

RETAIL CORE RANGE GUIDE

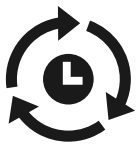

HAND HYGIENE | CLEANING | SAFETY
WASTE MANAGEMENT | MATERIAL HANDLING

THE COMPLEXITY OF RETAIL FACILITY MANAGEMENT

The end-to-end management of a retail facility presents a variety of cleaning, hygiene and waste management challenges.

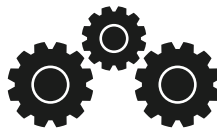

Retail facility management needs to attend to high-footfall front of house areas that must be kept clean and hygienic at all times, as well as back of house areas where goods are stored and transported safely alongside designated areas where waste accumulates prior to being moved off site. In managing these differing environments, not only must consideration be given to health and safety, but to sustainability and commercial viability.

Finding product solutions that work in multiple situations across a facility are key to improving efficiency and return on investment (ROI).

EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

TAILORED SOLUTIONS

RCP have created a core product range that addresses the challenges faced by facilities like yours.

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** for your facility
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

BEST PRACTICE GUIDANCE

HAND HYGIENE, CLEANING, WASTE MANAGEMENT AND SAFETY IN RETAIL FACILITIES

The essential guide for all retail facilities looking to implement cleaning, hygiene, safety and waste management best practices.

Retail facilities, no matter what they sell, have one thing in common; presentation. Customers don't want to shop in stores they deem unhygienic.

They will now need to consider new health and safety measures, such as social distancing and hand hygiene, for both staff and customers.

TIPS

HAND HYGIENE – Frequent effective handwashing and the use of hand rubs helps prevent the spread of germs and infections.

CLEANING – Regularly cleaning surfaces and floors keeps them free of microbes and prevents the spread of germs.

WASTE MANAGEMENT – Isolating contaminated waste limits the cross-contamination potential.

SAFETY – Keeping a safe distance from one another keeps staff and customers safe.

BEST PRACTICE GUIDANCE

IMPLEMENTING EFFECTIVE PROCEDURES IN ANY RETAIL FACILITY

Institutions such as the International Labour Organisation (ILO) and the European Centre for Disease Prevention and Control (ECDC) provide guidelines to help facilities equip and prepare for a return to full operations. They cover four key areas:

HAND HYGIENE

With stock on shelves and across floor spaces, hand contact is inevitable. Retail facilities must account for hand hygiene in the following ways:

- Prior to reopening, audit signage in staff and customer bathrooms. Now is the time to update guidance.²
- Install hand hygiene stations at entrances and on shop floors to show customers their hygiene concerns are taken seriously.²

CLEANING

Retail facilities must take every opportunity to keep every part of a store clean. Enhanced cleaning measures should be formulated with the following in mind:

- Stocking disposable wipes, cloths and tissues in easy reach alongside safe disposal methods.³
- Limiting opening hours to ensure that all areas of a store can be sanitised thoroughly.⁴
- When restocking occurs, take the opportunity to disinfect touchpoints, shelves, display units, doors and stands.⁴

WASTE MANAGEMENT

Retail stores accumulate waste front and back-of-house. All of which must be safely disposed of and with consideration for the following guidance:

- Collected waste, created as a result of cleaning processes, should be treated as hazardous.³
- Thoroughly clean all waste receptacles each time they are emptied to eliminate lingering threats.³
- Utilise disposable single-use cloths and mop pads throughout the facility to minimise contamination risks.³

SAFETY

Retail stores are places where people congregate. Facilities reopening is not the time to relax social distancing, but to maximise it with measures such as:

- Placing protection, acrylic panels or barriers, throughout the facility.⁴
- Imposing restrictions on the number of customers in a store at any one time.⁴
- Issuing staff personal protective equipment and ensure training in proper use and disposal occurs at the same time.⁴

TIP |

Clear communication of your procedures for hand hygiene, cleaning, safety and waste management drives adoption of those procedures, and as a result, keeps everyone safe.

A CLEAN AND SAFE ENVIRONMENT

FOR CUSTOMERS AND STAFF

Your cleaning, hygiene and waste management products need to suit a variety of uses and environments in a way that is sustainable and commercially viable.

