

HEALTHCARE CORE RANGE GUIDE

HAND HYGIENE | CLEANING | SAFETY
WASTE MANAGEMENT | MATERIAL HANDLING

COMPLEX PROBLEM SOLVING FOR HEALTHCARE FACILITIES

Throughout a healthcare facility there are differing areas of risk for different facility users.

So, whether it's a hospital or a care home, a pharmacy or a local doctor's surgery, the cleaning, hygiene and waste management processes and provisions must deliver outstanding standards for patients, staff and visitors. The hygiene needs of a dentistry office differ to those of a blood donation facility. Cleaning processes in healthcare facilities, across clinical, public and staff only areas, take in a broad range requirements that must be managed in a way that mitigates risk.

Managing these requirements can be cost prohibitive when using a dedicated set of products in each area. RCP product solutions are designed to tackle multiple problems, under different conditions, across healthcare facilities.

EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

TAILORED SOLUTIONS

RCP have created a core product range that addresses challenges faced by facilities like yours.

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** for your facility
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

BEST PRACTICE GUIDANCE

HAND HYGIENE, CLEANING, WASTE MANAGEMENT AND SAFETY IN HEALTHCARE FACILITIES

The essential guide for all healthcare facilities looking to implement cleaning, hygiene, safety and waste management best practices.

Healthcare facilities have been on the battlefield with COVID-19 since the pandemic began. They have done a remarkable job in caring for and treating so many patients. Part of their diligent work has been maximising infection prevention with protocols such as hand hygiene, PPE use, waste management and extensive cleaning.

As staff, patients and visitors become increasingly aware of the importance of these procedures, healthcare facilities should look to incorporate further best practice guidance to ensure their protocols remains effective at fighting the spread of infection.

TIPS

HAND HYGIENE – Frequent effective handwashing and the use of hand rubs helps prevent the spread of germs and infections.

CLEANING – Regularly cleaning surfaces and floors keeps them free of microbes and prevents the spread of germs.

WASTE MANAGEMENT – Isolating contaminated waste limits the cross-contamination potential.

SAFETY – Keeping a safe distance from one another keeps staff, patients and visitors safe.

BEST PRACTICE GUIDANCE

IMPLEMENTING EFFECTIVE PROCEDURES IN ANY HEALTHCARE FACILITY

Institutions such as the European Centre for Disease Prevention and Control (ECDC) and the World Health Organisation (WHO) provide guidelines to help facilities equip and prepare for a return to full operations. They cover four key areas:

HAND HYGIENE

With three groups to protect; patients, visitors and staff, healthcare facilities must incorporate hand hygiene guidance into every part of their protocols.

- Regularly wash hands thoroughly and after specific triggers like removing PPE or gloves. ²
- Use the WHO's 5 Moments guidance to identify optimal hand hygiene station placement. ²

CLEANING

With multiple paths to contamination, and unpredictable scenarios part of the norm, healthcare facilities need to keep surfaces and equipment as clean as possible at all times.

- Cleaning procedures should start and end with fully stocked carts of cleaning equipment. ¹
- Cross-contamination risk should be minimised with disposable single-use products, such as cloths and mop pads. ³
- Decrease the risk of cross contamination further by cleaning each area with at least two mop pads and two cloths. ¹
- Enhance cleaning policies with walkthroughs identifying contamination touchpoints (handles, buttons, bars, etc.) ¹

WASTE MANAGEMENT

Some of the most hazardous waste is created at a healthcare facility. In order to prevent waste becoming a threat, facilities should implement the following guidance:

- Disposing of waste produced during cleaning processes at the end of each process with sealed containers. ³
- Treating cleaning waste with the same level of caution that is afforded to clinical waste. ³

SAFETY

Almost every part of a healthcare facility has the potential to be a high-traffic area. Facility staff need to ensure that every area adheres to social distancing wherever possible.

- Ensure areas have appropriate indications of safe distances, either through floor markings, using tape or another material, or the placement of furniture. ³
- Maintain safe social distances with one-way systems to guide traffic using appropriate signage and barriers. ³

TIP |

Clear communication of your procedures for hand hygiene, cleaning, safety and waste management to staff, patients and visitors drives compliance and supports lasting behaviour change, which as a result, keeps everyone safe.

THE CLEANING COMPLEXITIES

Unlike other sectors, the hygiene, cleaning and waste management of a healthcare facility carries with it set cleaning and hygiene processes, as well as a need to respond effectively and efficiently to unpredictable situations and hazards.

