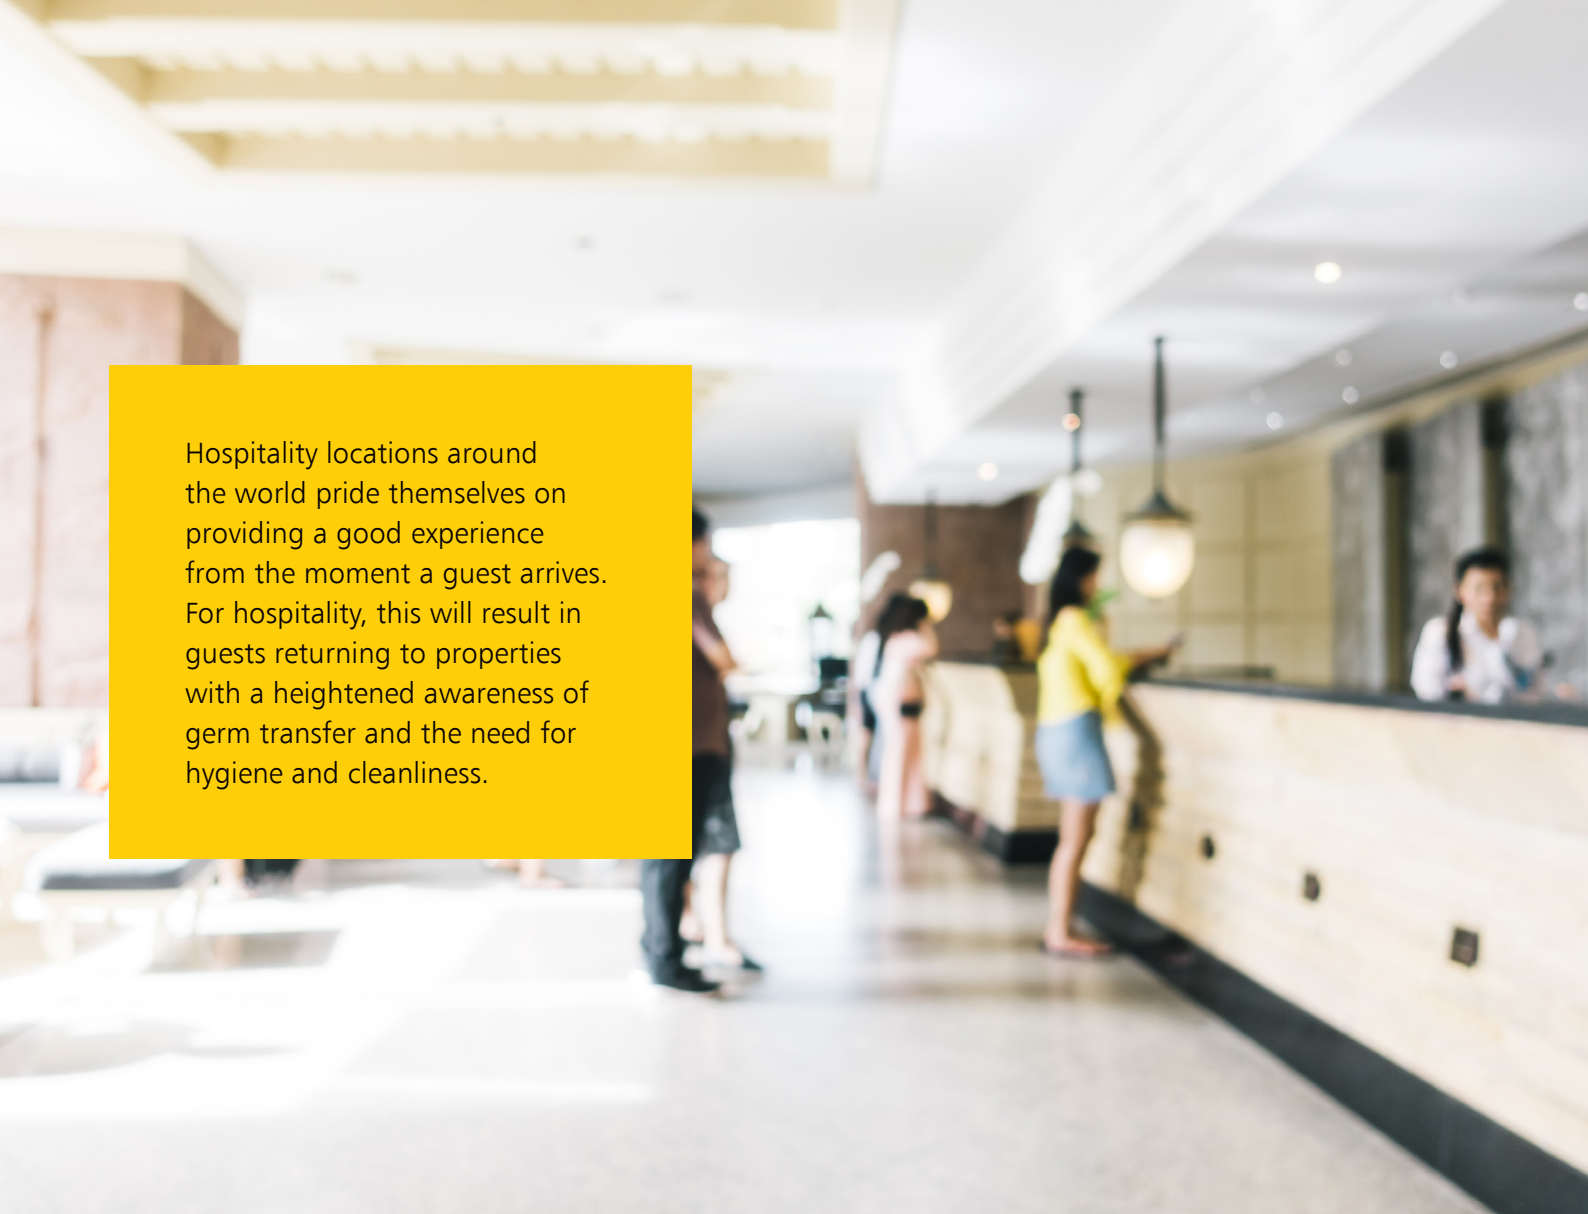

RCP have created a core product range that addresses challenges faced by facilities like yours.

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** for your facility
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

BEST PRACTICE GUIDANCE HAND HYGIENE, CLEANING, WASTE MANAGEMENT AND SAFETY IN HOSPITALITY FACILITIES

The essential guide for all hospitality facilities looking to implement cleaning, hygiene, safety and waste management best practices.

Hospitality locations around the world pride themselves on providing a good experience from the moment a guest arrives. For hospitality, this will result in guests returning to properties with a heightened awareness of germ transfer and the need for hygiene and cleanliness.

TIPS

HAND HYGIENE – Frequent effective handwashing and the use of hand rubs helps prevent the spread of germs and infections.

CLEANING – Regularly cleaning surfaces and floors keeps them free of microbes and prevents the spread of germs.

WASTE MANAGEMENT – Isolating contaminated waste limits the cross-contamination potential.

SAFETY – Keeping a safe distance from one another keeps staff and guests safe.

BEST PRACTICE GUIDANCE

IMPLEMENTING EFFECTIVE PROCEDURES IN ANY HOSPITALITY FACILITY

Institutions such as the World Health Organisation (WHO) and the UK Government provide guidelines to help facilities equip and prepare for a return to full operations. They cover four key areas:

HAND HYGIENE

From the moment a guest comes through the door into reception, staff will need to ensure guests hands stay clean and safe. Important guidance includes:

- Reviewing the provisions in public and staff bathrooms. Updating hand hygiene signage so it is in line with the latest thinking. ¹
- Adapting cleaning schedules to include hand hygiene provisions in rooms. ²
- Allocating each area within a facility (kitchens, bars, reception, laundry, gym, spa etc.) their own hand hygiene supplies for staff and guests. ²

CLEANING

Hospitality facilities have some of the most prominent cleaning procedures of any sector. Cleaning staff are often observed during the working day, however, their role will be different due to the latest guidelines:

