

# OFFICE FACILITIES CORE RANGE GUIDE

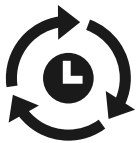

HAND HYGIENE | CLEANING | SAFETY  
WASTE MANAGEMENT | MATERIAL HANDLING

# ADAPTABLE SOLUTIONS FOR MANAGING OFFICE FACILITIES

**Managing office spaces brings with it many challenges regarding cleaning, hygiene and waste management provisions.**

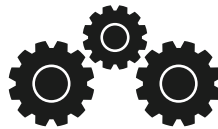

Finding a set of cleaning products that performs well across multiple areas, hygiene products that are located conveniently and waste containers that facilitate sustainability are essential to smooth operation. Often different areas in a property are afforded their own supplies based on the needs of that area.

To increase ROI, deploy solutions that work across an entire property rather than manage multiple groups of products across multiple areas.

## EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

## CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

## TAILORED SOLUTIONS

RCP have created a core product range that addresses the challenges faced by the properties you manage.

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** to properties
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

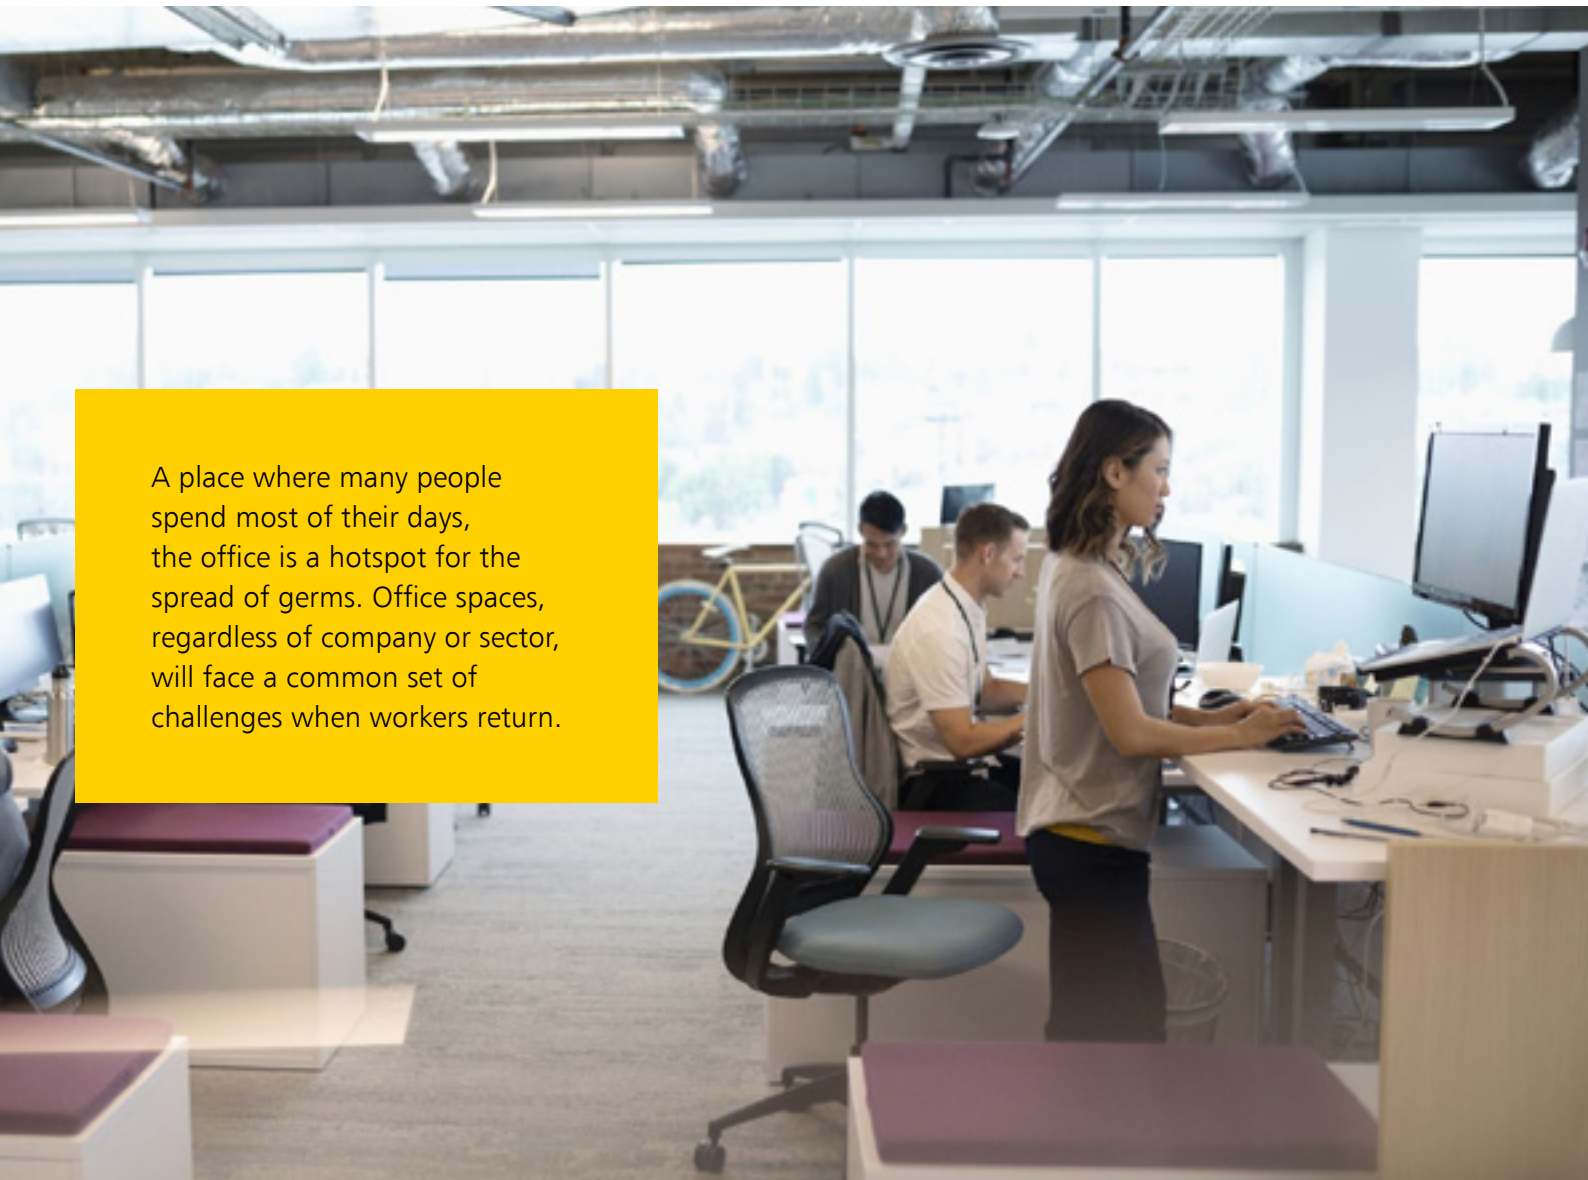

# BEST PRACTICE GUIDANCE

## HAND HYGIENE, CLEANING, WASTE MANAGEMENT AND SAFETY

### IN OFFICE FACILITIES

The essential guide for office facilities looking to implement cleaning, hygiene, safety and waste management best practices.

A place where many people spend most of their days, the office is a hotspot for the spread of germs. Office spaces, regardless of company or sector, will face a common set of challenges when workers return.

## TIPS

**HAND HYGIENE** – Frequent effective handwashing and the use of hand rubs helps prevent the spread of germs and infections.

