

# STOCKING THE HIGH-SECURITY JANITORIAL CLEANING CART

The High-Security Cart is ideal for storing and moving cleaning supplies, waste, and safety items from room to room within healthcare facilities. Carts are divided into three sections for improved organization: floor care, storage and collection.

## FLOOR CARE

- 1** Integrated hooks on the cart side are built to hold two safety signs for spill management and wet floor care.
- 2** Recommended products for six QuickClip tool holders include:
  - Dust mop handle
  - Wet mop handle
  - Duster
  - Broom and dust pan
- 3** Installed HYGEN™ Microfiber Charging Bucket Stabilizing Frames allow for a secure fit on either base platform.

## STORAGE

- 4** Cart hood can be accessed from both directions with a single lock turn. Doors should remain locked at all times, per Joint Commission Standards.

Spray bottles or cleaning solutions can be stored in 10 qt pails located under the hood.
- 5** Locking cabinet storage space is ideal for:
  - Cleaning solutions
  - Microfiber cloths
  - Paper goods
  - Waste liners

## COLLECTION

- 6** The vinyl bag can be used to collect waste or soiled linens, and keeps these items separate from the rest of the cart.
- 7** A convenient waste cover and storage compartment is the ideal place to store a notebook, pens, paperwork, and extra gloves.