Cleaning and hygiene processes vary throughout a healthcare facility, so product solutions that play a part in this process are most useful when they can perform consistently under different circumstances. Products used to respond to hygiene, cleaning or waste emergencies need to be easy to deploy so they can be immediately effective.

The following pages contain a core range of product solutions that are effective, durable and sustainable. They provide high quality results across a long use life, protecting your patients, visitors and staff in a commercially viable way.

WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that out last and outperform the competition, that save you money, protect your facility's users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S
OPERATIONS, ENSURING HIGHER STANDARDS OF
CLEANING AND SAFER WAYS OF WORKING**

Partnering with us you gain access to a range of product solutions that solve multiple challenges across your facility. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

CORE RANGE PRODUCT CATEGORIES

Our core range is split into six distinct categories. Each contains products that have been developed with the challenges faced by healthcare facilities in mind.

As you continually try to improve how you meet challenges within your facility, you want to be able to find your way to a solution quickly. Our categorisations help you to do that. By focusing in on function, they provide a quick navigation route to an appropriate solution that works.

HAND HYGIENE

Healthcare facilities require a variety of flexible solutions for both hand sanitising and washing to ensure staff, patients and visitors have access at all times.

WASTE MANAGEMENT

Facilities should deploy closed lid bins and recycling stations to ensure all waste, including contaminated waste, is separated and managed effectively.

MATERIAL HANDLING

Transporting materials through a healthcare facility requires equipment that ensure staff, patient and visitor safety, whether the contents are laundry, waste or other materials.

CLEANING

Every healthcare facility faces a diverse set of cleaning challenges. The highest standards and cost efficiency are possible with the use of cleaning products that deliver under any circumstances.

SAFETY

Within a healthcare facility, safety is paramount. Where hazards occur, or risk is increased, staff must use clear signage and durable barriers to warn and protect facility users.

FOOD SERVICE

Kitchens must ensure hygienic preparation areas and deliver food safely to both dining and patient areas alongside thorough cleaning of preparation and dining areas.

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every facility. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up the management of a modern facility.

IDENTIFYING CHALLENGES

PATIENT CARE AREAS

At every turn within a healthcare facility there are cleaning, hygiene and waste management challenges that left unchecked can become hazardous. This, coupled with the need for responsive cleaning, means every area of a facility should be well stocked to maintain standards and adapt to the unexpected.

ACCIDENT AND EMERGENCY

BRUTE ROLLOUT CONTAINER

BIOHAZARD SPILL MOP KIT
DISPOSABLE WET MOP PADS

RADIOLOGY

EXECUTIVE SERIES CARTS
HANDS FREE HYGIENE STATION

NURSE'S STATION

PUMP TOP GEL HAND SANITISER
DEFENDER WASTE CONTAINER

INSIGHT 

More than any other kind of facility, the floors and surfaces of healthcare environments are the subject of rigorous regular and responsive cleaning processes. Cleaning carts need to be well stocked at the start of every round and responsive cleaning tools should be well situated and easily deployed.

IDENTIFYING CHALLENGES

NON-CLINICAL AREAS

INSIGHT

The many types of waste created within a healthcare facility all have different needs in terms of storage and disposal. From discarded food waste to dangerous clinical waste such as sharps and dressings, closed lid bins that isolate germs and odours, along with other risks, keep facility users safe.

HAND HYGIENE

Preventing the spread of Healthcare Associated Infections (HCAIs)

The RCP Hand Hygiene System

A range of dispensers and refills that ensure clean hands. Dispensers can be securely wall mounted or free standing, making them suitable for all types of healthcare. Hygienic dispensing solutions, sealed refills of lotion and foam soaps and hand sanitiser mean wherever a dispenser is placed, there is an appropriate refill.

DURABLE

Lifetime warranty gives ongoing protection for your users

CAPABLE

Touch-free operation reduces contamination risk from germs and bacteria

SUSTAINABLE

Refill indicators eliminate wastage and maximise ROI

HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411
HANDS FREE HYGIENE STATION SKU: FG750824

A dependable, durable solution that users will interact with every day:

- ✓ High volume system with a wide range of soap or hand sanitiser refill options
- ✓ Up to 3-year battery life, or around 120,000 doses
- ✓ Easy-to-clean surfaces and efficient refill replacement

INSIGHT

Bulk refill soap dispensers are more prone to bacterial contamination and can be transmission points for illness within your facility. Those risks can be mitigated with sealed refill systems that do not expose their contents to cross-contamination risks during refill.

