

# TRAVEL AND ENTERTAINMENT CORE RANGE GUIDE

HAND HYGIENE | CLEANING | SAFETY  
WASTE MANAGEMENT | MATERIAL HANDLING

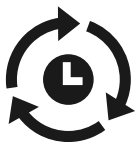

# CONTROL OF BUSY ENVIRONMENTS, WHATEVER THE SIZE

When you manage a facility that has both wide open spaces and small person-to-person interaction points, there's a broad range of cleaning, hygiene and waste management challenges you have to overcome.

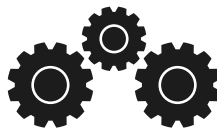

Transport and Entertainment facilities contain spaces that range from large concourses to smaller retail and food service areas, to individual seating spaces. Each of these areas have different upkeep needs and customer expectations.

To take control of these challenges cost-effectively, facilities must utilise a range of products that perform equally well under different circumstances, supplied by a partner they can trust.

## EFFICIENCY

The most efficient and cost-effective way to overcome multiple challenges is with a single solution.

## CONTROL

The products that you and your team use correspond with how much control you have over potential risks.

## TAILORED SOLUTIONS

RCP have created a core product range that resolves challenges faced by facilities like yours.

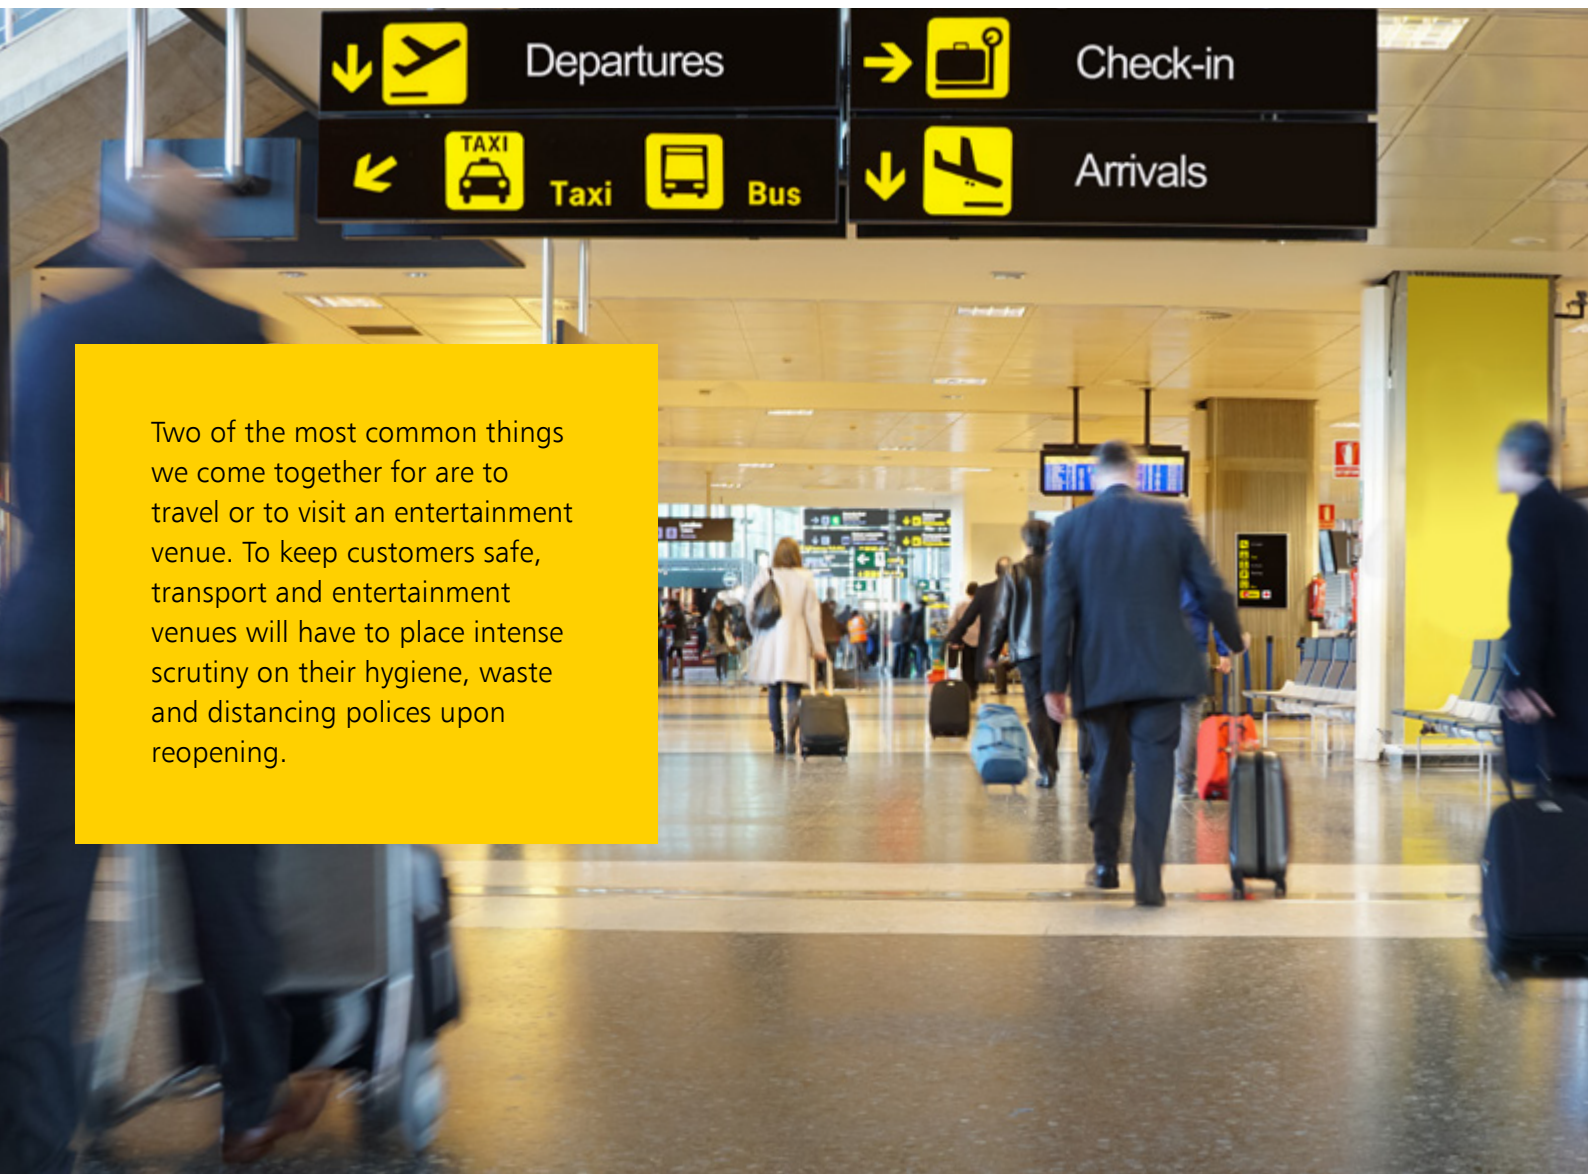

Partnering with RCP gives you control with product solutions that:

- Deliver **cleanliness, hygiene and safety** to properties
- Adapt to give **consistent performance** wherever they are used
- Are durably designed to deliver **positive return on investment (ROI)**
- Have **easy operation** that improves efficiency

# BEST PRACTICE GUIDANCE

## HAND HYGIENE, CLEANING, WASTE MANAGEMENT AND SAFETY IN TRANSPORT & ENTERTAINMENT FACILITIES

The essential guide for all transport and entertainment facilities looking to implement cleaning, hygiene, safety and waste management best practices.

Two of the most common things we come together for are to travel or to visit an entertainment venue. To keep customers safe, transport and entertainment venues will have to place intense scrutiny on their hygiene, waste and distancing policies upon reopening.

### TIPS 💡

**HAND HYGIENE** – Frequent effective handwashing and the use of hand rubs helps prevent the spread of germs and infections.

**CLEANING** – Regularly cleaning surfaces and floors keeps them free of microbes and prevents the spread of germs.

**WASTE MANAGEMENT** – Isolating contaminated waste limits the cross-contamination potential.

**SAFETY** – Keeping a safe distance from one another keeps staff and the public safe.

# BEST PRACTICE GUIDANCE

## IMPLEMENTING EFFECTIVE PROCEDURES IN TRANSPORT & ENTERTAINMENT FACILITIES

Institutions such as the World Health Organisation (WHO) and the Centre for Disease Control (CDC) provide guidelines to help facilities equip and prepare for a return to full operations. They cover four key areas:

### HAND HYGIENE

Transport and entertainment facilities are places where people meet, mix and interact with each other as well as with furniture and objects in the environment. Up-to-date hand hygiene policies are now of the utmost importance:

- Perform bathroom audits, update signage and guidance. <sup>1</sup>
- Across high-footfall areas, deploy hand hygiene stations to mitigate risk. <sup>2</sup>
- Employees interacting with the public should be given their own hand hygiene supplies. <sup>4</sup>

### CLEANING

From wide open concourses, to the arms on a seat, transport and entertainment venues must be well prepared to keep every surface as clean as possible:

- Audit high touch areas (surfaces, counters, railings, etc) and object exchange points (money, tickets, documentation, etc.) to create enhanced hygiene policies. <sup>3</sup>
- Each section within a facility, such as ticketing, restaurants and platforms should have their own allocation of cleaning supplies to maintain hygiene levels. <sup>5</sup>

### WASTE MANAGEMENT

Within entertainment venues and transportation facilities such as airports and train stations, discarded waste can present an infection threat. Facilities should incorporate updated guidance to keep staff safe:

- Waste removal should occur prior to the commencement of cleaning. <sup>5</sup>
- Waste that is accumulated back of house should be in sealed containers. <sup>5</sup>
- Ensure regular cleaning of waste containers between uses to eliminate lingering threats. <sup>5</sup>

### SAFETY

As the number of people returning to entertainment venues and transport networks rises, so too must the insistence on social distancing measures.

- In public areas, barriers can be used to establish a one-way system. <sup>5</sup>
- Signs and barriers can control customer traffic when queuing and in open spaces. <sup>5</sup>
- At points of contact where the public cannot be 2m from staff, shielding must be used. <sup>5</sup>

## TIP |

Clear communication of your procedures for hand hygiene, cleaning, safety and waste management to staff and customers drives adoption and supports lasting behaviour change, and as a result, keeps everyone safe.

# CROWDS, CLEANING AND TAKING CONTROL

**As customers move through your facility, they expect to see signs of visible cleaning and provisions to dispose of their waste safely and sustainably.**

The movement of crowds through your facility, prior to an event or throughout the day, is a key factor in your regular and reactive cleaning and waste processes. The need for both scheduled and ad-hoc cleaning can often lead to the creation of two different sets of products which can be costly. Instead, facilities can choose products that work across multiple scenarios, meeting the needs of regular and responsive cleaning.