- Prior to reopening, undertake a period of ventilation to aerate the rooms on each floor of a property by opening doors, and if possible, windows. ³
- Identify common touchpoints within each area and create an enhanced cleaning policy to ensure they stay clean at all times. ²

WASTE MANAGEMENT

Multiple waste streams are created in a hospitality facility and the staff responsible for waste management cannot allow waste to become a threat. Policies should be updated to incorporate:

- Collecting waste in closed lid bins to isolate germs and prevent contamination. ²
- Cleaning refuse containers between uses to eliminate lingering threats. ²
- Ensuring back-of-house areas have adequate provisions for the safe containment of waste.
- Deploying hand hygiene stations alongside waste collection facilities for staff that are handling waste. ³

SAFETY

Hospitality, by its definition, means welcoming guests and interacting with them. But the return of guests is the time to enforce social distancing, not let it slip.

- Enforce social distancing throughout a property, wherever guests or staff congregate. ⁴
- Mark floors to highlight social distancing wherever queues form and in reception areas. ⁴
- Deploy barriers as part of an area's furniture to guide the movement of guests. ⁴
- Implement protective shielding where face-to-face interaction is unavoidable. ³

TIP |

Clear communication of your procedures for hand hygiene, cleaning, safety and waste management to staff and guests drives adoption and supports lasting behaviour change, and as a result, keeps everyone safe.

THE CLEANING COMPLEXITIES

The products used across your facility need to work within multiple different environments, meet sustainability goals and be commercially viable.

The core of hospitality is welcoming guests to a property, which is often a short-term substitute for home. That experience, the feeling of a home away from home, means exceeding expectations wherever a guest may go.

Though areas of a facility may be different, they have core needs such as regular cleaning, hygiene provisions and waste management. Finding products that perform equally well across these areas can prove difficult but it is essential for taking control of operational and commercial challenges.