**CLEANING** – Regularly cleaning surfaces and floors keeps them free of microbes and prevents the spread of germs.

**WASTE MANAGEMENT** – Isolating contaminated waste limits the cross-contamination potential.

**SAFETY** – Keeping a safe distance from one another keeps building staff and office tenants safe.

# BEST PRACTICE GUIDANCE

## IMPLEMENTING EFFECTIVE PROCEDURES IN ANY OFFICE FACILITY

Institutions such as the World Health Organisation (WHO) and the UK Government provide guidelines to help facilities equip and prepare for a return to full operations. They cover four key areas:

### HAND HYGIENE

Offices are places where people meet and interact with one another and the surroundings. Facilities will need to take steps such as:

- Undertake an audit prior to reopening and update signage in bathrooms, showers, break rooms, kitchens, etc. <sup>1</sup>
- Allocating high-traffic areas like receptions, kitchens or meeting rooms with their own hand hygiene provisions for staff and visitors. <sup>2</sup>

### CLEANING

In order to keep all areas of an office facility clean, cleaning materials should be available to all staff, alongside other measures:

- Building management staff responsible for hotdesking spaces should provide communal cleaning equipment in those areas. <sup>3</sup>
- Prior to reopening the office, aerate the space by opening doors and windows if possible. <sup>2</sup>

### WASTE MANAGEMENT

Waste is generated in every part of an office facility. Staff must take steps to ensure collected waste does not become a risk to staff and office tenants:

- Collected waste should be housed in closed lid containers or double bagged. <sup>4</sup>
- Waste collected from a known infectious source must be isolated for 72 hours before being reintegrated with the normal waste. <sup>4</sup>

### SAFETY

Workers returning to their offices is not the time to relax social distancing measures, rather, it must continue to be enforced with measures such as:

- Rearranging furniture (seating, plants, etc) in reception, break rooms and meeting spaces to maximise available space. <sup>5</sup>
- Creating floor markings with tape or other materials to denote 2m gaps between people. <sup>5</sup>
- Implementing barriers that direct traffic through open spaces or impromptu one-way systems. <sup>5</sup>

## TIP |

Clear communication of your procedures for hand hygiene, cleaning, safety and waste management to building staff and office tenants drives adoption and supports lasting behaviour change, and as a result, keeps everyone safe.

## TAKE CONTROL OF THE OFFICE

## ENVIRONMENT

**It is often observed that people spend more time at the office than they do at home with their families.**

It is important then that users should feel safe and comfortable within their working environment. Much of this feeling is created by controlling the cleaning, hygiene and waste management processes that underpin the area around them. Areas that are unclean and unhygienic are immediately noticeable and create dissonance for staff.

The drive to find product solutions that work as well for desks, server rooms, canteens and lifts can lead to multiple product groups being used across a property's different areas. A more cost-effective solution is to deploy products that perform equally well under all circumstances.

The following pages present a core range of product solutions that give you control of an office environment in a sustainable way that improves results and ROI.

# WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that outlast and outperform the competition, that save you money, protect facility users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S  
OPERATIONS, ENSURING HIGHER STANDARDS OF  
CLEANING AND SAFER WAYS OF WORKING**

Partnering with us you gain access to a range of product solutions that solve multiple facility challenges. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

# CORE RANGE PRODUCT CATEGORIES

**Our core range is split into six distinct categories. Each contains products that have been developed with the challenges that facilities face at the forefront.**

As you continually try to improve how you meet those challenges, you want to be able to find your way to a solution quickly. Our categorisations help you to do that. By focusing in on function, they provide a quick navigation route to an appropriate solution that works.

### HAND HYGIENE

Offices and their communal spaces such as foyers and kitchens need solutions that eliminate the risk of germ transmission for users and provide piece of mind.

### CLEANING

Every property faces a different set of cleaning challenges. Cost effective efficiency is possible with the use of cleaning products that deliver under any circumstances.