Throughout a facility customers, visitors and staff will touch everything from counters and handles to seating and machinery. To fully support their safety, hand hygiene provisions need to be placed throughout a facility, not just in washrooms.

The following pages highlight a core range of products that deliver control, supporting you and your facility achieve cleaning, hygiene and waste management success.

# WHY RUBBERMAID COMMERCIAL PRODUCTS?

Since 1968, RCP has partnered with businesses operating in different sectors, located in many countries around the world. We have over 50 years of experience delivering innovative solution-based products to a global audience.

Today, our continuing legacy is one of products that out last and outperform the competition, that save you money, protect your facility's users and reduce the unsustainable wasteful inefficiency that is created by cheaper, less durable alternatives.

**WE CAN IMPROVE YOUR ORGANISATION'S  
OPERATIONS, ENSURING HIGHER STANDARDS OF  
CLEANING AND SAFER WAYS OF WORKING**

Partnering with us you gain access to a range of product solutions that solve multiple challenges across your facility. You can take control of operational challenges you face and do so in a way that is financially and ecologically responsible.

# CORE RANGE PRODUCT CATEGORIES

**Our core range is split into six distinct categories. Each contains products that have been developed with the challenges faced by transport and entertainment facilities in mind.**

As you continually improve how you meet challenges within your facility, you want to be able to find your way to a solution quickly. Our categorisations help you to do that. By focusing in on function, they provide quick navigation to an appropriate solution that works.

## HAND HYGIENE

Throughout transport and entertainment facilities there is a need for a variety of hand sanitising solutions that eliminate the risk of germ transmission to keep users and staff safe.

## CLEANING

Every facility faces a different set of cleaning challenges. Cost effective efficiency is possible with the use of cleaning products that deliver under any circumstances.

## WASTE MANAGEMENT

Facility managers should deploy waste products, such as closed-lid bins, that keep users safe and provide elevated control over disposal and recycling.

## WASHROOM

Visibly tackling surface germs and grime, collecting waste and eliminating odours within washrooms is key for the safety and comfort of users.

## SAFETY

Within any facility, safety is paramount. Where hazards occur, or risk is increased, staff must use clear signage and durable barriers to warn and protect facility users.

## FOOD SERVICE

Kitchens, cafes and restaurants must ensure safe preparation and service of food as well as cleaning and maintaining dining areas.