The following pages detail the RCP Core Range of product solutions, a set of solutions across multiple categories that are adaptable to the challenges you face without compromising results.

WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that out last and outperform the competition, that save you money, protect your facility's users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S
OPERATIONS, ENSURING HIGHER STANDARDS OF
CLEANING AND SAFER WAYS OF WORKING**

Partnering with us you gain access to a range of product solutions that solve multiple challenges across your facility. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

CORE RANGE PRODUCT CATEGORIES

Our core range is split into six distinct categories. Each contains products that have been developed with the challenges faced by educational facilities in mind.

As you continually try to improve how you meet challenges within your facility, you want to be able to find your way to a solution quickly. Our categorisations help you to do that. By focusing in on function, they provide a quick navigation route to an appropriate solution that works.

HAND HYGIENE

The hand hygiene provisions, hand sanitisers in particular, placed throughout a facility give confidence to guests, visitors and staff that their safety is taken seriously.

WASHROOM

Visibly tackling washroom floors and surfaces, providing quality soap dispensers and refills, collecting waste and eliminating odours is key for the safety and comfort of users.

CLEANING

Every facility faces a different set of cleaning challenges. Cost effective efficiency is possible with the use of cleaning products that deliver under all circumstances.

FOOD SERVICE

Kitchens and canteens must ensure safe preparation and delivery of food as well as thorough cleaning and maintenance of areas where food is consumed.

WASTE MANAGEMENT

Facility management should deploy waste products, such as closed-lid bins, that keep users safe and provide enhanced control over disposal and recycling.

MATERIAL HANDLING

Transporting materials around a hospitality facility requires equipment that ensures staff and guest safety, while protecting contents from damage.

