

# SMARTCLEAN

AN INNOVATIVE DIGITAL CLEANING  
MANAGEMENT SOLUTION

# Challenges in the Aged Care Industry

1

## **Cleaning processes can be difficult to track and manage with so many responsibilities**

Support Services Managers are usually responsible for cleaning, laundering and food/ beverage .

2

## **Paper-based scheduling and audits.**

Time consuming with unnecessary multiple handling of data.

3

## **Unscheduled government audits.**

Proof of cleaning and meal services need to be located and presented in real-time at all times.

4

## **Blind spots on processes and staff management**

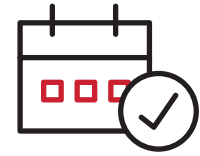

which means having to manually calculate spreadsheets to get to statistics that may assist in your operation.

# Introducing Smart Clean

## SMARTCLEAN features

SMARTCLEAN is a seamless cleaning management software that comes with an array of general features, such as:

### SCHEDULING.

Give each staff member an inside look into their daily or weekly cleaning schedule.

### FACILITY AUDITING.

Forget your old paper based auditing processes, Conduct and record your pre and post clean audits in one central location.

### LIVE AND REAL-TIME MONITORING.

Get insight into the completion of each cleaning task.

### ISSUE REPORTING.

Make it easy for cleaners to report a potential problem that could be keeping them from completing their services.

### CLEANING INSTRUCTIONS.

Provide useful instructions for new staff members or cleaning staff who are unfamiliar with a specific cleaning task.

### SMART notifications.

A place for each employee to communicate information before or after cleaning a room. For example, if unable to clean a room based on a note left on the door by the resident, your employee can take a photo and upload it as a point of proof.

### Staff profiles.

Staff members are encouraged to create a profile that shows training and qualifications. If someone is trained in terminal cleaning/deep cleaning, they may be better for the job than another employee.

### Team dashboard.

Get an inside look at the history of each member of your cleaning team to get a feel for the tasks that have been completed each day to avoid potential overlap.

### Operational dashboard.

Managerial staff can use this feature for auditing purposes, checking in to ensure proof of service.

# Who can use SMARTCLEAN?

SMARTCLEAN is equipped to assist all members of your organisation, from core cleaning staff to managers and supervisors. With three different views: Cleaner View, Supervisor View and Manager View, all staff members can improve their general processes and benefit from a streamlined workflow.

### CLEANER VIEW.

(for infection prevention staff)

- Visibility of cleaning tasks assigned for the day, rosters for the week and beyond
- Execute and track audit requirements
- Image capture with annotations
- See progress in real-time
- Highlight special issues for the supervisor

### SUPERVISOR VIEW.

(for team leader, facility manager or supervisor)

- Manage and analyse workflow, scheduling and auditing
- View real-time status of current cleaning tasks
- Utilise instant messaging feature to communicate with cleaning staff
- Download reports easily by click of a button

### MANAGER VIEW.

(for operational managers)

- Manage facility onboarding
- Gain complete control of facility cleaning procedures
- Obtain an overview of facility auditing procedures and auditing reports data
- Access dashboard to view all facility activity in real-time.