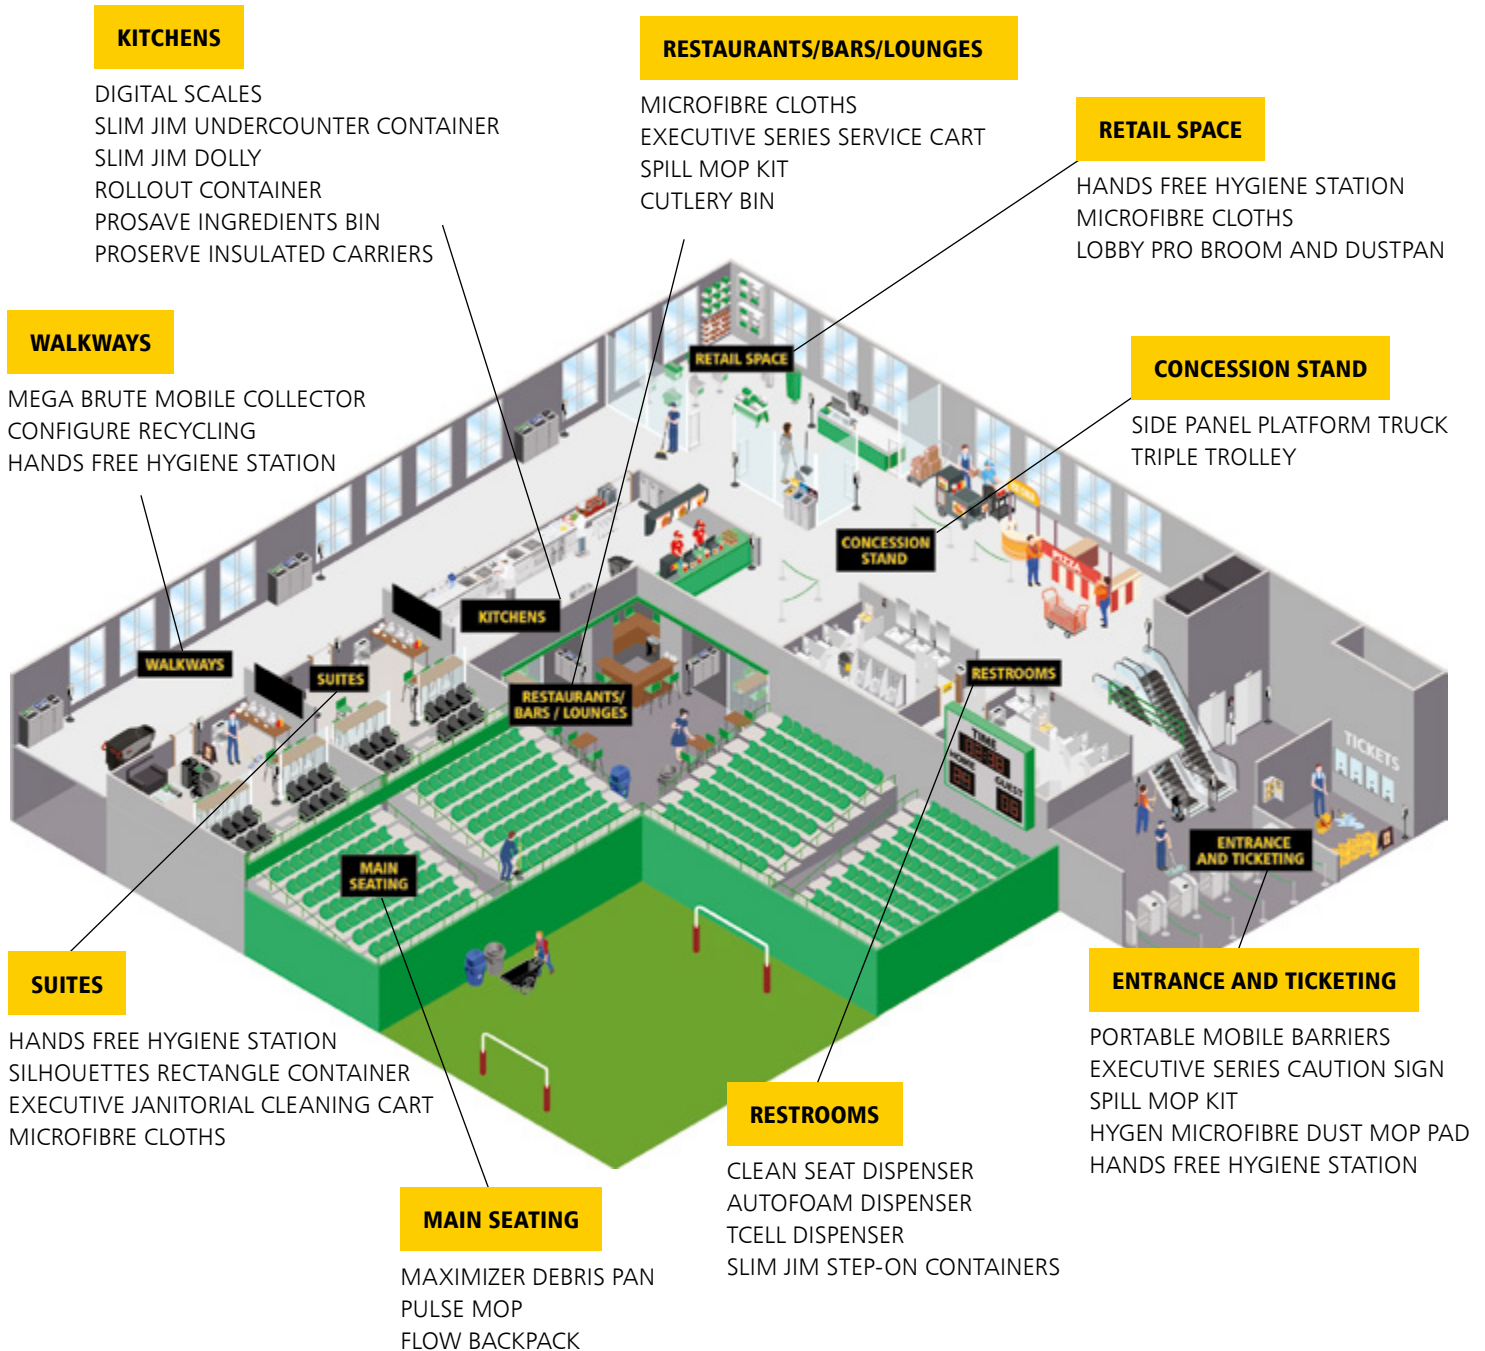

Products carrying this logo are part of our Workplace Essentials range. A set of solutions essential to every facility. They exemplify the very essence of the core range: durability, simplicity, usability and adaptability. No storeroom is properly stocked without Workplace Essentials on hand to meet the everyday challenges, and unexpected occurrences, that make up the management of a modern facility.

# IDENTIFYING CHALLENGES

## TICKETING, CONCOURSES AND SEATING

From the moment a customer enters your facility they are looking for the reassuring signs of cleanliness and hygiene. Whether it's restaurants and seating, washrooms or ticketing, they want to see signs that your facility is clean, hygienic and safe.

