

**THE NEW
GENERATION
WAVEBRAKE®**

WAVEBRAKE®

JUST GOT A

WHOLE LOT BETTER

Rubbermaid Commercial Products introduced the first resin mop bucket in 1974. The BRUTE mop bucket was introduced in 1995 with new ergonomic features. WaveBrake® was introduced in 2005 with a patented bucket and baffle design that reduced splashing for more efficient, safer mopping.

Rubbermaid Commercial Products continues to innovate, improving the industry-leading splash reduction and adding new features that surpass any other traditional mop bucket. These new features help the New Generation WaveBrake® clean floors with less effort to get the job done safer.

Proudly made in Winchester, Virginia, WaveBrake® features structural web-molded plastic construction to ensure the highest quality and durability you have come to expect while delivering industry-leading performance.

DESIGNED TO

IMPROVE SAFETY

Traditional mop buckets may cause additional spills when moving or cleaning. Patented WaveBrake® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff.

20 PERCENT OF ALL
JOB-RELATED INJURIES ARE CAUSED BY
SLIPS, TRIPS, AND FALL INJURIES¹

SLIPS, TRIPS, AND FALL INJURIES
COST EMPLOYERS APPROXIMATELY **\$40,000**
PER INCIDENT¹

85 PERCENT OF
WORKERS' COMPENSATION CLAIMS
ARE ATTRIBUTED TO EMPLOYEES
SLIPPING ON SLICK FLOORS²

REDUCES ^P SPLASHING ^B **80%**^{*}

Traditional mop buckets may cause additional spills when moving or cleaning. Patented WaveBrake baffles result in less splashing.

^{*}versus competitive 35Qt U.S. single compartment mop bucket and wringer, not including divider bucket and accessories.

² Industrial Safety & Occupational Health Markets 5th Edition

EASY TO EMPTY

The New Generation WaveBrake® mop bucket is designed to empty water with less effort.

The average mop bucket with water weighs up to **28 pounds**. New Generation WaveBrake® incorporates an optional foot-operated drain to help empty heavy mop buckets into floor drains, eliminating the strain associated with lifting and bending.

For facilities where sinks are used, integrated handles, a sink ledge, and a pour spout provide control while lifting and emptying.

BUILT-IN DRAIN

A convenient foot-operated drain eliminates the strain of lifting and bending when emptying mop buckets.

INTEGRATED HANDLES

Integrated handles help ensure a secure grip to lift and empty the mop bucket.

POUR SPOUT

A molded-in pour spout and sink ledge help direct water while emptying the mop bucket.

FREESTANDING WRINGER

Integrated wringer handle makes removing the wringer easy and convenient; wringer base is designed to stand upright to minimize bending over.

REDESIGNED FOR PROFESSIONALS

The New Generation WaveBrake® is designed and built to the highest quality standards for professional use. WaveBrake wringers have a **5-YEAR, INDUSTRY-LEADING WARRANTY.**

DEPENDABLE WRINGER

The side-press and down-press wringers are designed to last 5 years or 200,000 wringing cycles.*

EASY TO MANEUVER

Integrated guides ensure a secure wringer and bucket connection, providing stability while wringing and maneuvering.

CONVENIENT MOP HOLDER

Flared wringer design allows mop handle to conveniently rest on the side of the wringer while not in use.

IMPROVED WRINGER DESIGN

Improved wringer design now works with more mop sizes, from x-small to x-large, 12oz - 32oz.

DURABLE WRINGER HANDLE

WaveBrake® wringer handle is made with steel and includes a comfort grip to help make wringing easy.

NON-MARKING CASTERS

Non-marking casters will not scuff floors to keep them looking their best.

DIRTY WATER BUCKET

The WaveBrake® Dirty Water Bucket nests below the wringer to keep the dirty water separate to help reduce risk of cross-contamination.

IMPROVED PRODUCTIVITY

The New Generation WaveBrake® is built to last, with features you can continue to depend on.

COLOR-CODED CLEANING

Cleaning professionals today use a color-coded cleaning system, using color-coded buckets, handles, and mops to help reduce cross-contamination. Additionally, they can be organized by function, department, or building area, making it easier to track usage.

RECOMMENDED USAGE:

Color-coding systems can vary by vertical and application; however, Rubbermaid Commercial Products, in alignment with industry experts, recommends the following system:

- **Yellow:** Back-of-House Cleaning
- **Brown:** Back-of-House Cleaning
- **Red:** High-Risk Restroom Areas
- **Blue:** General-Purpose Cleaning
- **Green:** General Food Processing, Serving, And Bar Areas
- **Black:** Front-of-House Cleaning