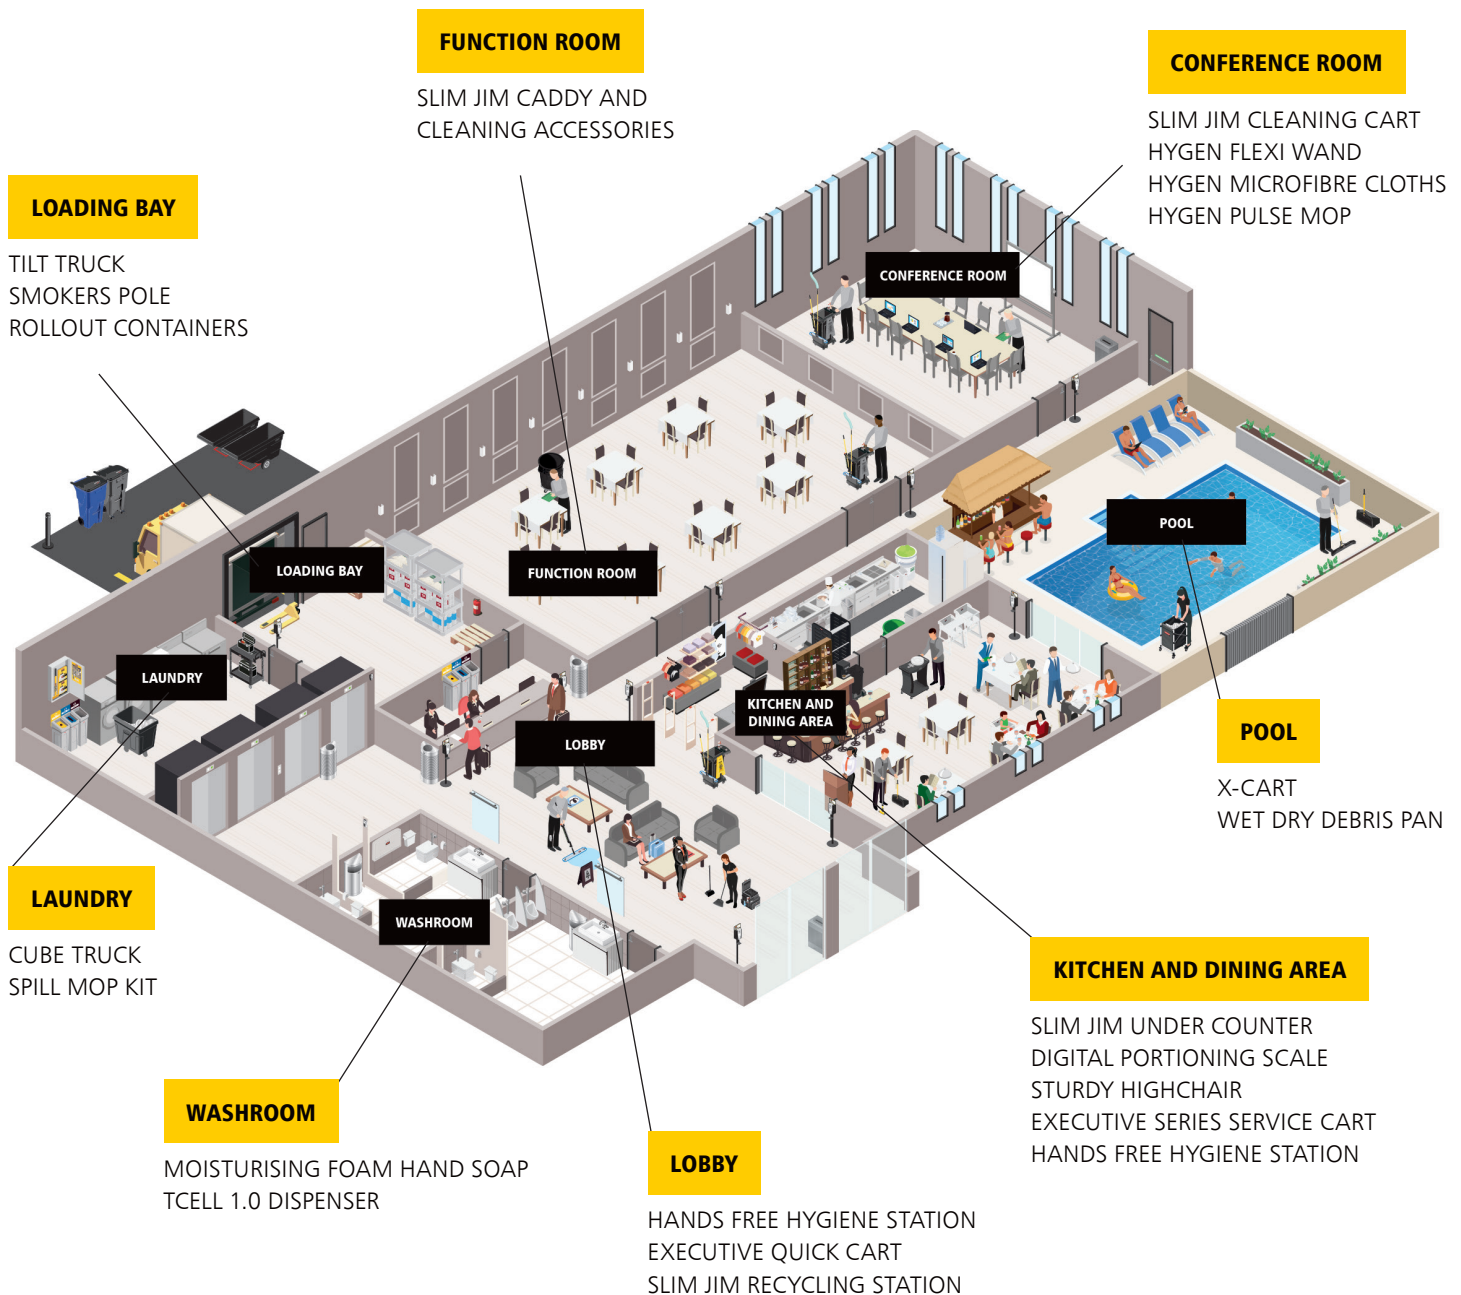

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every facility. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up the management of a modern facility.

IDENTIFYING CHALLENGES

LOBBY AND COMMON AREAS

The different areas front of house all have high foot traffic and require different cleaning, hygiene and waste solutions. Furthermore, these solutions need to strike a balance between the functional and the aesthetic so that guests can see and use them with ease, but their attention is not drawn to them at the expense of the surrounding décor.