The public areas of a retail facility are where businesses and consumers interact at zero distance. In recent years, consumer focus on commercial sustainability has increased, as has hygiene and cleanliness awareness. This means visible cleaning is now more important than ever. Back of house storage areas need to be safe and areas where waste accumulates must be kept organised, clean and hygienic, as must staff rooms, canteens and washrooms.

The multi-category core RCP range of durable, sustainable, end-to-end product solutions gives you control over the cleaning, hygiene and waste management challenges you face.

WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that out last and outperform the competition, that save you money, protect your facility's users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S
OPERATIONS, ENSURING HIGHER STANDARDS OF
CLEANING AND SAFER WAYS OF WORKING**

Partnering with us you gain access to a range of product solutions that solve multiple challenges across your facility. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

CORE RANGE PRODUCT CATEGORIES

Our core range is split into six distinct categories. Each contains products that have been developed with the challenges faced by retail facilities in mind.

As you continually try to improve how you meet challenges within your facility, you want to be able to find your way to a solution quickly. Our product categories help you to do that. By focusing in on function, they provide a quick navigation route to an appropriate solution that works.

HAND HYGIENE

Retail facilities need visible front of house hand hygiene solutions that eliminate the risks for users and provide management staff with piece of mind.

WASHROOM

Visibly tackling surface germs and grime, providing hand washing facilities, collecting waste and eliminating odours in washrooms is key for user safety and comfort.

CLEANING

Every facility faces a different set of cleaning challenges. Cost effective efficiency is possible with the use of cleaning products that deliver under all circumstances.

SAFETY

Within a retail facility, safety is paramount. Where hazards occur, management must use clear signage and barriers. Deployable barriers also facilitate social distancing.

WASTE MANAGEMENT

Waste products should be deployed where appropriate to capture potentially contaminated waste and separate streams for recycling and disposal purposes.

MATERIAL HANDLING

Transporting materials through a retail facility requires equipment that ensures staff and customer safety, while protecting contents from damage.