### SAFETY

Within a property, safety is paramount. Where hazards occur, or risk is increased, management must use clear signage and durable barriers to warn and protect staff and clients.

### WASHROOM

Visibly tackling surface germs and grime, collecting waste and eliminating odours within washrooms is key for the safety and comfort of users.

### WASTE MANAGEMENT

Management staff should deploy waste products, such as closed-lid bins, that keep users safe and provide elevated control over disposal and recycling.

### MATERIAL HANDLING

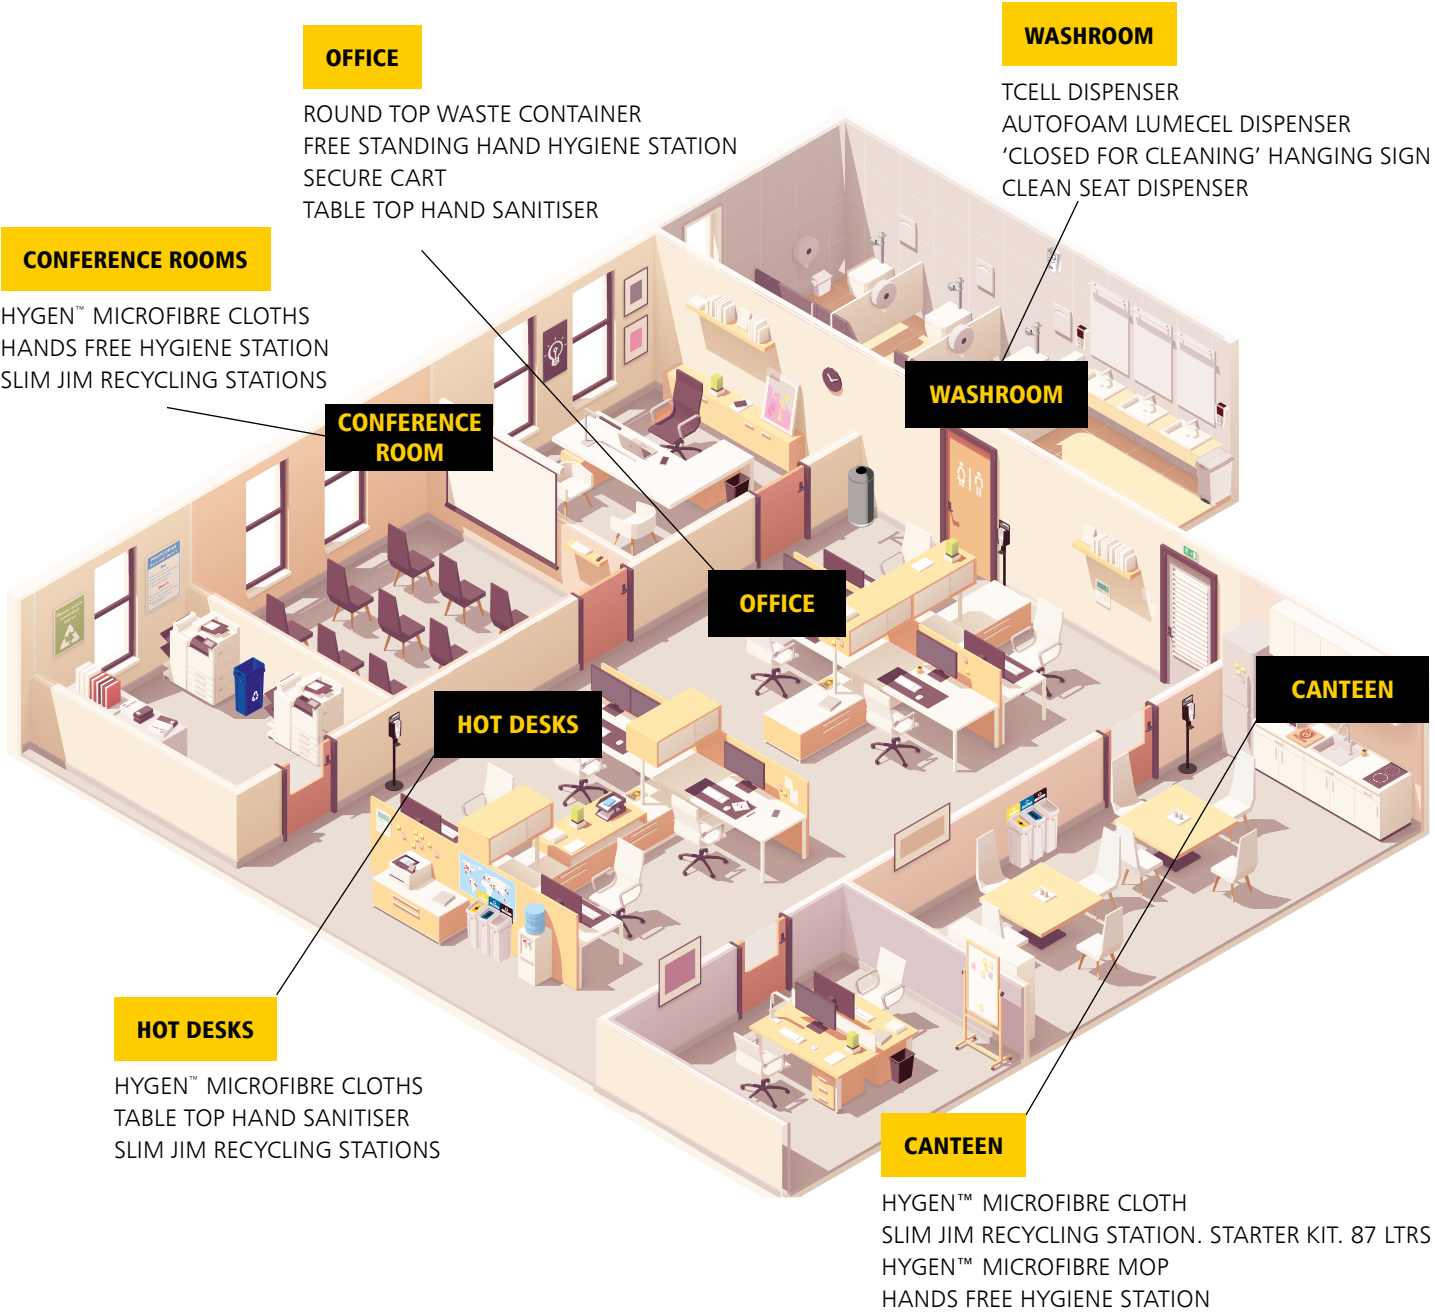

Transporting materials requires equipment that ensure staff and visitor safety, while protecting contents from damage.

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every location. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up modern office facility management.

# IDENTIFYING CHALLENGES IN OFFICE ENVIRONMENTS

Office environments house teams of people in close proximity while also creating multiple streams of waste. To keep staff safe and healthy, alongside ensuring sustainability goals are achieved, facilities need products that satisfy these needs and fit the working environment. The below illustration explores where products can be placed to ensure control of health risks and maximise sustainability.

**INSIGHT**

The key to maximising recycling is segregating waste streams as early as possible in the waste cycle. Waste kept separate stands a better chance of remaining uncontaminated and being recycled at a processing facility.

# HAND HYGIENE

Hand hygiene provisions are essential for users across a facility

## The RCP Hand Hygiene System

A hand hygiene focused range of dispensers and refills that ensure clean hands and can be deployed in locations throughout a facility. Hygienic dispensing solutions, sealed lotion and quick dry foam refills along with hand sanitiser mean wherever a dispenser is placed, there is an appropriate refill.