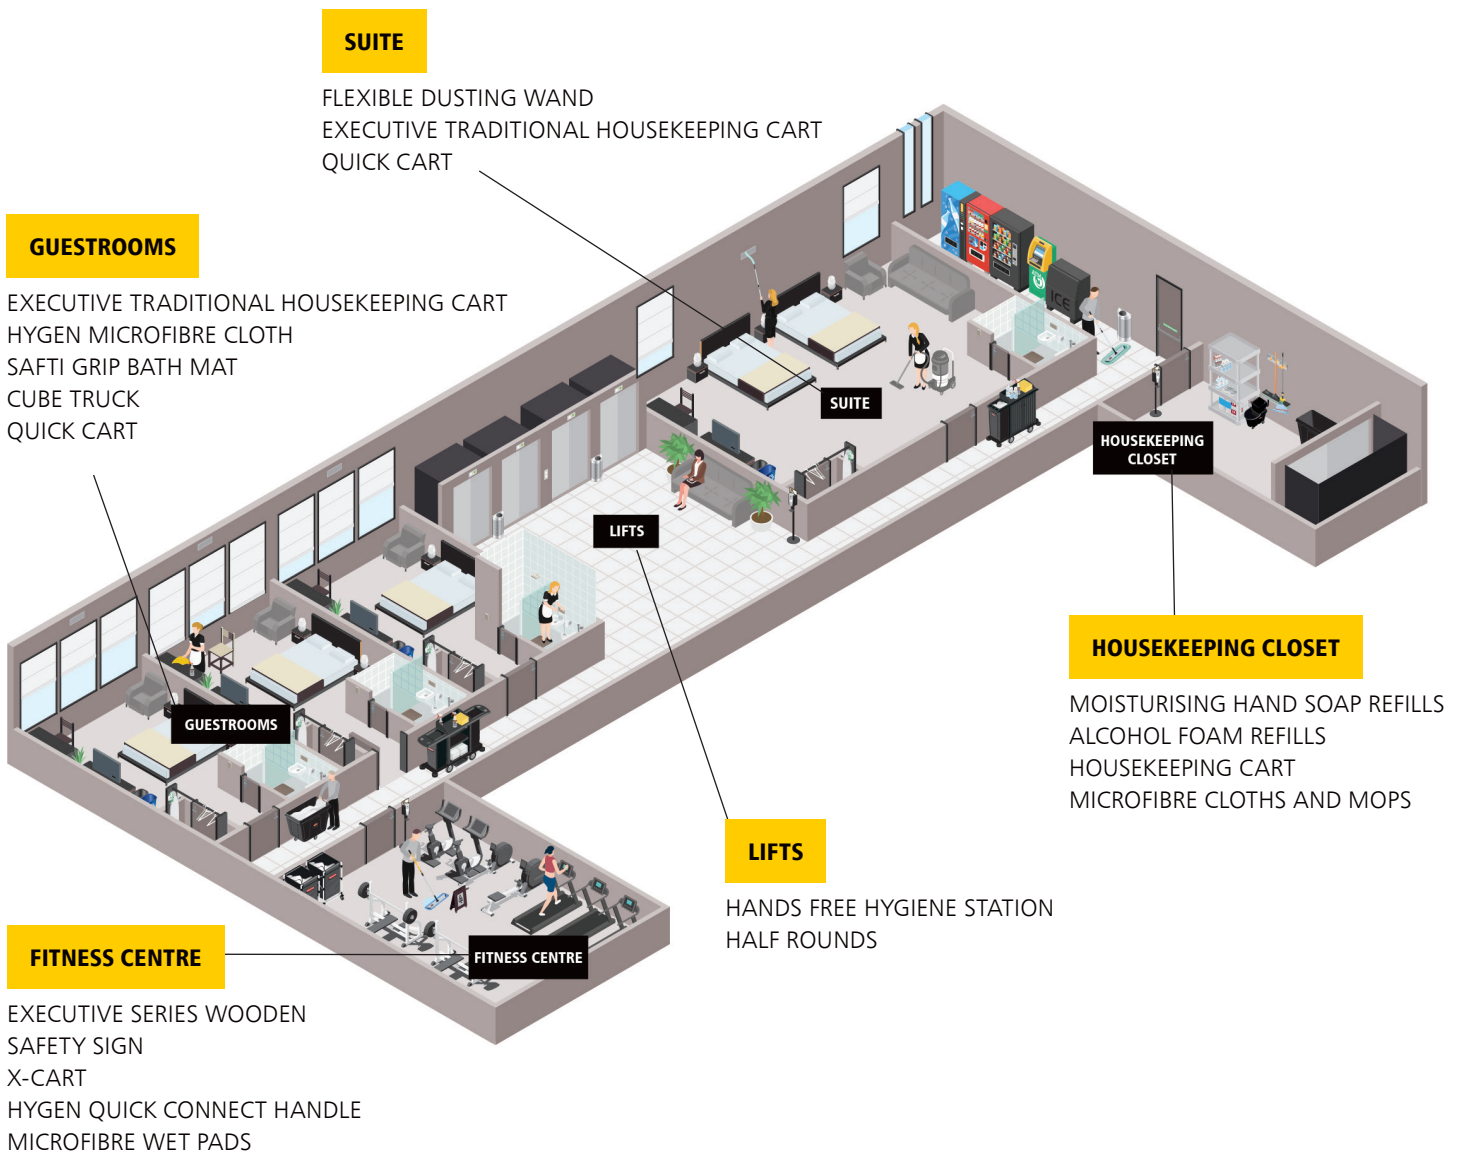

INSIGHT

There is a base level of cleaning activity that takes place in front-of-house areas. You can maximise budget and cleaning efficacy by utilising products that perform equally well under different circumstances.

IDENTIFYING CHALLENGES

GUESTROOMS AND SUITES

Guests have an expectation that rooms and suites will be a comforting space away from home and they expect the highest levels of cleanliness and hygiene. Between rooms in corridors they will expect to see the visible signs of the cleaning processes being undertaken; housekeeping carts well stocked with cleaning products and tools.

INSIGHT

Whether they are in their room or suite, or communal areas such as lobbies and fitness spaces, guests expect exceptional levels of cleaning and hygiene. Visible regular cleaning is a foundational part of delivering that, alongside responsive cleaning products and processes.

HAND HYGIENE

Hand hygiene provisions are essential for users across a facility

The RCP Hand Hygiene System

A hand hygiene focused range of dispensers and refills that ensure clean hands and can be deployed in locations throughout a facility. Hygienic dispensing solutions, sealed lotion and quick dry foam refills along with hand sanitiser mean wherever a dispenser is placed, there is an appropriate refill.