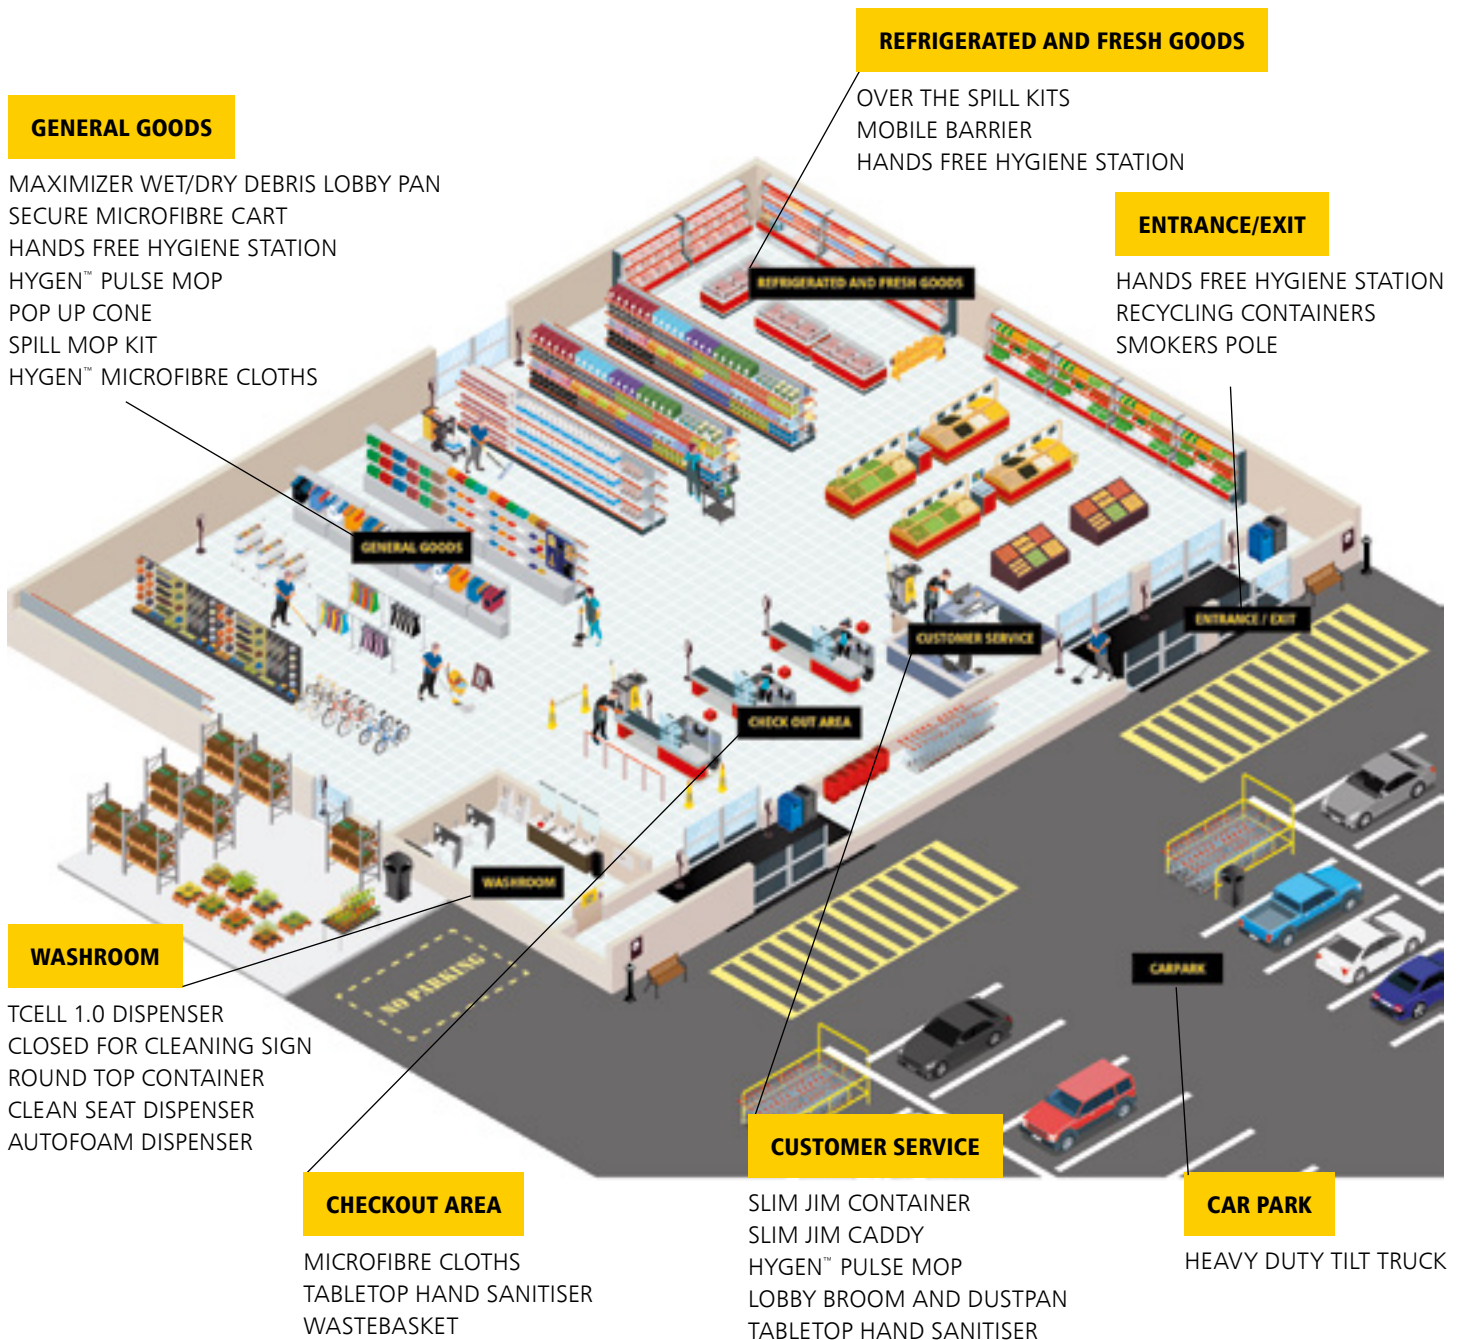

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every facility. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up the management of a modern facility.