### INSIGHT

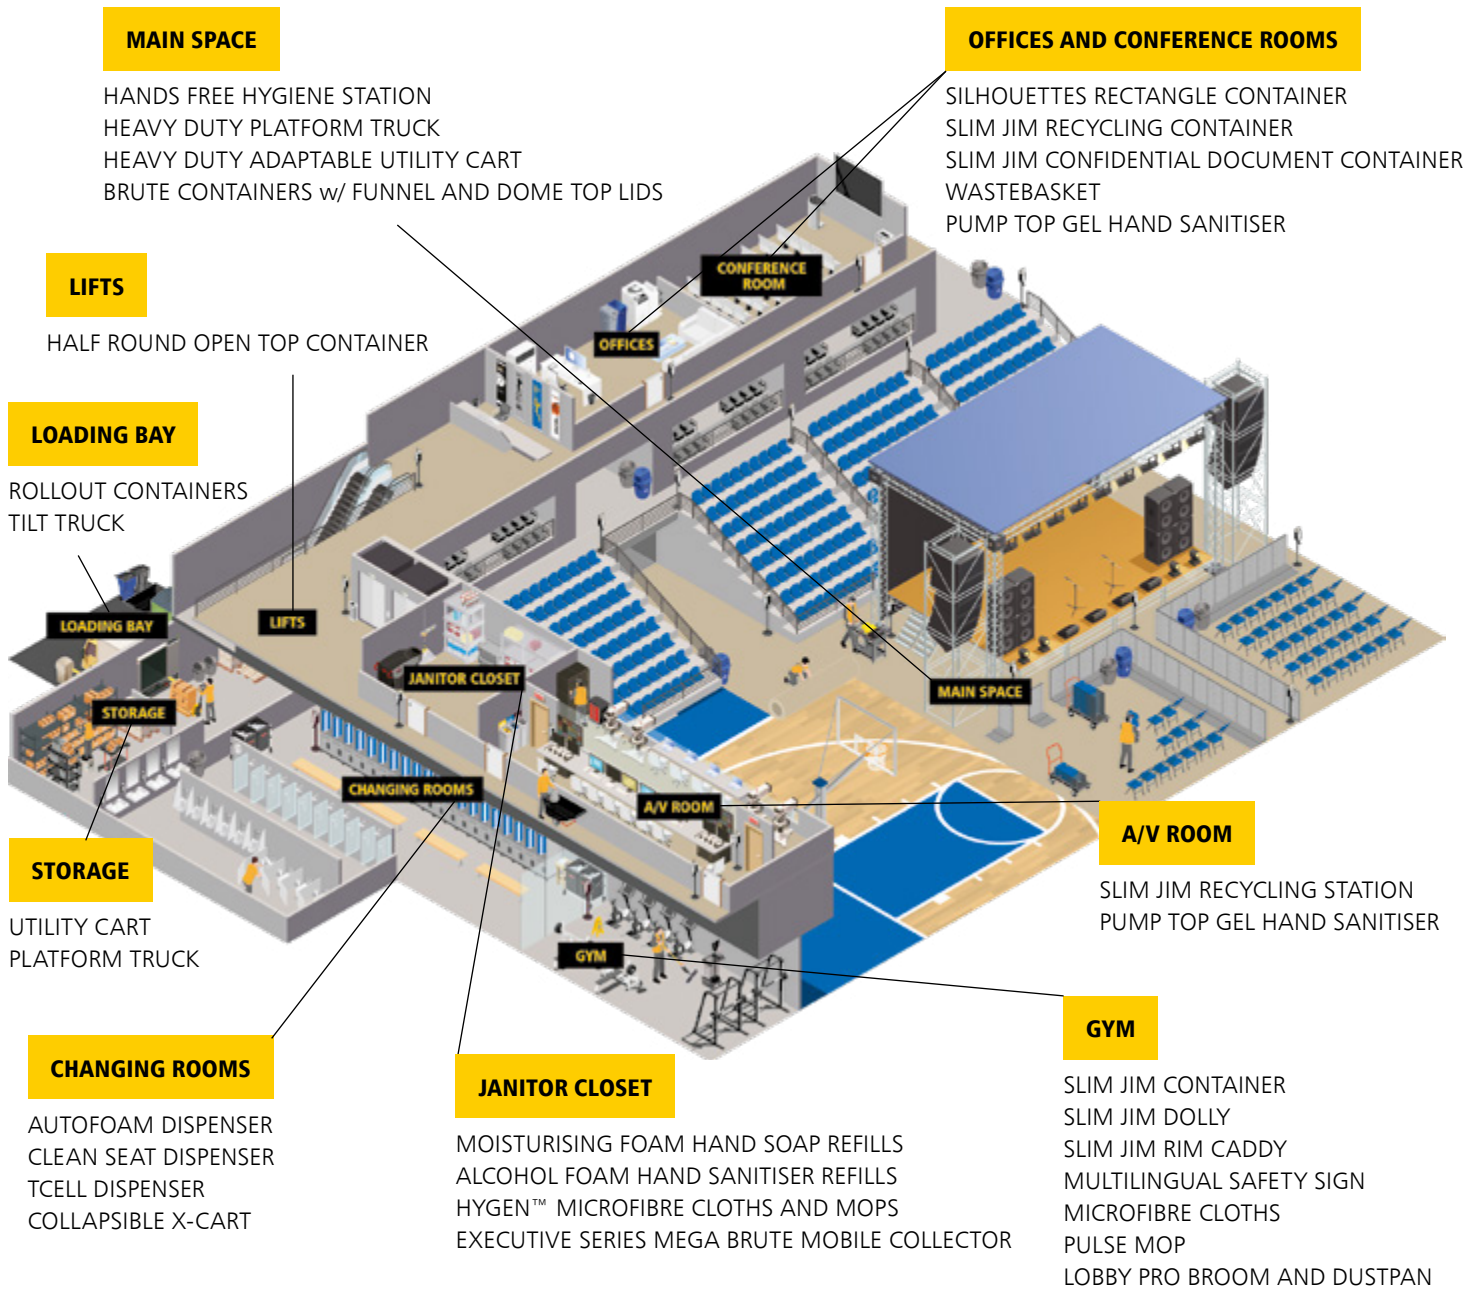

There is a base level of cleaning activity that takes place across a facility. You can maximise budget and cleaning efficacy by utilising products that perform equally well under different circumstances in different areas.

# IDENTIFYING CHALLENGES

## PROFESSIONAL AREAS

Away from public areas, staff need to be reassured in the same way that their safety and hygiene concerns are being attended to. Whether this is safety precautions in loading bays and technical areas, or hygiene and cleanliness in offices and other spaces where people mix.

## INSIGHT

Waste workflow tends towards greater accumulation. From individual bins to collection carts to back-of-house containers to the collection point where waste is removed from site. Products designed to interact, improve efficiency within this workflow.

# HAND HYGIENE

Hand hygiene provisions are essential for users across a facility

## The RCP Hand Hygiene System

A hand hygiene focused range of dispensers and refills that ensure clean hands and can be deployed in locations throughout a facility. Hygienic dispensing solutions, sealed lotion and quick dry foam refills along with hand sanitiser mean wherever a dispenser is placed, there is an appropriate refill.

