

MOTORIZED HOUSEKEEPING CART

MOVE HEAVY LOADS WITH LESS EFFORT

Workers' compensation data from California shows that hotel housekeepers are ~2x as likely to experience an injury from pushing & pulling tasks relative to all other occupations.*

REDUCE STRAIN

The battery powered cart virtually eliminates the need for manual force when transporting loads up to 350 lb in both forward and reverse.

DECREASE DOWNTIME

Housekeepers can complete an average shift using one fully charged battery**; however, dual onboard battery compartments provide back-up power, if needed, without having to plug in the entire cart.

MAXIMIZE VERSATILITY

The retrofit motorized kits are compatible with both new and existing RCP Housekeeping Carts, providing a range of options to meet facility needs.

*"Workplace Injuries in Hotel Housekeeping in California" – Department of Industrial Relations (2016)

**Based on an average shift of 8 hours; assumes cart is not continuously running. Continuous runtime is approximately 2 hours.

MOTORIZED HOUSEKEEPING CART

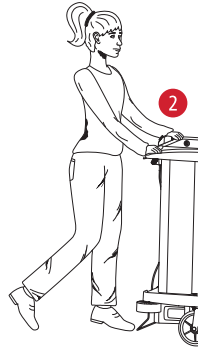

1

The risk of low back pain is more likely during initial push force when moving heavy loads manually.

2

The motorized kit allows you to move up to 350 lb easier than manually pushing.