IDENTIFYING CHALLENGES

CUSTOMER FACING AREAS

Consumers that enter your facility will be alert to the cleanliness of shelves and surfaces as well as any hand hygiene provisions throughout the store. Where spills occur, or cleaning is required during opening hours, easily deployed visible signage reduces the risk to consumers. Additionally, durable barriers can enforce a safe distance from hazards and any social distancing policy that is in place.

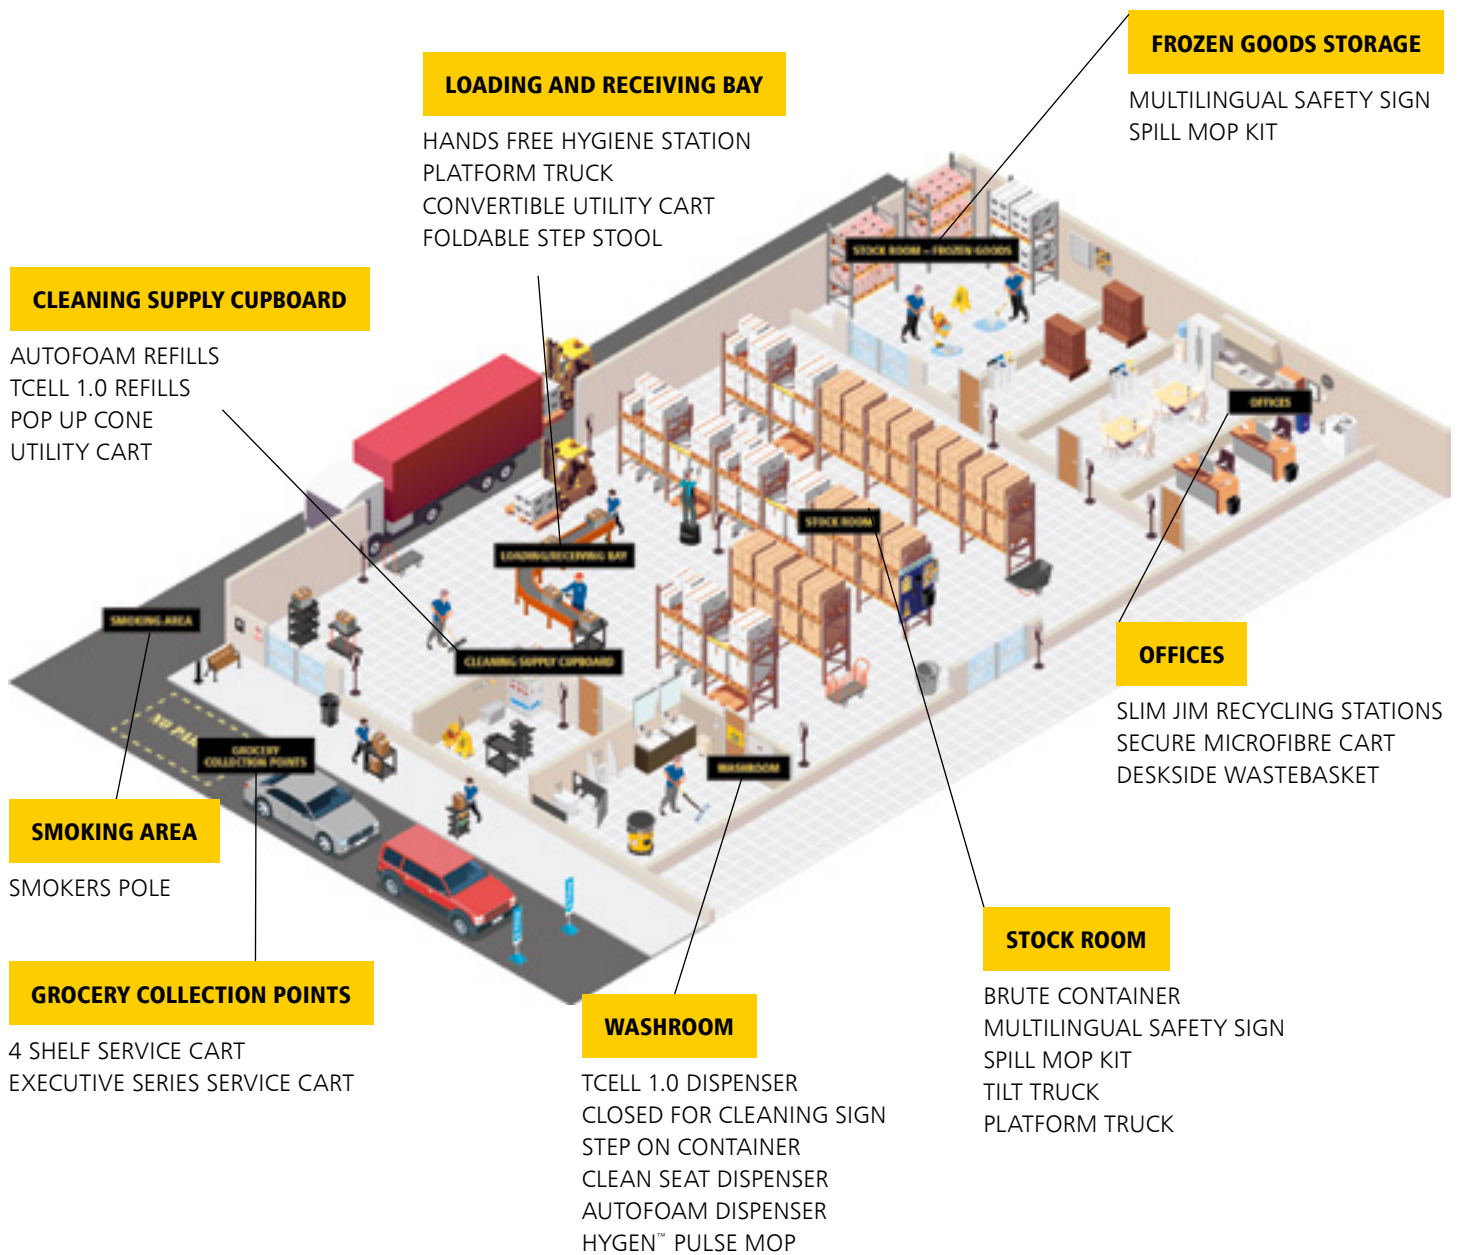

INSIGHT

There is a base level of cleaning activity that takes place in front-of-house areas. You can maximise budget and cleaning efficacy by utilising products that perform equally well under different circumstances.

IDENTIFYING CHALLENGES

LOADING AND STORAGE

The safe and efficient running of back of house areas in retail facilities is dependent on exemplary equipment and well-defined processes. Loading and storage areas see general high traffic so regular cleaning is essential, and when responsive cleaning is required for a spill or other hazard, good quality durable equipment that's easy to deploy is a key factor in minimising risk.

INSIGHT

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

HAND HYGIENE

Hand hygiene provisions are essential for users across a facility

The RCP Hand Hygiene System

A hand hygiene focused range of dispensers and refills that ensure clean hands and can be deployed in locations throughout a facility. Hygienic dispensing solutions, sealed lotion and quick dry foam refills along with hand sanitiser mean wherever a dispenser is placed, there is an appropriate refill.

DURABLE

Lifetime warranty gives ongoing protection for your users

CAPABLE

Touch-free operation reduces contamination risk from germs and bacteria

SUSTAINABLE

Refills designed to completely dispense contents to reduce waste

HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411

HANDS FREE HYGIENE STATION SKU: FG750824

A dependable, durable solution that users will interact with every day:

- ✓ High volume system with a wide range of soap or hand sanitiser refill options
- ✓ Up to 3-year battery life, or around 120,000 doses
- ✓ Easy-to-clean surfaces and efficient refill replacement

INSIGHT

The most common transmission point for germs, viruses and other pathogens is through touch, whether that is direct touch or via a third-party surface or shared equipment. Coupling hand hygiene stations with touch free equipment, such as bins, improves hygiene and safety for facility users.