### DURABLE

Lifetime warranty gives ongoing protection for your users

### CAPABLE

Touch-free operation reduces contamination risk from germs and bacteria

### SUSTAINABLE

Refills designed to completely dispense contents to reduce waste

## HANDS FREE HYGIENE STATION & AUTOFOAM DISPENSER

BLACK/CHROME DISPENSER SKU: FG750411

HANDS FREE HYGIENE STATION SKU: FG750824

A dependable, durable solution that your customers will expect to see throughout your facility:

- ✓ High volume system with a wide range of soap or hand sanitiser refill options
- ✓ Up to 3-year battery life, or around 120,000 doses
- ✓ Easy-to-clean surfaces and efficient refill replacement

## INSIGHT

The most common transmission point for germs, viruses and other pathogens is through touch, whether that is direct touch or via a third-party surface or shared equipment. Coupling hand hygiene stations with touch free equipment, such as bins, improves hygiene and safety for facility users.

## ALCOHOL PLUS HAND SANITISER

SKU: 1869697

A rapid drying foam that controls microorganism growth on the skin

- ✓ Kills 99.99% of many common germs that may be harmful
- ✓ Pleasant to use and clinically proven to maintain hands clean and disinfected
- ✓ With a fast contact time, hands are disinfected within 30 seconds

## ALCOHOL-FREE HAND RUB

SKU: 3486613

An EnrichedFoam alcohol-free hand rub that is safe for everyone

- ✓ Ideal for maintaining a high level of hand hygiene in any facility
- ✓ Capacity options can deliver up to 2,500 doses per refill
- ✓ Sealed soap systems eliminate potential contamination points

## TABLETOP SANITISER

SKU: 2133271

Mobile sanitising solution that can be used throughout a facility in areas such as receptions, welcome desks and facility entrances to keep hands hygienic:

- ✓ Kills 99.99% of many common germs that may be harmful
- ✓ Dries quickly on the hands with no rinsing required
- ✓ Fully tested and proven to be bactericidal, viricidal and yeasticidal

## INSIGHT

In high-traffic areas, such as concourses and entrances, where hand hygiene provisions are needed but soap, water and paper towels cannot be deployed, use hand hygiene solutions that dry quickly to keep hands clean and germ free.

# WASHROOM

The safety and comfort of users is of paramount importance

## Skin, Surface and Air Care

When people enter your facility, they are alert for the visible signs of cleaning and hygiene. Nowhere is this more prevalent than in the washrooms of your facility. From the moment they open the door, with that first rush of air, to the moment they leave, their senses will be alert to anything that's out of place.

### DURABLE

Products designed and constructed for long life under high use conditions

### SUSTAINABLE

Longer product life ensures a lower replacement rate, better ROI and less waste

### CAPABLE

Innovative products that deliver a safe and comfortable environment

### FLEX

FLEX DISPENSER SKU: 3486591

FLEX ENRICHEDFOAM ANTIBACTERIAL SOAP  
SKU: 3486617

Deliver hygiene into the hands of washroom users with Flex dispensers:

- ✓ Easy to install, high volume sealed foam or lotion refills, keep users clean and safe
- ✓ Variable dose sizes (0.4 – 1 ml) adapt to the needs of staff and visitors
- ✓ Lifetime warranty means reassurance for you and your users

## INSIGHT

Washrooms are one of the highest traffic areas within a facility, so the need for effective cleaning processes and hygiene provisions is essential to protect users and give the best impression of your facility.

## ENRICHED LOTION ANTIBACTERIAL SOAP

SKU 3486618

A formulation that prevents the growth of microorganisms on the skin:

- ✓ Capacity options can deliver up to 3,250 doses per 1,300 ml refill
- ✓ Ideal for front of house, leisure and food prep areas
- ✓ Pouch system allow full discharge of contents, reducing waste

## CLEAN SEAT DISPENSER AND REFILL

DISPENSER SKU: 1853850

REFILL SKU: 1884002

Give users full confidence and control over their experience within washroom cubicles:

- ✓ Allows users certainty their hygiene expectations are being met
- ✓ Formulation is easy to apply and dries quickly on surfaces
- ✓ Removes dirt and debris and eliminates the need for awkward seat covers

## TCELL 1.0 AIR CARE DISPENSER AND REFILLS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

TCell 1.0 dispensers are a discreet, but effective, way of ensuring a fresh experience every time:

- ✓ Smooth design is easy-to-clean and operates silently
- ✓ Dispersal from a single unit covers an area of approximately 170 m<sup>3</sup>
- ✓ Easy to fit refills last up to 60 days within a dispenser
- ✓ Sealed refills are not prone to spoilage or contamination

## INSIGHT

The first thing a facility user experiences as they open a washroom door is a change in the air around them. Before even seeing a washroom, users are alerted to its odour. Creating an air freshened environment establishes a good first impression.

# WASTE MANAGEMENT

Managing multiple streams of waste drives the sustainability success of a facility

## Recycling and Waste Containers

Commercial recycling and ecological responsibility are important factors in consumer choice and are increasingly the subject of legislation. Facilities face practical challenges splitting recycling streams and aesthetic challenges collecting waste. The RCP range of recycling and waste containers combine appearance, functionality and durability to create solutions that work well and last long term.