**DURABLE**  
Lifetime warranty gives ongoing protection for your users

**CAPABLE**  
Touch-free operation reduces contamination risk from germs and bacteria

**SUSTAINABLE**  
Refills designed to completely dispense contents to reduce waste

### HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411  
HANDS FREE HYGIENE STATION SKU: FG750824

A dependable, durable solution that users will interact with every day:

- ✓ High volume system with a wide range of soap or hand sanitiser refill options
- ✓ Up to 3-year battery life, or around 120,000 doses
- ✓ Easy-to-clean surfaces and efficient refill replacement

## INSIGHT

Bulk refill soap dispensers are more prone to bacterial contamination and can be transmission points for illness within your facility. Those risks can be mitigated with sealed refill systems that do not expose their contents to cross-contamination risks during refill.

## ALCOHOL PLUS HAND SANITISER

SKU: 1869697

A rapid drying foam that controls microorganism growth on the skin

- ✔ Kills 99.99% of many common germs that may be harmful
- ✔ Pleasant to use and clinically proven to maintain hands clean and disinfected
- ✔ With a fast contact time, hands are disinfected within 30 seconds

## ALCOHOL-FREE HAND RUB

SKU: 3486613

An EnrichedFoam alcohol-free hand rub that is safe for everyone

- ✔ Ideal for maintaining a high level of hand hygiene in any facility
- ✔ Capacity options can deliver up to 2,500 doses per refill
- ✔ Sealed soap systems eliminate potential contamination points

## TABLETOP SANITISER

SKU: 2133271

Mobile sanitising solution that can be used throughout a facility in areas such as receptions, welcome desks and facility entrances to keep hands hygienic:

- ✔ Kills 99.99% of many common germs that may be harmful
- ✔ Dries quickly on the hands with no rinsing required
- ✔ Fully tested and proven to be bactericidal, viricidal and yeasticidal

## INSIGHT

Throughout office spaces, in high-traffic areas such as reception, where hand hygiene provisions are needed, but soap, water and paper towels cannot practically be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

# WASHROOM

The safety and comfort of users is of paramount importance

## Skin, Surface and Air Care

When people enter your offices, they are alert for the visible signs of cleaning and hygiene. Exceeding their expectations gives the best representation of your company and tells staff and visitors you take hygiene and cleanliness seriously. Nowhere is this more prevalent than in the washrooms of your facility. From the moment they open the door, with that first rush of air, to the moment they leave, their senses will be alert to anything that's out of place.

### DURABLE

Products designed and constructed for long life under high use conditions

### SUSTAINABLE

Longer product life ensures a lower replacement rate, better ROI and less waste

### CAPABLE

Innovative products that deliver a safe and comfortable environment

### FLEX

FLEX DISPENSER SKU: 3486591

FLEX ENRICHEDFOAM ANTIBACTERIAL SOAP  
SKU: 3486617

Deliver hygiene into the hands of washroom users with Flex dispensers:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1ml) adapt to the needs of staff and visitors
- ✓ Lifetime warranty means reassurance for you and your users

## INSIGHT

The first thing a facility user experiences as they open a washroom door is a change in the air around them. Before even seeing a washroom, users are alerted to its odour. Creating an air freshened environment establishes a good first impression.

**ENRICHED LOTION ANTIBACTERIAL SOAP**

SKU 3486618

A formulation that prevents the growth of microorganisms on the skin:

- ✔ Capacity options can deliver up to 3,2500 doses per 1,300 ml refill
- ✔ Ideal for front of house, leisure and food prep areas
- ✔ Pouch system allow full discharge of contents, reducing waste

**CLEAN SEAT DISPENSER AND REFILL**

DISPENSER SKU: 1853850

REFILL SKU: 1884002

Give users full confidence and control over their experience within washroom cubicles:

- ✔ Allows users certainty their hygiene expectations are being met
- ✔ Formulation is easy to apply and dries quickly on surfaces
- ✔ Removes dirt and debris and eliminates the need for awkward seat covers