DURABLE

Lifetime warranty gives ongoing protection for your users

CAPABLE

Touch-free operation reduces contamination risk from germs and bacteria

SUSTAINABLE

Refills designed to completely dispense contents to reduce waste

HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411

HANDS FREE HYGIENE STATION SKU: FG750824

A dependable, durable solution that users will interact with every day:

- ✓ High volume system with a wide range of soap or hand sanitiser refill options
- ✓ Up to 3-year battery life, or around 120,000 doses
- ✓ Easy-to-clean surfaces and efficient refill replacement

INSIGHT

The most common transmission point for germs, viruses and other pathogens is through touch, whether that is direct touch or via a third-party surface or shared equipment. Coupling hand hygiene stations with touch free equipment, such as bins, improves hygiene and safety for facility users.

ALCOHOL PLUS HAND SANITISER

SKU: 1869697

A rapid drying foam that controls microorganism growth on the skin

- ✔ Kills 99.99% of many common germs that may be harmful
- ✔ Pleasant to use and clinically proven to maintain hands clean and disinfected
- ✔ With a fast contact time, hands are disinfected within 30 seconds

ALCOHOL-FREE HAND RUB

SKU: 3486613

An EnrichedFoam alcohol-free hand rub that is safe for everyone

- ✔ Ideal for maintaining a high level of hand hygiene in any facility
- ✔ Capacity options can deliver up to 2,500 doses per refill
- ✔ Sealed soap systems eliminate potential contamination points

TABLETOP SANITISER

SKU: 2133271

Mobile sanitising solution that can be used throughout a facility in areas such as receptions, welcome desks and facility entrances to keep hands hygienic:

- ✔ Kills 99.99% of many common germs that may be harmful
- ✔ Dries quickly on the hands with no rinsing required
- ✔ Fully tested and proven to be bactericidal, viricidal and yeasticidal

INSIGHT

Throughout your facility, in high-traffic areas or at welcome desks, where hand hygiene provisions are needed, but soap, water and paper towels cannot practically be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

WASHROOM

The safety and comfort of users is of paramount importance

Skin, Surface and Air Care

When people enter your facility, they are alert for the visible signs of cleaning and hygiene. Nowhere is this more prevalent than in the washrooms of your facility. From the moment they open the door, with that first rush of air, to the moment they leave, their senses will be alert to anything that's out of place.

DURABLE

Products designed and constructed for long life under high use conditions

SUSTAINABLE

Longer product life ensures a lower replacement rate, better ROI and less waste

CAPABLE

Innovative products that deliver a safe and comfortable environment

FLEX

FLEX DISPENSER SKU: 3486591

FLEX ENRICHED FOAM ANTIBACTERIAL SOAP

SKU: 3486617

Deliver hygiene into the hands of washroom users with Flex dispensers:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1 ml) adapt to the needs of staff and visitors
- ✓ Lifetime warranty means reassurance for you and your users

INSIGHT

Washrooms are one of the highest traffic areas within a facility, so the need for effective cleaning processes and hygiene provisions is essential to protect users and give the best impression of your facility.

ENRICHED LOTION ANTIBACTERIAL SOAP

SKU 3486618

A formulation that prevents the growth of microorganisms on the skin:

- ✓ Capacity options can deliver up to 3,250 doses per 1,300 ml refill
- ✓ Ideal for front of house, leisure and food prep areas
- ✓ Pouch system allow full discharge of contents, reducing waste

CLEAN SEAT DISPENSER AND REFILL

DISPENSER SKU: 1853850

REFILL SKU: 1884002

Give users full confidence and control over their experience within washroom cubicles:

- ✓ Allows users certainty their hygiene expectations are being met
- ✓ Formulation is easy to apply and dries quickly on surfaces
- ✓ Removes dirt and debris and eliminates the need for awkward seat covers

TCELL 1.0 AIR CARE DISPENSER AND REFILLS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

TCell 1.0 dispensers are a discreet, but effective, way of ensuring a fresh experience every time:

- ✓ Smooth design is easy-to-clean and operates silently
- ✓ Dispersal from a single unit covers an area of approximately 170m³
- ✓ Easy to fit refills last up to 60 days within a dispenser
- ✓ Sealed refills are not prone to spoilage or contamination

INSIGHT

The first thing a facility user experiences as they open a washroom door is a change in the air around them. Before even seeing a washroom, users are alerted to its odour. Creating an air freshened environment establishes a good first impression.

WASTE MANAGEMENT

Managing multiple streams of waste drives the sustainability success of a facility

Recycling Range

Commercial recycling and ecological responsibility are important factors in consumer choice and are increasingly the subject of legislation. Facilities face practical challenges splitting recycling streams and aesthetic challenges placing units front of house. The RCP Recycling Range combines appearance, customisation and durability to ensure facilities find a solution that works, and one that lasts.

DURABLE

Products built to outlast and outperform traditional products

SUSTAINABLE

Splitting waste streams increases recyclability by preventing cross-contamination

ADAPTABLE

Multiple labelling options and styles allows facility specific customisation

CONFIGURE CONTAINERS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Configure is a multi-unit, multi-capacity, modular recycling solution for high-end facilities:

- ✓ Galvanised steel construction that endures even in high traffic areas
- ✓ Magnetic connections arrange containers into stations or islands that fit available space
- ✓ Secured internal chamber with vented channels for easy waste removal

INSIGHT

Splitting waste streams early in the waste management process is the optimal way to increase the volume of material that can be recycled. Mixed waste streams take longer to process and have lower recycling rates as contaminated waste cannot be processed.