ALCOHOL PLUS HAND SANITISER

SKU: 1869697

A rapid drying foam that controls microorganism growth on the skin

- ✓ Kills 99.99% of many common germs that may be harmful
- ✓ Pleasant to use and clinical proven to maintain hands clean and disinfected
- ✓ With a fast contact time, hands are disinfected within 30 seconds

FLEX DISPENSER

SKU: 3486591

Deliver hygiene into the hands of bathroom users with Flex dispensers with their antimicrobial handle:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1 ml) adapt to the needs of children and adults
- ✓ Antimicrobial pushbar, protected with BioMaster technology
- ✓ Lifetime warranty means reassurance for you and your users

TABLETOP SANITISER

SKU: 2133271

Mobile sanitising solution that can be used throughout a facility in areas such as receptions, welcome desks and facility entrances to keep hands hygienic:

- ✓ Kills 99.99 % of many common germs that may be harmful
- ✓ Dries quickly on the hands with no rinsing required
- ✓ Fully tested and proven to be bactericidal, viricidal and yeasticidal

INSIGHT

Throughout your facility, in high-traffic areas or at nurse's stations, where hand hygiene provisions are needed, but soap, water and paper towels cannot practically be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

WASTE MANAGEMENT

Securely collecting and transporting waste keeps staff, patients and visitors safe

Waste Containment

For every different healthcare environment such as pharmacies, wards, mental and sexual health clinics or veterinarian practices, there are different kinds of specialised waste. What all this diverse waste has in common is that it needs to be securely, safely and reliably contained.

DURABLE

Longer lasting steel construction that reduces replacement frequency, increasing ROI

DEPENDABLE

Consistent performance no matter what type of healthcare facility they're deployed in

SUSTAINABLE

Solid construction that outlasts traditional waste disposal methods

DEFENDERS®

WHITE SKU: FGST12EPLWH

RED SKU: FGST40EPLRD

STEEL SKU: FGST40SSPL

Sturdy foot operated waste container that isolates germs and odours:

- ✓ Easy-to-clean smooth surfaces allows for easy regular cleaning
- ✓ Hands-free operation reduces touchpoint cross- contamination risks
- ✓ Leakproof plastic liner contains liquid and prevents spills

INSIGHT

Along the waste workflow, waste accumulates as it nears the point it is removed from a site. Points where waste is transferred from one receptacle to another are potentially hazardous. Using products designed to work together at these points, reduces the risk.

SLIM JIM STEP-ON CONTAINERS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Hands-free operation of closed-lid waste containers isolates germs, reducing contamination risks:

- ✓ Multiple configurations for a wide range of workplace needs
- ✓ Quiet closing action minimises noise
- ✓ A range of colours ensure appropriate waste disposal
- ✓ PPE stickers available to ensure safe disposal of gloves, gowns and masks

SLIM JIM WITH VENTING CHANNELS

SKU: 1956187

Large capacity waste collection units that contain waste effectively:

- ✓ Venting channels and cinches for ergonomic bag changes
- ✓ Quiet closing action minimises noise
- ✓ Multiple colour options to ensure appropriate waste disposal

SLIM JIM RECYCLING STATION

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

A straightforward recycling solution to improve sustainability in your facility:

- ✓ Clear markings guide users to dispose of waste correctly
- ✓ Resin construction increases cleaning efficiency between uses
- ✓ Splitting waste ensures it can be kept separate, increasing recyclability

INSIGHT

Bins accumulate unhygienic materials and accordingly are perceived as being unclean. So those bins that isolate waste, minimise contact and don't draw attention to themselves are the ones that unconsciously reassure facility users the most.

CLEANING

Keeping surfaces and kitchens clean reduces the risk for staff and diners

Microfibre Cleaning

Constructed from a blend of nylon and polyester microfibres, the technology in these products is proven to remove 99.9% of microbes with or without the use of chlorine. No matter where or what you use them for, they provide unrivalled performance.