### DURABLE

Products built to outlast and outperform traditional products

### SUSTAINABLE

Splitting waste streams increases recyclability and sustainability

### ADAPTABLE

Body design and unit finishes that fit into facility aesthetics

## CONFIGURE CONTAINERS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Configure is a multi-unit, multi-capacity, modular recycling solution for high-end facilities:

- ✓ Galvanised steel construction that endures even in high traffic areas
- ✓ Magnetic connections arrange containers into stations or islands that fit available space
- ✓ Secured internal chamber with vented channels for easy waste removal

## INSIGHT

Splitting waste streams early in the waste management process is the optimal way to increase the volume of material that can be recycled. Mixed waste streams take longer to process and have lower recycling rates as contaminated waste cannot be processed.

## SLIM JIM RECYCLING STATION

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

A straightforward recycling solution to improve sustainability in your facility:

- ✓ Clear markings guide users to dispose of waste correctly
- ✓ Resin construction increases cleaning efficiency between uses
- ✓ Splitting waste ensures it can be kept separate, increasing recyclability

## HIDE-A-BAG OPEN TOP WASTEBASKET

SKU: FGWHB14SS

Decorative waste containers with a neat appearance:

- ✓ Durable steel construction designed for constant high frequency use
- ✓ Vinyl base ring resists corrosion and protects floors from damage
- ✓ Easy-to-clean smooth surfaced exterior that fits into facility furnishings

## SLIM JIM STEP ON FRONT STEP

SKU: 1883552

Slim profile step-on container that is adaptable to the needs of its environment:

- ✓ A closed lid container that safely isolates germs and odours
- ✓ Foot operation eliminates contamination risks associated with hand use
- ✓ PPE labels available to ensure safe disposal

## INSIGHT

Studying disposable coffee cups, University of Alberta researchers found customers significantly more likely to recycle cups when their names were correctly spelt. A strong component in recycling uptake amongst facility users is connecting identity with responsibility<sup>1</sup>

<sup>1</sup> <https://www.theglobeandmail.com/report-on-business/careers/business-education/why-personalized-coffee-cups-get-recycled-more-often/article38055052/>

## CLEANING

Keep surfaces clean and reduce the risk for facility users

### Microfibre Cleaning

Constructed from a blend of nylon and polyester microfibres, the technology in these products is proven to remove 99.9% of microbes with or without the use of chlorine. No matter where or what you use them for, they provide unrivalled performance and cost in use.

#### DURABLE

Longer lasting microfibre products that deliver better ROI

#### DEPENDABLE

Consistent performance across multiple tasks and cleaning processes

#### SUSTAINABLE

Reusable construction lasts longer reducing waste sent to a landfill

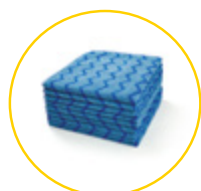

### HYGEN™ MICROFIBRE CLOTHS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Split blend microfibre with extended durability, these cloths keep your cleaning operations cost effective:

- ✓ Remove 99% of microbes, whether used with chlorine or water
- ✓ Variety of colours prevents the risk of cross contamination
- ✓ Robust stitching maintains shape throughout a lifetime of use
- ✓ Endures 500 standard washes, 250 with chlorine

### INSIGHT

Microbes on equipment and surfaces are the food stuff of germs and pathogens. Keeping surfaces as clean as possible requires the removal not just of hazardous organic material, but of the conditions that support their growth as well.

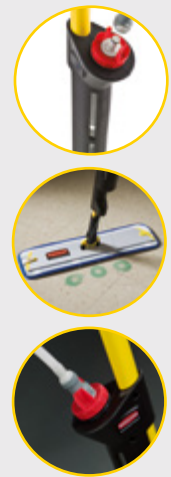

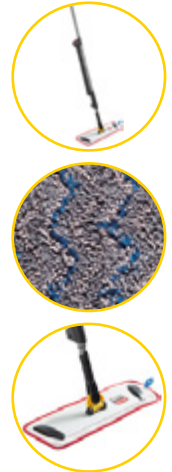

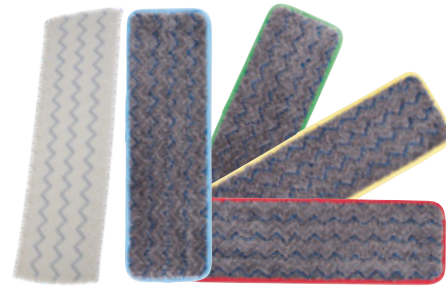

## HYGEN™ MICROFIBRE MOPS

SEE PRODUCT REFERENCE PAGES FOR SKU CODES

Industry-best premium microfibre mopping performance:

- ✓ Greater surface contact cleans more of the floor first time
- ✓ Zig-zag technology removes more microbes than conventional products
- ✓ Reusable for a minimum of 500 launders (250 with chlorine)

## PULSE MOP WITH SINGLE SIDED FRAME

SKU: FGQ96958YL00

High efficiency cleaning that is time and cost effective:

- ✓ Refillable onboard reservoir for direct cleaning with your preferred solution
- ✓ Clean more square metres in less time
- ✓ Uncoupling from a standard bucket reduces water and chemical waste

## SLIM JIM CLEANING TROLLEY WITH PULSE MOP CLIP

SKU: 2110167

A functional system that combines waste collection and cleaning:

- ✓ A configurable system of hooks and grippers holds cleaning tools and signs
- ✓ Slim profile improves manoeuvring in confined spaces
- ✓ Compatible with all HYGEN tools and PULSE mops

## INSIGHT

Now, more than ever, the users of a facility are looking for the visible signs of cleanliness and hygiene. Well stocked cleaning carts provide reassurance and indicate to users what cleaning processes are in place, without having to see them performed.