SLIM JIM RECYCLING STATION

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

A straightforward recycling solution to improve sustainability in your facility:

- ✓ Clear markings guide users to dispose of waste correctly
- ✓ Resin construction increases cleaning efficiency between uses
- ✓ Splitting waste ensures it can be kept separate, increasing recyclability

HIDE-A-BAG OPEN TOP WASTEBASKET

SKU: FGWHB14SS

Decorative waste containers with a neat appearance

- ✓ Durable steel construction designed for constant high frequency use
- ✓ Vinyl base ring resists corrosion and protects floors from damage
- ✓ Easy-to-clean smooth surfaced exterior that fits into facility furnishings

SLIM JIM STEP ON FRONT STEP

SKU: 1883552

Slim profile step-on container that is adaptable to the needs of its environment:

- ✓ A closed lid container that safely isolates germs and odours
- ✓ Foot operation eliminates contamination risks associated with hand use
- ✓ Internal lid closure mechanism is quiet and prevents wall damage

INSIGHT

Studying disposable coffee cups, University of Alberta researchers found customers significantly more likely to recycle cups when their names were correctly spelt. A strong component in recycling uptake amongst facility users is connecting identity with responsibility¹

¹ <https://www.theglobeandmail.com/report-on-business/careers/business-education/why-personalized-coffee-cups-get-recycled-more-often/article38055052/>

CLEANING

Throughout a facility, cleaning products need to be effective, efficient and easily deployed

Hospitality and cleaning carts

It used to be true that cleaning carts fell into a blind spot for guests, they knew they were there, but they were behind the scenes. Today, the signs of visible cleaning are important for guests, assuring them that regular cleaning occurs and that hygiene is taken seriously.

DURABLE

Cart construction that is designed to endure rigorous daily use

VISIBLE

Organised space allows the clear storage of cleaning products and tools

SUSTAINABLE

A lasting solution that reduces replacement frequency, increasing ROI

EXECUTIVE HOUSEKEEPING CART

SKU: FG618900BLA

A complete solution that carries products, tools and waste in a single, durable unit:

- ✓ Adjustable shelving allows maximum storage space
- ✓ Lockable swivel casters for total manoeuvrability
- ✓ Optional double bag system that allows waste and laundry collection

INSIGHT

Create cleaning processes that end with a step focusing on the restocking of carts to maximise efficiency the next time the process restarts. Starting a cleaning process with a full cart, means nothing should be missed as the work is undertaken.

WORKPLACE ESSENTIALS

EXECUTIVE QUICK CART

SKU: 1902465

A mobile cart solution that's ideal for housekeeping or janitorial processes:

- ✓ Durable construction endures high usage and Teflon cover repels stains
- ✓ System of internal dividers allows organisation and customisation
- ✓ Ease of mobility with ball-bearing wheels and telescopic handle

LOCKABLE MICROFIBRE CART

SKU: R052001

A secure cart that can be left unattended with confidence:

- ✓ 40% more storage space than traditional housekeeping carts
- ✓ System of grips and hooks allow tool storage and transportation
- ✓ Interchangeable handles and platforms allow for customisation

SLIM JIM CADDY

SKU: 2032940

The Slim Jim Caddy is a compact and durable cleaning and waste trolley:

- ✓ Secure fitting allows tools and cleaning equipment to be safely attached
- ✓ Ergonomic handles give a user complete control and comfort in-use
- ✓ High-grade resin construction provides a longer lifespan

INSIGHT

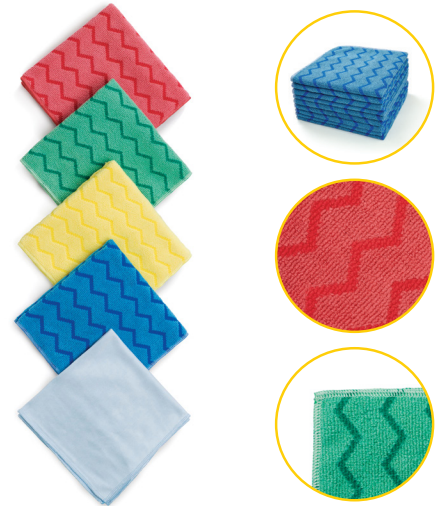

Now, more than ever, the users of a facility are looking for the visible signs of cleanliness and hygiene. Well stocked cleaning carts provide reassurance and indicate to users what cleaning processes are in place, without having to see them performed

HYGEN™ MICROFIBRE CLOTHS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Split blend microfibre with extended durability, these cloths keep your cleaning operations cost effective:

- ✓ Remove 99% of microbes, whether used with chlorine or water
- ✓ Variety of colours prevents the risk of cross contamination
- ✓ Robust stitching maintains shape throughout a lifetime of use
- ✓ Endures 500 standard washes, 250 with chlorine