**TCELL 1.0 AIR CARE DISPENSER AND REFILLS**

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

TCell 1.0 dispensers are a discreet, but effective, way of ensuring a fresh experience every time:

- ✔ Smooth design is easy-to-clean and operates silently
  - ✔ Dispersal from a single unit covers an area of approximately 170 m<sup>3</sup>
  - ✔ Easy to fit refills last up to 60 days within a dispenser
- Sealed refills are not prone to spoilage or contamination

**INSIGHT** 

Microbes on surfaces are the food stuff of germs and pathogens. Keeping washroom surfaces clean requires the removal not just of germs and pathogens, but elimination of the conditions that support their growth as well.

# WASTE MANAGEMENT

Managing multiple streams of waste drives an office's sustainability success

## Recycling Range

Commercial recycling and ecological responsibility are important factors in consumer choice and are increasingly the subject of legislation. Offices face practical challenges splitting recycling streams and aesthetic challenges placing units front of house. Our Recycling Range combines appearance, customisation and durability to ensure offices find a solution that works, and one that lasts.

### DURABLE

Products built to outlast and outperform traditional products

### SUSTAINABLE

Splitting waste streams increases recyclability by preventing cross-contamination

### ADAPTABLE

Multiple labelling options and styles allows facility specific customisation

### CONFIGURE CONTAINERS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Configure is a multi-unit, multi-capacity, modular recycling solution for high-end facilities:

- ✓ Galvanised steel construction that endures even in high traffic areas
- ✓ Magnetic connections arrange containers into stations or islands that fit available space
- ✓ Secured internal chamber with vented channels for easy waste removal

## INSIGHT

Splitting waste streams early in the waste management process is the optimal way to increase the volume of material that can be recycled. Mixed waste streams take longer to process and have lower recycling rates as contaminated waste cannot be processed.

## CONFIGURE BILLBOARDS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Additional Configure signage that visually cues user behaviour:

- ✓ Multiple stream choices that are aesthetically appropriate
- ✓ Sizing options that match waste unit capacities
- ✓ Extends the Configure units for visibility in larger spaces

## SLIM JIM RECYCLING STATION

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

A straightforward recycling solution that improves sustainability results:

- ✓ Clear markings guide users to dispose of waste correctly
- ✓ Resin construction increases cleaning efficiency between uses
- ✓ Splitting waste ensures it can be kept separate, increasing recyclability

## DESKSIDE WASTEBASKET RECYCLING 39 L

SKU: FG295773BLUE

A high capacity container that's easy to use and clean between uses:

- ✓ Durable resin construction endures through frequent high use
- ✓ Single stream recycling that's suitable for the needs of each office
- ✓ Compatible with standard desk heights for convenient placement

## INSIGHT

Studying disposable coffee cups, University of Alberta researchers found customers significantly more likely to recycle cups when their names were correctly spelt. A strong component in recycling uptake amongst facility users is connecting identity with responsibility<sup>1</sup>

<sup>1</sup> <https://www.theglobeandmail.com/report-on-business/careers/business-education/why-personalized-coffee-cups-get-recycled-more-often/article38055052/>

# CLEANING

Whether it's proactive or reactive cleaning, products must be ready to perform.

## Microfibre Cleaning

Constructed from a blend of nylon and polyester microfibres, the technology in these products is proven to remove 99.9% of microbes with or without the use of chlorine. No matter where or what you use them for, they provide unrivalled performance.

### DURABLE

Longer lasting microfibre products that deliver better ROI

### DEPENDABLE

Consistent performance across situations and cleaning processes

### SUSTAINABLE

Reusable construction lasts longer reducing waste sent to landfills

## HYGEN™ MICROFIBRE CLOTHS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Split blend microfibre with extended durability, these cloths keep your cleaning operations cost effective:

- ✓ Remove 99% of microbes, whether used with chlorine or water
- ✓ Variety of colours prevents the risk of cross contamination
- ✓ Robust stitching maintains shape throughout a lifetime of use
- ✓ Endures 500 standard washes, 250 with chlorine

## INSIGHT

Microbes on equipment and surfaces are the food stuff of germs and pathogens. Keeping surfaces as clean as possible requires the removal not just of hazardous organic material, but of the conditions that support their growth as well.