ALCOHOL PLUS HAND SANITISER

SKU: 1869697

A rapid drying foam that controls microorganism growth on the skin

- ✓ Kills 99.99% of many common germs that may be harmful
- ✓ Pleasant to use and clinically proven to maintain hands clean and disinfected
- ✓ With a fast contact time, hands are disinfected within 30 seconds

ALCOHOL-FREE HAND RUB

SKU: 3486613

An EnrichedFoam alcohol-free hand rub that is safe for everyone

- ✓ Ideal for maintaining a high level of hand hygiene in any facility
- ✓ Capacity options can deliver up to 2,500 doses per refill
- ✓ Sealed soap systems eliminate potential contamination points

TABLETOP SANITISER

SKU: 2133271

Mobile sanitising solution that can be used throughout a facility in areas such as receptions, welcome desks and facility entrances to keep hands hygienic:

- ✓ Kills 99.99% of many common germs that may be harmful
- ✓ Dries quickly on the hands with no rinsing required
- ✓ Fully tested and proven to be bactericidal, viricidal and yeasticidal

INSIGHT

Throughout your facility, in high-traffic areas or at customer service desks, where hand hygiene provisions are needed, but soap, water and paper towels cannot practically be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

WASHROOM

The safety and comfort of users is of paramount importance

Skin, Surface and Air Care

When people enter your facility, they are alert for the visible signs of cleaning and hygiene. Nowhere is this more prevalent than in the washrooms of your facility. From the moment they open the door, with that first rush of air, to the moment they leave, their senses will be alert to anything that's out of place.

DURABLE

Products designed and constructed for long life under high use conditions

SUSTAINABLE

Longer product life ensures a lower replacement rate, better ROI and less waste

CAPABLE

Innovative products that deliver a safe and comfortable environment

FLEX

FLEX DISPENSER SKU: 3486591

FLEX ENRICHEDFOAM ANTIBACTERIAL SOAP
SKU: 3486617

Deliver hygiene into the hands of washroom users with Flex dispensers:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1ml) adapt to the needs of staff and visitors
- ✓ Lifetime warranty means reassurance for you and your users

INSIGHT

The first thing a facility user experiences as they open a washroom door is a change in the air around them. Before even seeing a washroom, users are alerted to its odour. Creating an air freshened environment establishes a good first impression.

ENRICHED LOTION ANTIBACTERIAL SOAP

SKU 3486618

A formulation that prevents the growth of microorganisms on the skin:

- ✔ Capacity options can deliver up to 3,2500 doses per 1,300 ml refill
- ✔ Ideal for front of house, leisure and food prep areas
- ✔ Pouch system allow full discharge of contents, reducing waste

CLEAN SEAT DISPENSER AND REFILL

DISPENSER SKU: 1853850

REFILL SKU: 1884002

Give users full confidence and control over their experience within washroom cubicles:

- ✔ Allows users certainty their hygiene expectations are being met
- ✔ Formulation is easy to apply and dries quickly on surfaces
- ✔ Removes dirt and debris and eliminates the need for awkward seat covers

TCELL 1.0 AIR CARE DISPENSER AND REFILLS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

TCell 1.0 dispensers are a discreet, but effective, way of ensuring a fresh experience every time:

- ✔ Smooth design is easy-to-clean and operates silently
 - ✔ Dispersal from a single unit covers an area of approximately 170 m³
 - ✔ Easy to fit refills last up to 60 days within a dispenser
- Sealed refills are not prone to spoilage or contamination

INSIGHT 

Microbes on surfaces are the food stuff of germs and pathogens. Keeping washroom surfaces clean requires the removal not just of germs and pathogens, but elimination of the conditions that support their growth as well.

WASTE MANAGEMENT

Take control of the waste workflow and create a safe and hygienic environment for all facility users

Slim Jim Range

Our waste units are a discrete solution for collecting multiple types of user waste in your facility. Closed-lid, foot-operated units isolate germs and odours while reducing user contact. Smooth surfaces of durable resin are easy to clean between uses.

SUSTAINABLE

Either resin or metal construction that outlasts other products

DURABLE

Longer product life reduces replacement expenditure and improves ROI

DEPENDABLE

Touch-free operation means reduced spread of germs and bacteria

SLIM JIM STEP-ON CONTAINERS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Hands-free operation of closed-lid waste containers isolates germs, mitigating their spread:

- ✓ Multiple configurations for a wide range of workplace needs
- ✓ Quiet closing action minimises noise
- ✓ A range of colours to integrate with workplace aesthetics

INSIGHT

Bins accumulate unhygienic materials and accordingly are perceived as being unclean. So those bins that isolate waste, minimise contact and don't draw attention to themselves are the ones that unconsciously reassure facility users the most.