PULSE MOP WITH SINGLE SIDED FRAME

SKU: FGQ96958YL00

High efficiency cleaning that is time and cost effective:

- ✓ Refillable onboard reservoir for direct cleaning with your preferred solution
- ✓ Clean more square metres in less time
- ✓ Trigger dispenses required amount of cleaning solution with each press

'CLOSED FOR CLEANING' HANGING SIGN

SKU: FG9S1600YEL

Extendable hanging sign that adapts to different doorway widths (up to 112cm max):

- ✓ Multilingual messaging communicates clearly to facility users
- ✓ Rolls up for compact storage and transportation
- ✓ Creates a physical barrier to prevent doorway access during cleaning

INSIGHT

Microbes on equipment and surfaces are the food stuff of germs and pathogens. Keeping surfaces as clean as possible requires the removal not just of hazardous organic material, but of the conditions that support their growth as well.

MATERIAL HANDLING

Bulk transportation of waste, supplies or materials, must be undertaken safely

Laundry collection

The RCP range of collapsible carts are ideal for the collection and transportation of laundry within your facility. Sturdy construction allows higher load capacities and longer length of service, even while enduring high-frequency use.

DURABLE

Steel painted body is designed for endurance under constant use

CAPABLE

Multiple capacity options that can meet your facility's needs

SUSTAINABLE

Long product life reduces replacement frequency

WORKPLACE ESSENTIALS

COLLAPSIBLE FRAME X-CARTS

SKU: 1871644

A durably designed and long-lasting collapsible cart for use throughout a facility:

- ✓ Quiet casters support 150/300 L loads and maintain manoeuvrability
- ✓ Colour coded ribbon system visually indicates contents
- ✓ Robust steel painted frame is easy to clean between uses

INSIGHT

Whether transporting waste or materials, transportation equipment needs to be bigger than what it is transporting. Equipment overlaid with waste or materials, hanging over the edge, present a serious crash or spill hazard to operators and others.

SAFETY

The safety and protection of staff must be the top priority for all facility managers

Executive Safety Signage

The shortest route to safety is permanent signage around ever-present risks and easily deployed barriers and signs wherever hazards may arise. Our safety signs use clear, simple language and imagery to indicate the nature of a hazard and enforce safe distances.

VISIBLE

Elegant signage that illustrates the risk for facility users

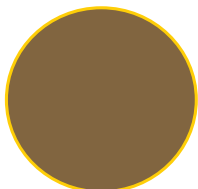

CAPABLE

Multilingual wording gets the message across to more users

DURABLE

Designed to be long lasting solution in high traffic areas

WORKPLACE ESSENTIALS

EXECUTIVE WOODEN MULTILINGUAL 'CAUTION' SIGN

GOLD PANEL SKU: 1867507

SILVER PANEL SKU: 1867508

An easy-to-deploy hardwood caution sign that communicates clearly:

- ✓ Hinged A-Frame with carry handle is easy to transport and deploy
- ✓ Multilingual caution sign communicates effectively to more users
- ✓ Plastic feet protect sign from spillages and wearing damage

INSIGHT

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

TIP

When you have multiple areas within your facility that require different cleaning methodologies, you need to balance needs with budgetary constraint. The best route to cost effectiveness is to deploy products that perform in any environment.

TIP

Safety is not just signs and barriers, it's cleaning too. The U.S. Department of Labour estimates that slips, trips and falls account for 25% of injury claims. Keeping floors clean, dry and free from debris minimises the occurrence of such injuries.

TIP

Along the waste workflow, waste accumulates as it nears the point it is removed from a site. Points where waste is transferred from one receptacle to another are potentially hazardous. Using products designed to interoperate at these points, reduce these risks.

	SMALL PEDAL BIN(WITH PLASTIC LINER)	Ø25.5 X 33.5 CM	1	○ STAINLESS STEEL	FGMST15SSPL

TIP

Bins accumulate unhygienic materials and accordingly are perceived as being unclean. So those bins that isolate waste, minimise contact and don't draw attention to themselves are the ones that unconsciously reassure facility users the most.

TIP

When light enters our eyes, parts of the eye, either the rods or cones, send a message to the brain. Yellow light intensely activates both rods and cones making it highly visible, even amongst colour-blind individuals, ideal for safety signage.

TIP

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

TIP

Containing food waste securely stops the spread of germs and while also isolating the odours that attract vermin. Implementing lidded bins across the waste workflow prevents waste interacting with the air minimising contamination and vermin risks.

**'ENABLING CONTROL IN YOUR
WASTE MANAGEMENT, CLEANING
AND HYGIENE ENVIRONMENTS'**

The RCP Core Range of products are designed to serve the needs of those that manage hospitality facilities. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.

The RCP Core Range is available globally, so wherever your facility is located, you can derive the benefits of a product range that has been designed with facilities like yours in mind. Partner with RCP and give your users the very best waste management, safety, cleaning and hygiene experience available.