# MATERIAL HANDLING

Bulk transportation of waste, supplies or materials, must be undertaken safely.

## The Mega Brute

The Mega Brute is a material handling solution that balances capacity and efficiency with ease-of-use and durability. Transporting goods and materials, the Mega Brute's size means fewer round trips and when incorporated into the waste workflow it adds sustainability options and a construction that's easy to clean between uses.

### CAPABLE

High-capacity unit that reduces collection rounds, increasing efficiency

### SUSTAINABLE

Onboard sortation effectively supports recycling efforts

### DURABLE

Resin and steel construction that endures high usage levels

### EXECUTIVE SERIES MEGA BRUTE

SKU: FG9W7300BLA

A highly versatile way to collect and transport large volumes:

- ✓ 450L capacity means doing more with less effort
- ✓ Steering and castor system for easy manoeuvrability
- ✓ Rear doors eliminate the lifting risks of heavy bags

## INSIGHT

Whether transporting waste or materials, transportation equipment needs to be bigger than what it is transporting. Equipment overladen with waste or materials, hanging over the edge, present a serious crash or spill hazard to operators and others.

# SAFETY

The safety and protection of staff and visitors are top priorities for property managers

## Safety Signage and Barriers

The shortest route to office safety is permanent signage around ever-present risks and easily deployed barriers and signs whenever hazards arise. Our safety products use clear, simple language and imagery to indicate the nature of a hazard and the safe distance staff and students should maintain.

### VISIBLE

Iconography that illustrates the risk for staff

### DEPENDABLE

Multilingual wording gets the message across to more users

### DURABLE

Designed to be long lasting solutions for facilities

### A-FRAME SAFETY SIGN

SKU: FG611200YEL

A lightweight, quick-to-deploy caution sign for spills, trips or hazards:

- ✓ Double sided, it warns users approaching from multiple directions
- ✓ Easy to carry, store and transport on cleaning carts
- ✓ ANSI/OSHA colour compliant resin construction for long lasting safety

## INSIGHT

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

## TIP

Hand hygiene extends beyond bathroom behaviour. The waste workflow often runs throughout the entirety of a facility and it should be paired with hand hygiene provisions at crucial points. Where soap and water aren't viable, consider hand rubs instead.

## TIP

Efficiency in floor cleaning is all about surface area. With string mops, the majority of strands do not touch the floor in any pass. With flat mopping pads, the surface area of the pad is 100% in contact with the floor creating efficiency and reducing water waste.

### TIP

Safety is not just signs and barriers, it's cleaning too. The U.S. Department of Labour estimates that slips, trips and falls account for 25% of injury claims. Keeping floors clean, dry and free from debris minimises the occurrence of such injuries.

### TIP

Along the waste workflow, waste accumulates as it nears the point it is removed from a site. Points where waste is transferred from one receptacle to another are potentially hazardous. Using products designed to interoperate at these points, reduce these risks.

SLIM JIM RECYCLING

### TIP

Bins accumulate unhygienic materials and accordingly are perceived as being unclean. So those bins that isolate waste, minimise contact and don't draw attention to themselves are the ones that unconsciously reassure facility users the most.

**'ENABLING CONTROL IN YOUR  
WASTE MANAGEMENT, CLEANING  
AND HYGIENE ENVIRONMENTS'**

**The RCP Core Range of products are designed to serve the needs of those that manage properties. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.**

The RCP Core Range is available globally, so wherever the properties you manage are located, you can derive the benefits of a product range that has been designed to overcome the challenges you face. Partner with RCP and give your customers the very best waste management, safety, cleaning and hygiene experience available.