SLIM JIM CONFIDENTIAL DOCUMENT CONTAINER

SKU: FG9W2500L

Dispose of personal documents and payment information with confidence in this Slim Jim unit:

- ✓ Locking lid that restricts access to contents
- ✓ Narrow, easy to use paper slot prevents unauthorised entry
- ✓ Moulded handles making emptying simple and efficient

SLIM JIM UNDER COUNTER CONTAINER

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Dispose of work area waste under counters to improve safety and efficiency:

- ✓ Angled opening allows better under counter access than comparable products
- ✓ Multiple moulded grips and handles on the unit make it easily manoeuvrable
- ✓ 49l model compatible with dollies for easy, secure transport

SLIM JIM RECYCLING STATION

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

A straightforward recycling solution to improve sustainability in your facility:

- ✓ Clear markings guide users to dispose of waste correctly
- ✓ Resin construction increases cleaning efficiency between uses
- ✓ Splitting waste ensures it can be kept separate, increasing recyclability

INSIGHT

A 2020 commercial recycling study discovered that only a third of schools, colleges or universities in Europe have a formal recycling policy in place, however, 20% are considering implementing one, showing a clear recycling focus for the future. ¹

CLEANING

Keeping every area of a retail facility clean reduces risks for customers and staff

Mopping, Sweeping and Dusting

Keeping floors clear of debris reduces the risk of injury for staff and customers. Windows, surfaces, shelves and stands need to be kept clean for health and aesthetic reasons. Where spillages occur, or other responsive cleaning is required, products that can resolve the issue efficiently, minimise disruption for your facility.

DURABLE

Solidly constructed products that outlast and outperform

CAPABLE

Products that deliver the best results in multiple environments

RELIABLE

Long lifespan reduces replacement frequency, increasing ROI

PULSE MOP WITH SINGLE SIDED FRAME

SKU: FGQ96958YL00

High efficiency microfiber cleaning that is time and cost effective:

- ✓ Refillable onboard reservoir for your preferred chemical solution
- ✓ Clean more square metres in less time
- ✓ Reduces water and chemical waste
- ✓ Dries floors up to 40% quicker than traditional mopping

INSIGHT

The need for cleanliness to eliminate health hazards extends beyond the visible to the microbiological level. The use of microfiber cleaning products is proven to improve microbial cleanliness as well as limiting pathogen spread¹.

¹https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/143264/Microfibre_report_revised_Mar_08.pdf

CLEANING

Cleaning mobility is essential for efficiency and visibility

Secure Cleaning Carts

The RCP range of cleaning carts offer multiple configurations that match the needs of different areas within a facility. Durable and practical, they continue to perform through high frequency usage. Designed to be accessorised with a wide range of cleaning tools and materials, the secure microfibre cart provides users with a safe and complete solution.

VISIBLE

Reassure customers they're in a clean environment

DURABLE

Durable construction delivers long lasting performance

SUSTAINABLE

High-performance material endures, reducing replacements, improving ROI

SECURE MICROFIBRE CART

SKU: R052001

A high capacity and versatile lockable cart

- ✓ Secure storage space for cleaning products and grips and hooks for cleaning tools
- ✓ Four swivel casters for total manoeuvrability
- ✓ High capacity, leak proof, 128l vinyl bag to collect waste

INSIGHT

Now, more than ever, customers are looking for the visible signs of cleanliness and hygiene. Well stocked cleaning carts provide reassurance and indicate that cleaning is taking place and hygiene is taken seriously.