# MATERIAL HANDLING

Collecting, processing and redistributing materials requires solid, dependable, transportation

## Material Handling Trucks

When anything needs to be moved in bulk, such as materials, supplies or waste, the associated risks for operators and other facility users begin to increase. Our Material Handling trucks are designed to overcome these challenges and keep all facility users safe.

### DURABLE

Solid construction that contains materials and endures constant use

### CAPABLE

High capacity volumes and sturdy casters make transport efficient and safe

### SUSTAINABLE

Long product life reduces the frequency of truck replacement

## MEGA BRUTE MOBILE COLLECTOR

SKU: FG9W7300BLA, MEGA BRUTE LID SKU: FG9W7200BLA

A highly manoeuvrable, high capacity (450ltr) waste collection system:

- ✓ Hinged barn doors for easy emptying
- ✓ Integral caddy to hold cleaning supplies
- ✓ Accessorise with 87ltr Slim Jim for additional waste stream sorting
- ✓ Optional hinged lid fully covers internal waste

## STRUCTURAL FOAM TILT TRUCK

400LTR: FG9T1400BLA, 600LTR: FG101300BLA, 800LTR: FG9T1500BLA

The Tilt Truck that combines performance and strength:

- ✓ A steering wheel handle design that provides ergonomic manoeuvrability
- ✓ Constant force design means dumping can be safely controlled by a single operative
- ✓ Smooth surfaces and resin construction for an easy-to-clean unit that endures high-use

## INSIGHT

Whether transporting waste or materials, transportation equipment needs to be bigger than what it contains. Equipment overlaid with waste or materials present a serious crash or spill hazard to operators and others.

## SAFETY

High customer traffic presents many kinds of risk. When hazards arise, you must respond quickly.

## SPILL MOP KITS

Wherever they occur in a facility, spillages can be a serious hazard to customers and staff alike. Responding quickly and efficiently with an easy-to-deploy spill mop kit reduces risk and prevents surface damage from occurring.

### DURABLE

Each mop pad can clear 940ml of water without leaking

### RELIABLE

Innovative design makes pads easy to attach, use and dispose of

### CAPABLE

Spill mop pads leave floors dryer than string mop alternatives

### SPILL MOP KIT

SKU: 2031093

A Spill Mop Kit carries everything you need for when spills occur

- ✓ Robust cabinet houses equipment and operational instructions
- ✓ Holds two 10-piece general spill pads or two 10-piece biohazard spill pads
- ✓ Telescopic mop handle housed alongside pads for quickest reaction times

## INSIGHT

The two factors in limiting risks from hazards that occur are to clearly alert people and resolve the hazard as quickly as possible. Lightweight deployable signage can ensure safe distances while staff use effective products to tackle the hazard efficiently.

## A-FRAME SAFETY SIGN

SKU: FG611200YEL

A lightweight, quick-to-deploy caution sign for spills, trips or hazards:

- ✓ Double sided, it warns users approaching from multiple directions
- ✓ Easy to carry, store and transport on cleaning carts
- ✓ ANSI/OSHA colour compliant resin construction for long lasting safety

## MOBILE BARRIER

SKU: FG9S1100YEL

Easy to deploy, store, move, see and use, the mobile barrier is ideal for every situation:

- ✓ Articulating panel extend to a maximum length of 4 meters
- ✓ Situation appropriate deployment: straight, curved or circular
- ✓ Ships fully constructed, ready for use on arrival

## POP-UP CONE AND SLEEVE

SKU: FG9S0000YEL

Multilingual, multi-directional signage for effective communication:

- ✓ Durable resin construction endures the most rugged usage
- ✓ Slimline storage appropriate for cleaning stores or facility walls
- ✓ Pop-out deployment removes fiddly operation, allowing immediate use

## INSIGHT

Safety measures need to communicate two things, the existence of a hazard and what is a safe distance from that hazard. To minimise risk, signs must be deployed quickly. Lightweight signage with clear messaging and rugged design keep people safe.

## TIP

Hand hygiene extends beyond bathroom behaviour. The waste workflow often runs throughout the entirety of a facility and it should be paired with hand hygiene provisions at crucial points. Where soap and water aren't viable, consider hand rubs instead.

## TIP

Efficiency in floor cleaning is all about surface area. With string mops, the majority of strands do not touch the floor in any pass. With flat mopping pads, the surface area of the pad is 100% in contact with the floor creating efficiency and reducing water waste.

## TIP

When you have multiple areas within your facility that require different cleaning methodologies, you need to balance needs with budgetary constraint. The best route to cost effectiveness is to deploy products that perform in any environment.

## TIP

Safety is not just signs and barriers, it's cleaning too. The U.S. Department of Labour estimates that slips, trips and falls account for 25% of injury claims. Keeping floors clean, dry and free from debris minimises the occurrence of such injuries.

## TIP

Along the waste workflow, waste accumulates as it nears the point it is removed from a site. Points where waste is transferred from one receptacle to another are potentially hazardous. Using products designed to interoperate at these points, reduce these risks.

**'ENABLING CONTROL IN YOUR  
WASTE MANAGEMENT, CLEANING  
AND HYGIENE ENVIRONMENTS'**

**The RCP Core Range of products are designed to serve the needs of those that manage facilities. They take into consideration practical concerns such as cleanliness and safety while also delivering control over operational considerations such as productivity and budget.**

The RCP Core Range is available globally, so wherever the facilities you manage are located, you can derive the benefits of a product range that has been designed to overcome the challenges you face. Partner with RCP and give your customers the very best waste management, safety, cleaning and hygiene experience available.