DURABLE

Longer lasting microfibre products that deliver better ROI

DEPENDABLE

Consistent performance across situations and cleaning processes

SUSTAINABLE

Reusable construction lasts longer reducing waste sent to landfills

HYGEN™ MICROFIBRE CLOTH

RED SKU: R050652

GREEN SKU: R050653

BLUE SKU: FGQ63000BL00

YELLOW SKU: FGQ62088YL00

Microfibre cloths with built-in scrubbing technology that removes debris, dirt and dust:

- ✓ Remove 99% of microbes, whether used with chlorine or water
- ✓ Variety of colours prevents the risk of cross contamination
- ✓ Robust stitching maintains shape throughout a lifetime of use
- ✓ Capable of 500 launders, 250 with chlorine

INSIGHT

Microbes on equipment and surfaces are the food stuff of germs and pathogens. Keeping surfaces as clean as possible requires the removal not just of hazardous organic material, but of the conditions that support their growth as well.

HYGEN™ MICROFIBRE MOPS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Industry-best premium disposable and reusable microfibre mopping performance:

- ✓ Greater surface contact cleans more of the floor first time
- ✓ Zig-zag technology removes more microbes than conventional products
- ✓ Reusable for a minimum of 500 launders (250 with chlorine)

PULSE MOP WITH SINGLE SIDED FRAME

SKU: FGQ96958YL00

High efficiency cleaning that is time and cost effective:

- ✓ Refillable onboard reservoir for direct cleaning with your preferred solution
- ✓ Clean more square metres in less time
- ✓ Reduces water and chemical waste

SLIM JIM CLEANING TROLLEY WITH PULSE MOP CLIP

SKU: 2110167

A functional system that combines waste collection and cleaning:

- ✓ A configurable system of hooks and grippers holds cleaning tools and signs
- ✓ Slim profile improves manoeuvrability in confined spaces
- ✓ Compatible with all HYGEN tools and PULSE mops

INSIGHT

Now, more than ever, the users of a facility are looking for the visible signs of cleanliness and hygiene. Well stocked cleaning carts provide reassurance and indicate to users what cleaning processes are in place, without having to see them performed.

MATERIAL HANDLING

Collecting, processing and redistributing laundry requires slid, dependable, transportation

Laundry & Waste Trucks

Whether it's doctor scrubs, staff uniforms, patient bedding or reusable cleaning provisions, laundry is a key component within a healthcare facility. Transporting laundry, soiled and fresh, is required to be both safe and efficient. Similarly, waste generated around a facility needs to be collected and transported in a way that minimises risk.

DURABLE

Solid construction that contains laundry and endures constant use

CAPABLE

High capacity volumes and sturdy casters make transport efficient and safe

SUSTAINABLE

Long product life reduces the frequency of truck replacement

COLLAPSIBLE FRAME X-CART

300 LTR SKU: 1871644, COVER FOR COLLAPSIBLE X-CART SKU: 1889863

Durably developed and designed foldable carts offer long-lasting performance:

- ✓ Powder coated, rust resistant frame endures high frequency usage
- ✓ Colour coded ribbons help identify soiled or contaminated waste at a glance
- ✓ Manoeuvrable casters and bumper guards ensure safe and easy movement

MEGA BRUTE MOBILE COLLECTOR

SKU: FG9W7300BLA, MEGA BRUTE LID SKU: FG9W7200BLA

A highly manoeuvrable, high capacity (450ltr) waste and linen collection system:

- ✓ Hinged barn doors for easy emptying
- ✓ Integral caddy to hold cleaning supplies
- ✓ Accessorise with 87ltr Slim Jim for additional waste stream sorting
- ✓ Optional hinged lid fully covers internal waste

INSIGHT

Whether transporting waste or materials, transportation equipment needs to be bigger than what it contains. Equipment overladen with waste or materials present a serious crash or spill hazard to operators and others.

TIP

Hand hygiene extends beyond bathroom behaviour. The waste workflow often runs throughout the entirety of a facility and it should be paired with hand hygiene provisions at crucial points. Where soap and water aren't viable, consider hand rubs instead.

TIP

Containing food waste securely stops the spread of germs and while also isolating the odours that attract vermin. Implementing lidded bins across the waste workflow prevents waste interacting with the air minimising contamination and vermin risks.

**'ENABLING CONTROL IN YOUR
WASTE MANAGEMENT, CLEANING
AND HYGIENE ENVIRONMENTS'**

The RCP Core Range of products are designed to serve the needs of those that manage healthcare facilities. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.

The RCP Core Range is available globally, so wherever your facility is located, you can derive the benefits of a product range that has been designed with facilities like yours in mind. Partner with RCP and give your users the very best waste management, safety, cleaning and hygiene experience available.