HIGH LEVEL DUSTING PACK

SKU: 1940380

Extendable, high-level dusting kit that cleans and dusts even hard-to-reach areas:

- ✓ Flexibility allows use on irregular surfaces and in difficult spaces
- ✓ Reaching further reduces the need for ladders, steps or stools
- ✓ High performance microfibre pad can endure 500 standard washes, 200 with chlorine

MAXIMIZER WET/DRY DEBRIS LOBBY PAN

SKU: 2018806

When reactive cleaning is needed, you need a tool that performs:

- ✓ Wide opening easily collects liquid or solid debris
- ✓ Single unit with moulded baffles prevents collected debris leaking
- ✓ Durable construction and rear wheels ensure longer life

SLIM JIM CADDY

SKU: 2032940

The Slim Jim Caddy is an attachable cart accessory for transporting tools and collecting waste:

- ✓ Secure rim caddy allows tools and cleaning equipment to be safely attached
- ✓ Ergonomic handles give a user complete control and comfort in-use
- ✓ High-grade resin construction provides a longer lifespan

INSIGHT

When you have multiple areas within your facility that require different cleaning methodologies, you need to balance needs with budgetary constraint. The best route to cost effectiveness is to deploy products that perform in any environment.

SAFETY

The safety and protection of customers and staff must be the top priority for all retail facility managers.

Safety Signage

The shortest route to safety is permanent signage around ever-present risks and easily deployed barriers and signs wherever hazards may arise. Our safety products use clear, simple language and imagery to indicate the nature of a hazard and enforce safe distances.

VISIBLE

Iconography that illustrates the risk for facility users

CAPABLE

Multilingual wording gets the message across to more users

DURABLE

Designed to be long lasting solutions for facilities

MOBILE BARRIER

SKU: FG9S1100YEL

Easy to deploy, store, move, see and use, the mobile barrier is ideal for every situation:

- ✓ Articulating panels extend to a maximum length of 13-feet/4 meters
- ✓ Situation appropriate deployment: straight, curved or circular
- ✓ Ships fully constructed, ready for use on arrival

INSIGHT

When light enters our eyes, parts of the eye, either the rods or cones, send a message to the brain. Yellow light intensely activates both rods and cones making it highly visible, even amongst colour-blind individuals, ideal for safety signage.

TIP

Hand hygiene extends beyond bathroom behaviour. The waste workflow often runs throughout the entirety of a facility and it should be paired with hand hygiene provisions at crucial points. Where soap and water aren't viable, consider hand rubs instead.

	LOBBY PRO® DUST PAN WITHOUT LID	32.4 X 28.6 X 12.7 CM	6	● BLACK	FG253100BLA
SPILL SYSTEM	LOBBY PRO® HANGER BRACKET	3.2 X 3.2 X 10.2 CM	6	● BLACK	FG253500BLA
	MAXIMIZER WET/DRY DEBRIS LOBBY PAN	73.4 X 42.9 X 30.5 CM	6	● BLACK/YELLOW	2018806
MECHANICAL SWEEPERS	CLEANING WAND / SQUEEGY	116.8 X 40.0 CM	4	● BLACK	FG9M0100BLA
	MECHANICAL SWEEPERS - BRUSHLESS	26.7 X 24.1 X 111.8 CM	4	● BLACK	FG421588BLA

TIP

Efficiency in floor cleaning is all about surface area. With string mops the majority of strands do not touch the floor in any pass. With flat mopping pads, the surface area of the pad is 100% in contact with the floor creating efficiency and reducing water waste.

TIP

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

TIP

Along the waste workflow, waste accumulates as it nears the point it is removed from a site. Points where waste is transferred from one receptacle to another are potentially hazardous. Using products designed to interoperate at these points, reduce these risks.

SLIM JIM STEP ON RESIN

TIP

Bins accumulate unhygienic materials and accordingly are perceived as being unclean. So those bins that isolate waste, minimise contact and don't draw attention to themselves are the ones that unconsciously reassure facility users the most.

TIP

Studying disposable coffee cups, University of Alberta researchers found customers significantly more likely to recycle cups when their names were correctly spelt. A strong component in recycling uptake amongst facility users is connecting identity with responsibility.

TIP

Containing food waste securely stops the spread of germs and while also isolating the odours that attract vermin. Implementing lidded bins across the waste workflow prevents waste interacting with the air minimising contamination and vermin risks.

**'ENABLING CONTROL IN YOUR
WASTE MANAGEMENT, CLEANING
AND HYGIENE ENVIRONMENTS'**

The RCP Core Range of products are designed to serve the needs of those that manage retail facilities. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.

The RCP Core Range is available globally, so wherever your facility is located, you can derive the benefits of a product range that has been designed with facilities like yours in mind. Partner with RCP and give your users the very best waste management, safety, cleaning and hygiene experience available.
