

DID YOU KNOW SWITCHING TO OUR FLAT MOP COULD SAVE YOU 97% OF CHEMICAL AND WATER CONSUMPTION?¹

HOW FLAT MOPS DELIVER

SPLIT-BLENDED MICROFIBRE

Microfibre Mop Pads have the smallest fibre size which further increases the surface area in order to decrease liquid consumption by 95%.

LESS WATER, LESS CHEMICALS

After converting to flat mopping, an aged care facility found that only 22 litres of solution a day is required (vs. 795 litres). Over the course of a year, this is a reduction of 278,000 litres of cleaning solution, resulting in a 97.14% reduction in chemical and water usage.¹

PRODUCT LONGEVITY

Our flat mop pads are proven to last up to 500 commercial launderings, and up to 200 launderings with bleach.
